◆ This product is allowed with restrictions. See the Categories section for use restrictions.

■ This liquid fertilizer has been inspected and approved for use in NOP organic production by OMRI.

① The arsenic level of this product exceeds 10ppm. Application to certified organic farms must not contribute to contamination of crops, soil, or water.

② The arsenic level of this product exceeds 20ppm. Application to certified organic farms must not contribute to contamination of crops, soil, or water.

Processing Products: Sanitizers, Disinfectants and Cleaners

Kettle Wash High Alkaline Recirculation Cleaner (ach-10661) ◆

Considered to meet the requirements under 205.105(c) of the NOP Rule provided measures are taken to prevent contact with the organically produced products or ingredients.

950 Chelated Chelated Liquid Alkali (ach-10660) ◆

Considered to meet the requirements under 205.105(c) of the NOP Rule provided measures are taken to prevent contact with the organically produced products or ingredients.

Crop Products: Calcium Chloride, Fertilizers, Blended

Agro • K CLEAN Calcium (tlk-10597) ◆

Permitted only as a foliar spray to treat a physiological disorder associated with calcium uptake. Fertilizers are restricted if the liquid or solid product contains one or more restricted plant or animal materials as an ingredient.

Crop Products: Fertilizers, Blended

Agro • K CLEAN Potassium 0-0-6 (tlk-10602)

Agro • K CLEAN Symspray 0-0-1 (tlk-10603)

Crop Products: Fertilizers, Blended with micronutrients

Agro • K CLEAN BioMax (tlk-10596) ◆

May be used if soil deficiency of the synthetic micronutrients being applied is documented by testing. Must not be used as a defoliant, herbicide or desiccant.

Agro • K CLEAN Copper (tlk-10598) ◆

May be used if soil deficiency of the synthetic micronutrients being applied is documented by testing. Must not be used as a defoliant, herbicide or desiccant.

Agro • K CLEAN Iron (tlk-10599) ◆

May be used if soil deficiency of the synthetic micronutrients being applied is documented by testing. Must not be used as a defoliant, herbicide or desiccant.

Agro • K CLEAN Manganese (tlk-10601) ◆

May be used if soil deficiency of the synthetic micronutrients being applied is documented by testing. Must not be used as a defoliant, herbicide or desiccant.

Agro • K CLEAN Zinc (tlk-10604) ◆

May be used if soil deficiency of the synthetic micronutrients being applied is documented by testing. Must not be used as a defoliant, herbicide or desiccant.

Crop Products: Fertilizers, Blended with synthetic magnesium sulfate

Agro • K CLEAN Magnesium (tlk-10600) ◆

May only be used as a plant or soil amendment if soil deficiency for magnesium is documented.

Crop Products: Copper Sulfate

Masterbac Fungicida/Bactericida (dsn-10806) ◆
For plant disease control, must be used in a manner that minimizes accumulation of copper in the soil. For use as an algicide in aquatic rice systems and for tadpole shrimp control in aquatic rice systems, must not exceed one application per field during any 24-month period. Application rates are limited to those which do not increase baseline soil test values for copper over a time frame agreed upon by the producer and accredited certifying agent. May be used as an algicide, insecticide, or disease control if the requirements of 205.206(e) are met, which requires the use of preventative, mechanical, physical, and other pest, weed, and disease management practices.

Crop Products: Pyrethrum

Pyren (dsn-10908) ◆

Crop Products: Chlorine Dioxide

GC 12G (smt-11069) ◆

Residual chlorine levels in the water in direct crop contact (when used pre-harvest) or as water from cleaning irrigation systems applied to the soil should not exceed the maximum residual disinfectant level under the Safe Drinking Water Act (0.8 mg/L (0.8 ppm) expressed as chlorine dioxide), except that chlorine products may be used in edible sprout production according to EPA label directions. May be used up to maximum labeled rates for disinfecting and sanitizing equipment or tools. No intervening event is necessary before equipment is used in contact with organic crops.

Processing Products: Chlorine Materials, Acidified Sodium Chlorite

Fit Fresh Antibacterial Produce Wash (smt-10916) ◆

May be used in direct contact with post-harvest crop or food at levels approved by the Food and Drug Administration or the Environmental Protection Agency for such a purpose. Such use must include a final rinse and residual chlorine levels in final rinse water shall not exceed the Maximum Residual Disinfectant Limit under the Safe Drinking Water Act, except that a final rinse is not required for use in FSIS inspected egg breaking facilities. When used as disinfectants and sanitizers for food contact surfaces, chlorine materials may be used up to maximum labeled rates and rinsing is not required unless mandated by the label use directions. Secondary direct antimicrobial food treatment and indirect food contact surface sanitizing. Acidified with citric acid only.

Crop Products: Copper Sulfate

CuProtective Fungicida Bactericida (smr-11041) ◆

For plant disease control, must be used in a manner that minimizes accumulation of copper in the soil. For use as an algicide in aquatic rice systems and for tadpole shrimp control in aquatic rice systems, must not exceed one application per field during any 24-month period. Application rates are limited to those which do not increase baseline soil test values for copper over a time frame agreed upon by the producer and accredited certifying agent. May be used as an algicide, insecticide, or disease control if the requirements of 205.206(e) are met, which requires the use of preventative, mechanical, physical, and other pest, weed, and disease management practices.
