◆ This product is allowed with restrictions. See the Categories section for use restrictions.

■ This liquid fertilizer has been inspected and approved for use in NOP organic production by OMRI.

1 The arsenic level of this product exceeds 10ppm. Application to certified organic farms must not contribute to contamination of crops, soil, or water.

2 The arsenic level of this product exceeds 20ppm. Application to certified organic farms must not contribute to contamination of crops, soil, or water.

4 The lead level of this product exceeds 90ppm. Application to certified organic farms must not contribute to contamination of crops, soil, or water.

5 The lead level of this product exceeds 180ppm. Application to certified organic farms must not contribute to contamination of crops, soil, or water.

6 The cadmium level of this product exceeds 20ppm. Application to certified organic farms must not contribute to contamination of crops, soil, or water.

7 The cadmium level of this product exceeds 40ppm. Application to certified organic farms must not contribute to contamination of crops, soil, or water.

8 This product contains more than 1,000 MPN/g fecal coliform. Application of this product on certified organic farms poses a significant risk of contributing to contamination of crops, soil, or water. Pathogen mitigation measures, such as a 120/90 day pre-harvest application period or composting as described at §205.203 of the National Organic Program Regulations, must be part of an organic system plan to reduce the contamination risk of this product.

9 This product contains more than 3 MPN/4g Salmonella. Application of this product on certified organic farms poses a significant risk of contributing to contamination of crops, soil, or water. Pathogen mitigation measures, such as a 120/90 day pre-harvest application period or composting as described at §205.203 of the National Organic Program Regulations, must be part of an organic system plan to reduce the contamination risk of this product.

10 This ingredient or processing aid is not certified organic. The operation supplying this input material may be exempt from certification under §205.101. Agricultural ingredients in this product shall not be labeled as organic when used in further processed products unless the ingredient or processing aid is certified by a USDA accredited certifier.

OG Organics by Advanced Nutrients Iguana Juice Bloom 4-3-6 (anf-13180) ■◆
Micronutrient deficiency must be documented by soil or tissue testing or other documented and verifiable method as approved by a certifying agent. Must not be used as an herbicide, defoliant or desiccant. This product contains highly soluble nitrogen and must be applied in a manner that does not contribute to the contamination of crops, soil or water. Its use must be part of an organic system plan that maintains or improves the natural resources of the operation, including soil and water quality, and comply with crop nutrient and soil fertility requirements. May be used as a plant or soil amendment if soil deficiency of magnesium is documented by testing. Refer to specific ingredient categories for applicable use restrictions.

OG Organics by Advanced Nutrients Iguana Juice Grow 3-1-3 (anf-13182) ■◆
Micronutrient deficiency must be documented by soil or tissue testing or other documented and verifiable method as approved by a certifying agent. Must not be used as an herbicide, defoliant or desiccant. This product contains highly soluble nitrogen and must be applied in a manner that does not contribute to the contamination of crops, soil or water. Its use must be part of an organic system plan that maintains or improves the natural resources of the operation, including soil and water quality, and comply with crop nutrient and soil fertility requirements. May be used as a plant or soil amendment if soil deficiency of magnesium is documented by testing. Refer to specific ingredient categories for applicable use restrictions.

Crop Products: Calcium Chloride, Fertilizers, Blended with micronutrients, Fertilizers, Blended with synthetic magnesium sulfate, Iron Products, Manganese Products, Zinc Products

OG Organics by Advanced Nutrients Sensi Cal Mag Xtra Iron, Kelp and other Micronutrients (anf-14371) ◆
For use as a foliar spray to treat a physiological disorder associated with calcium uptake. May be used as a plant or soil amendment if soil deficiency of magnesium is documented by testing. Micronutrient deficiency must be documented by soil or tissue testing or other documented and verifiable method as approved by a certifying agent. Must not be used as an herbicide, defoliant or desiccant. Refer to specific ingredient categories for applicable use restrictions.

Crop Products: Adjuvants, for use in crop pesticides

XPANDEX Surfactante Organosiliconado Líquido Miscible (adh-13659) ◆
For use as an inert ingredient in combination with permitted active pesticidal ingredients. May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

PALENE DF® COADYUVANTE ORGÁNICO LÍQUIDO MISCIBLE (adh-14900) ◆
For use as an inert ingredient in combination with permitted active pesticidal ingredients. May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Crop Products: Amino Acids

FORZAMIN FERTILIZANTE ORGÁNICO LÍQUIDO (adh-16498)

Crop Products: Aquatic Plant Products, synthetically extracted

ALGACROP FERTILIZANTE ORGÁNICO GRANULADO (adh-0570)

ALGACROP L10 FERTILIZANTE ORGÁNICO LÍQUIDO (adh-10715)

Crop Products: Boron Products, Fertilizers, Blended with micronutrients, Magnesium Sulfate – Allowed With Restrictions

Agrhusa Agrobiologicos PHYTOSWEET Fertilizante Orgánico Bioestimulante Maduración Y Engorde Polvo Soluble (adh-18418) ◆
Refer to specific ingredient categories for applicable use restrictions. Micronutrient deficiency must be documented by soil or tissue testing or other documented and verifiable method as approved by a certifying agent. Must not be used as an herbicide, defoliant or desiccant. May be used as a plant or soil amendment if soil deficiency of magnesium is documented by testing.

Crop Products: Boron Products, Fertilizers, Blended with micronutrients, Molybdenum Products

AMINOGANIC Ca-B-Mo Fertilizante Orgánico Líquido (adh-14462) ◆
Micronutrient deficiency must be documented by soil or tissue testing or other documented and verifiable method as approved by a certifying agent. Must not be used as an herbicide, defoliant or desiccant. Refer to specific ingredient categories for applicable use restrictions.

Crop Products: Botanical Pesticides

CANELCROP Insecticida-Fungicida-Nematicida Agrícola Concentrado Emulsionable (adh-11574) ◆
May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

ULTRAGARLIC Insecticida Agrícola Concentrado Soluble (adh-11575) ◆
May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

CELAPYR CE Aceite de canela + Piretrinas Insecticida Agrícola Concentrado Emulsionable (adh-13129) ◆
May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

REGAUCID PRO Quitina + Aminoácidos + Extracto de regaliz + Corteza de sauce blanco FUNGICIDA AGRÍCOLA CONCENTRADO SOLUBLE (adh-14458) ◆
May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

THYFON L Aceite de tomillo + Aceite de árbol de té + Extracto de gobernadora Fungicida Agrícola Concentrado Soluble (adh-18420) ◆
May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Crop Products: Copper Sulfate

PROTECTOR Sulfato de cobre pentahidratado Fungicida Agrícola Solución Acuosa (adh-8759) ◆
For plant disease control, must be used in a manner that minimizes accumulation of copper in the soil. For use as an algicide in aquatic rice systems and for tadpole shrimp control in aquatic rice systems, must not exceed one application per field during any 24-month period. Application rates are limited to those which do not increase baseline soil test values for copper over a time frame agreed upon by the producer and accredited certifying agent. May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Crop Products: Diatomaceous Earth

SILICE PH Polvo (adh-16259) ◆
May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Crop Products: Fertilizers and Soil Amendments, Blended

AMINOGANIC K30 Fertilizante Orgánico Líquido (adh-14461)

AMINOGANIC Ca Fertilizante Orgánico Líquido (adh-14463)

RADIKO AA FERTILIZANTE ORGÁNICO LÍQUIDO (adh-14677)

Crop Products: Fertilizers, Blended with micronutrients, Zinc Products

AMINOGANIC Zn Fertilizante Orgánico Líquido (adh-14459) ◆
Micronutrient deficiency must be documented by soil or tissue testing or other documented and verifiable method as approved by a certifying agent. Must not be used as an herbicide, defoliant or desiccant. Refer to specific ingredient categories for applicable use restrictions.

Crop Products: Fertilizers, Blended with synthetic magnesium sulfate

AMINOGANIC Mg Fertilizante Orgánico Líquido (adh-14460) ◆
May be used as a plant or soil amendment if soil deficiency of magnesium is documented by testing.

Crop Products: Humic Acids – alkali extracted

ULTRAHUMI FERTILIZANTE ORGÁNICO LÍQUIDO (adh-1622)

Crop Products: Microbial Inoculants

NITROFIX COMPLEX® INOCULANTE BIOLÓGICO LÍQUIDO (adh-13134)

Crop Products: Adjuvants, for use in crop pesticides

Altiara AdiGuard Dispersante-Adherente-Surfactante Penetrante/Líquido Miscible (avc-7723) ◆
For use as an inert ingredient in combination with permitted active pesticidal ingredients. May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Altiara pH Orgánic Sales de ácidos orgánicos policarboxílicos Regulador de pH y Dureza del aqua / Líquido (avc-7724) ◆
For use as an inert ingredient in combination with permitted active pesticidal ingredients. May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Altiara EcoFix Resina y Aceite de Pino Adherente / Concentrado Emulsionable (avc-12390) ◆
For use as an inert ingredient in combination with permitted active pesticidal ingredients. May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Altiara Maxi Acid Sales de ácidos orgánicos policarboxílicos Regulador de pH y Dureza del agua/Líquido (avc-13297) ◆
For use as an inert ingredient in combination with permitted active pesticidal ingredients. May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

ALTIARA CLARIÓN Surfactante de silicona Dispersante Penetrante Surfactante Líquido (avc-14649) ◆
For use as an inert ingredient in combination with permitted active pesticidal ingredients. May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

TENSUR MAX Surfactante de silicona • Dispersante • Penetrante • Surfactante Líquido (avc-18910) ◆
For use as an inert ingredient in combination with permitted active pesticidal ingredients. May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Altiara JOYA (avc-19584) ◆
For use as an inert ingredient in combination with permitted active pesticidal ingredients. May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Crop Products: Aquatic Plant Products

Crop Products: Adjuvants, for use in crop pesticides

ADHEL phosphoric acid AGRICULTURAL ADJUVANT / CONCENTRATED SOLUTION (anm-16511) ◆
For use as an inert ingredient in combination with permitted active pesticidal ingredients. May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

COVERFILM Agricultural Adjuvant/Liquid (anm-17213) ◆
For use as an inert ingredient in combination with permitted active pesticidal ingredients. May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Crop Products: Botanical Pesticides

BioDragon BIOTANIC Extract of gobernadora (Larrea tridentata) BOTANICAL FUNGICIDE/EMULSIFIABLE CONCENTRATE (anm-17410) ◆
May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

BioDragon KAUZAR Broad Spectrum Organic Insecticide/Soluble Liquid (anm-18489) ◆
May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

VIDRA Ardyan Organic Fungicide/Soluble Liquid (anm-18713) ◆
May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

BioDragon HAKU Organic Acaricide/Emulsifiable Liquid (anm-18746) ◆
May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Crop Products: Elemental Sulfur

BioDragon FUNGYLIFE Elemental Sulfur Fungicide and Miticide / Concentrate Fine Grain (anm-17944) ◆
For use as plant disease control, or as an insecticide (including acaricide or mite control). For use as slug and snail bait. May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Crop Products: Fungicides

BioDragon BURHAN Organic Microbial Fungicide/Emulsifiable Liquid (anm-18819) ◆
When used pre-harvest, may only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices. When used in post-harvest handling of raw agricultural commodities, not subject to the requirements of 205.206(e).

Crop Products: Growth Regulators for Plants

VIDRA Levat Biofertilizer - Nitrogen Contributor/Liquid (anm-18714) ◆
May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

VIDRA Ryu Bio-Regulator Organic Root Promotor/Liquid (anm-18715) ◆
May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Crop Products: Microbial Pesticides

VIDRA Yasonte Broad Spectrum Microbial Fungicide for Root Diseases Soluble Liquid (anm-18818) ◆
May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

VIDRA Nematrix Broad Spectrum Biological Nematicide/Soluble Liquid (anm-18820) ◆
May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Vidra KRESTON Bactericidal resistance inducer - Bio bactericide Soluble Liquid (anm-20073) ◆
May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Crop Products: Aquatic Plant Products, synthetically extracted

SEAWEED 3 BIOESTIMULANTE LIQUIDO (anv-16766)

Crop Products: Botanical Pesticides

Agronuve innovando valor CHALEP DEFENSE insecticida (anv-8411) ◆
May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

PYRESTOP Insecticida (anv-17983) ◆
May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Crop Products: Copper Products, Fertilizers, Blended with micronutrients, Iron Products, Manganese Products, Zinc Products

Agronuve innovando valor BIOAMIN PLUS Elicitor Vegetal (anv-11689) ◆
Refer to specific ingredient categories for applicable use restrictions. Micronutrient deficiency must be documented by soil or tissue testing or other documented and verifiable method as approved by a certifying agent. Must not be used as an herbicide, defoliant or desiccant.

Crop Products: Copper Sulfate

Agronuve Cu-Protech Fungicida/Bactercida (anv-7635) ◆
For plant disease control, must be used in a manner that minimizes accumulation of copper in the soil. For use as an algicide in aquatic rice systems and for tadpole shrimp control in aquatic rice systems, must not exceed one application per field during any 24-month period. Application rates are limited to those which do not increase baseline soil test values for copper over a time frame agreed upon by the producer and accredited certifying agent. May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Crop Products: Fungicides

Agronuve innovando valor BOTRIMIL Fungicida (anv-8309) ◆
When used pre-harvest, may only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices. When used in post-harvest handling of raw agricultural commodities, not subject to the requirements of 205.206(e).

Crop Products: Humic Acids – alkali extracted

SOIL CARBON Mejorador de Suelos (anv-16129)

Crop Products: Iron Products, Magnesium Sulfate – Allowed With Restrictions, Manganese Products, Microbial Products – Allowed With Restrictions, Zinc Products

Biosphere Soil Inoculante Promotor de Crecimiento (anv-15288) ◆
Micronutrient deficiency must be documented by soil or tissue testing or other documented and verifiable method as approved by a certifying agent. Must not be used as an herbicide, defoliant or desiccant. May be used as a plant or soil amendment if soil deficiency of magnesium is documented by testing. Refer to specific ingredient categories for applicable use restrictions.

Crop Products: Microbial Inoculants

Viable MAI BIOFERTILIZANTE E INOCULANTE LÍQUIDO (anv-17732)

Crop Products: Microbial Pesticides

Agronuve innovando valor NOT FUNGUS Fungicida/Nematicida (anv-8258) ◆
May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Crop Products: Potassium Silicate, aqueous

Agronuve Sili-K Insecticida/Fungicida (anv-6803) ◆
For use as plant disease control, or as an insecticide (including acaricide or mite control). May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Crop Products: Adjuvants, for use in crop pesticides

Soya-Plus Aceite de Soya Coadyuvante/Adherente (adu-11983) ◆
For use as an inert ingredient in combination with permitted active pesticidal ingredients. May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

SOYA-GOLD Aceite de Soya Coadyuvante/Atrayente (adu-16806) ◆
For use as an inert ingredient in combination with permitted active pesticidal ingredients. May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Crop Products: Botanical Pesticides

SOYA ALLIUM PLUS COADYUVANTE ACARICIDA ORGANICO (adu-13941) ◆
May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

SOYA CAPSICUM PLUS COADYUVANTE ACARICIDA ORGANICO (adu-13943) ◆
May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Crop Products: Calcium Polysulfide

CALDO SULFOCÁLCICO POLISULFURO DE CALCIO Insecticida y Fungicida Organico (adu-16804) ◆
For use as plant disease control, or as an insecticide (including acaricide or mite control). May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Crop Products: Diatomaceous Earth

Tierras Diatomeas Algas Fosilizadas (adu-11985) ◆
May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Crop Products: Oils, Horticultural

Gama-Plus Citrolina Emulsificada Coadyuvante, humectante (adu-12134) ◆
For use as an insecticide (including acaricide or mite control) and for plant disease control as dormant, suffocating, and stylet (summer) sprays. May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

CITRO GOLD Citrolina Coadyuvante / Atrayente (adu-16805) ◆
For use as an insecticide (including acaricide or mite control) and for plant disease control as dormant, suffocating, and stylet (summer) sprays. May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Crop Products: Soap

Bio-K Plus Sales Potásicas de Ácidos Grasos Coadyuvante (adu-11984) ◆
For use as an algicide/demosser, herbicide or insecticide. When used as an herbicide may only be used for farmstead maintenance (roadways, ditches, right of ways, building perimeters) and ornamental crops. May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Oxicu Max oxicloruro de cobre fungicida polvo humectable (aes-6502) ◆
For plant disease control. Must be used in a manner that minimizes copper accumulation in the soil and shall not be used as herbicides. May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Hidrocu Max Hidróxido cúprico fungicida gránulos dispersables (aes-6503) ◆
For plant disease control. Must be used in a manner that minimizes copper accumulation in the soil and shall not be used as herbicides. May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

COPper GREEN HB oxicloruro de cobre fungicida gránulos dispersables (aes-8189) ◆
For plant disease control. Must be used in a manner that minimizes copper accumulation in the soil and shall not be used as herbicides. May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Blue Shield 20 DF HB hidróxido cúprico fungicida gránulos dispersables (aes-8651) ◆
For plant disease control. Must be used in a manner that minimizes copper accumulation in the soil and shall not be used as herbicides. May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Albaugh Blue Shield 20 WG Bactericida, Fungicida - Inorgánico Metallic Copper (aes-8652) ◆
For plant disease control. Must be used in a manner that minimizes copper accumulation in the soil and shall not be used as herbicides. May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Copernico HB hidróxido cúprico fungicida gránulos dispersables (aes-8653) ◆
For plant disease control. Must be used in a manner that minimizes copper accumulation in the soil and shall not be used as herbicides. May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Star Hidro HB 20 DF hidróxido cúprico Fungicida/Gránulos dispersables (aes-8654) ◆
For plant disease control. Must be used in a manner that minimizes copper accumulation in the soil and shall not be used as herbicides. May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Albaugh COPper GREEN 25 WG Bactericida, Fungicida - Inorgánico Cobre Metalico (aes-8909) ◆
For plant disease control. Must be used in a manner that minimizes copper accumulation in the soil and shall not be used as herbicides. May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Green Shield HB oxicloruro de cobre fungicida granulos dispersables (aes-15247) ◆
For plant disease control. Must be used in a manner that minimizes copper accumulation in the soil and shall not be used as herbicides. May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

NUCOP MAX Hidróxido Cúprico Fungicida Gránulos Dispersables (aes-15373) ◆
For plant disease control. Must be used in a manner that minimizes copper accumulation in the soil and shall not be used as herbicides. May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

COC MAX Oxicloruro De Cobre Fungicida Polvo Humectable (aes-15374) ◆
For plant disease control. Must be used in a manner that minimizes copper accumulation in the soil and shall not be used as herbicides. May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Copper Green 25 WG, Fungicida Agrícola, Gránulos Dispersables (WG) (aes-18288) ◆
For plant disease control. Must be used in a manner that minimizes copper accumulation in the soil and shall not be used as herbicides. May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

HiBio OX oxicloruro de cobre fungicida/gránulos dispersables (aes-18454) ◆
For plant disease control. Must be used in a manner that minimizes copper accumulation in the soil and shall not be used as herbicides. May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

HiBio HI 20 WG Hidróxido cúprico fungicida/gránulos dispersables (aes-18455) ◆
For plant disease control. Must be used in a manner that minimizes copper accumulation in the soil and shall not be used as herbicides. May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

HiBio BLUE SHIELD 20 WG hidróxido cúprico fungicida/ gránulos dispersables (aes-18456) ◆
For plant disease control. Must be used in a manner that minimizes copper accumulation in the soil and shall not be used as herbicides. May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

HiBio COPPER GREEN oxicloruro de cobre fungicida/gránulos dispersables (aes-18457) ◆
For plant disease control. Must be used in a manner that minimizes copper accumulation in the soil and shall not be used as herbicides. May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

LOTUS Fungicida Agrícola Gránulos Dispersables - WG (aes-19256) ◆
For plant disease control. Must be used in a manner that minimizes copper accumulation in the soil and shall not be used as herbicides. May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Crop Products: Elemental Sulfur

RESOLVE 80 WG (aes-18914) ◆
For use as plant disease control, or as an insecticide (including acaricide or mite control). For use as slug and snail bait. May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Crop Products: Amino Acids

BIOST Organic VPH 9.0 Seed Treatment 5-0-0 (alb-8700) ■

Crop Products: Copper Sulfate

Basic Copper 53 (alb-0048) ◆
For plant disease control, must be used in a manner that minimizes accumulation of copper in the soil. For use as an algicide in aquatic rice systems and for tadpole shrimp control in aquatic rice systems, must not exceed one application per field during any 24-month period. Application rates are limited to those which do not increase baseline soil test values for copper over a time frame agreed upon by the producer and accredited certifying agent. May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Crop Products: Coppers, fixed

Nu-Cop 50 WP Agricultural Fungicide/Bactericide (alb-4253) ◆
For plant disease control. Must be used in a manner that minimizes copper accumulation in the soil and shall not be used as herbicides. May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Agri Star® COC WP Copper Oxychloride Agricultural Fungicide (alb-0049) ◆
For plant disease control. Must be used in a manner that minimizes copper accumulation in the soil and shall not be used as herbicides. May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Nu-Cop® 50DF Fungicide/Bactericide (alb-2558) ◆
For plant disease control. Must be used in a manner that minimizes copper accumulation in the soil and shall not be used as herbicides. May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Nu-Cop® HB Fungicide/Bactericide (alb-2993) ◆
For plant disease control. Must be used in a manner that minimizes copper accumulation in the soil and shall not be used as herbicides. May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Copper Hydroxide 20% DF Fungicide/Bactericide (alb-3940) ◆
For plant disease control. Must be used in a manner that minimizes copper accumulation in the soil and shall not be used as herbicides. May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Nu-Cop 30 HB Fungicide/Bactericide (alb-6644) ◆
For plant disease control. Must be used in a manner that minimizes copper accumulation in the soil and shall not be used as herbicides. May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Copper Hydroxide MUP Fungicide/Bactericide (alb-14235) ◆
For plant disease control. Must be used in a manner that minimizes copper accumulation in the soil and shall not be used as herbicides. May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Crop Products: Microbial Pesticides

Agri Star Crescendo (alb-15938) ◆
May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Crop Products: Microbial Products

BIOST Insecticide 100 Biological Insecticide (alb-8698) ◆
May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

BIOST Nematicide 100 Biological Nematicide (alb-8699) ◆
May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Crop Products: Boron Products, Calcium Chloride, Fertilizers, Blended with micronutrients

Balchem Metalosate Calcium Boron Amino Acid Complex Soluble Powder Foliar Fertilizer with Boron (abl-6047) ◆
For use as a foliar spray to treat a physiological disorder associated with calcium uptake. Micronutrient deficiency must be documented by soil or tissue testing or other documented and verifiable method as approved by a certifying agent. Must not be used as an herbicide, defoliant or desiccant. Refer to specific ingredient categories for applicable use restrictions.

Crop Products: Calcium Chloride

Balchem Metalosate Calcium Amino Acid Complex Soluble Powder Foliar Fertilizer (abl-6048) ◆
For use as a foliar spray to treat a physiological disorder associated with calcium uptake.

Crop Products: Calcium Chloride, Copper Products, Fertilizers, Blended with micronutrients, Iron Products, Magnesium Sulfate – Allowed With Restrictions, Manganese Products, Zinc Products

Balchem Metalosate Multimineral Amino Acid Complex Soluble Powder Foliar Fertilizer 4-0-0 (abl-6076) ◆
For use as a foliar spray to treat a physiological disorder associated with calcium uptake. May be used as a plant or soil amendment if soil deficiency of magnesium is documented by testing. Micronutrient deficiency must be documented by soil or tissue testing or other documented and verifiable method as approved by a certifying agent. Must not be used as an herbicide, defoliant or desiccant. Refer to specific ingredient categories for applicable use restrictions.

Crop Products: Calcium Chloride, Fertilizers and Soil Amendments, Blended – Allowed With Restrictions

balchem Metalosate CaK 3.5-0-17 Amino Acid Complex Soluble Powder Foliar Fertilizer (abl-18799) ◆
For use as a foliar spray to treat a physiological disorder associated with calcium uptake. Refer to specific ingredient categories for applicable use restrictions.

Crop Products: Copper Products, Fertilizers and Soil Amendments, Blended – Allowed With Restrictions, Fertilizers, Blended with micronutrients, Fertilizers, Blended with synthetic magnesium sulfate, Iron Products, Manganese Products, Zinc Products

balchem Metalosate StimPlus Amino Acid Complex Soluble Powder Foliar Fertilizer (abl-18797) ◆
Refer to specific ingredient categories for applicable use restrictions. May be used as a plant or soil amendment if soil deficiency of magnesium is documented by testing. Micronutrient deficiency must be documented by soil or tissue testing or other documented and verifiable method as approved by a certifying agent. Must not be used as an herbicide, defoliant or desiccant. Refer to specific ingredient categories for applicable use restrictions.

Crop Products: Copper Products, Fertilizers, Blended with micronutrients

Balchem Metalosate Copper Amino Acid Complex Soluble Powder Foliar Fertilizer (abl-6049) ◆
Refer to specific ingredient categories for applicable use restrictions. Micronutrient deficiency must be documented by soil or tissue testing or other documented and verifiable method as approved by a certifying agent. Must not be used as an herbicide, defoliant or desiccant.

Crop Products: Copper Products, Fertilizers, Blended with micronutrients, Fertilizers, Blended with synthetic magnesium sulfate, Iron Products, Manganese Products, Zinc Products

Balchem Metalosate Crop-Up Amino Acid Complex Soluble Powder Foliar Fertilizer (abl-8402) ◆
May be used as a plant or soil amendment if soil deficiency of magnesium is documented by testing. Micronutrient deficiency must be documented by soil or tissue testing or other documented and verifiable method as approved by a certifying agent. Must not be used as an herbicide, defoliant or desiccant. Refer to specific ingredient categories for applicable use restrictions.

Crop Products: Fertilizers and Soil Amendments, Blended

Balchem Metalosate Potassium 3-0-35 Soluble Powder Foliar Fertilizer (abl-10427)

Crop Products: Fertilizers, Blended with micronutrients, Iron Products

Balchem Metalosate Iron Amino Acid Complex Soluble Powder Foliar Fertilizer (abl-6050) ◆
Micronutrient deficiency must be documented by soil or tissue testing or other documented and verifiable method as approved by a certifying agent. Must not be used as an herbicide, defoliant or desiccant. Refer to specific ingredient categories for applicable use restrictions.

Crop Products: Fertilizers, Blended with micronutrients, Iron Products, Manganese Products, Zinc Products

Balchem Metalosate ZMI Amino Acid Complex Soluble Powder Foliar Fertilizer (abl-18798) ◆
Refer to specific ingredient categories for applicable use restrictions. Micronutrient deficiency must be documented by soil or tissue testing or other documented and verifiable method as approved by a certifying agent. Must not be used as an herbicide, defoliant or desiccant.

Crop Products: Fertilizers, Blended with micronutrients, Manganese Products

Balchem Metalosate Manganese Amino Acid Complex Soluble Powder Foliar Fertilizer (abl-6051) ◆
Refer to specific ingredient categories for applicable use restrictions. Micronutrient deficiency must be documented by soil or tissue testing or other documented and verifiable method as approved by a certifying agent. Must not be used as an herbicide, defoliant or desiccant.

Crop Products: Fertilizers, Blended with micronutrients, Zinc Products

Balchem Metalosate Zinc Amino Acid Complex Soluble Powder Foliar Fertilizer (abl-6052) ◆
Refer to specific ingredient categories for applicable use restrictions. Micronutrient deficiency must be documented by soil or tissue testing or other documented and verifiable method as approved by a certifying agent. Must not be used as an herbicide, defoliant or desiccant.

Crop Products: Fertilizers, Blended with synthetic magnesium sulfate

Balchem Metalosate Magnesium Amino Acid Complex Soluble Powder Foliar Fertilizer (abl-6075) ◆
May be used as a plant or soil amendment if soil deficiency of magnesium is documented by testing.

Crop Products: Hydrogen Peroxide

AP Pera-5 (Antimicrobial Solution) (alq-16663) ◆
For use as a plant disease control or as an algicide. May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Crop Products: Peracetic Acid/Peroxyacetic Acid

AP Pera-15 (Antimicrobial Solution) (alq-16664) ◆
For disinfecting facility, processing equipment, seed and asexually propagated planting material.

Processing Products: Chlorine Materials

Algonquin Products Co. Chlor San Concentrated Chlorine Sanitizer (alq-15441) ◆
May be used in direct contact with post-harvest crop or food at levels approved by the FDA or the EPA for such a purpose. Such use must include a final rinse and residual chlorine levels in final rinse water shall not exceed the Maximum Residual Disinfectant Limit under the Safe Drinking Water Act, except that a final rinse is not required for use in FSIS inspected egg breaking facilities. When used as disinfectants and sanitizers for food contact surfaces, may be used up to maximum labeled rates and rinsing is not required unless mandated by the label use directions. May be used up to maximum labeled rates for disinfecting and sanitizing equipment or tools. No intervening event is necessary before equipment is used in organic production.

Processing Products: Egg Wash

Algonquin EW Boost (alq-11618)

Processing Products: Peracetic Acid/Peroxyacetic Acid

AP Pera-22 (Antimicrobial Solution) (alq-16665) ◆
May be used as a sanitizer on food contact surfaces. Use in wash and/or rinse water must comply with FDA limitations.

AP Meat & Poultry Wash (Antimicrobial Solution) For Meat, Poultry, Seafood, and Produce (alq-16666) ◆
May be used as a sanitizer on food contact surfaces. Use in wash and/or rinse water must comply with FDA limitations.

Processing Products: Acid Activators for Chlorine Dioxide

AM Chemistry DIOXAM P2 (amv-17953) ◆
Must only be used for the generation of chlorine dioxide. Use of resulting chlorine dioxide must comply with 205.605(b).

Processing Products: Chlorine Dioxide

AM Chemistry DIOXAM P1 (amv-17954) ◆
May be used in direct contact with post-harvest crop or food at levels approved by the FDA or the EPA for such a purpose. Such use must include a final rinse and residual chlorine levels in final rinse water shall not exceed the Maximum Residual Disinfectant Limit under the Safe Drinking Water Act, except that a final rinse is not required for use in FSIS inspected egg breaking facilities. When used as disinfectants and sanitizers for food contact surfaces, may be used up to maximum labeled rates and rinsing is not required unless mandated by the label use directions. May be used up to maximum labeled rates for disinfecting and sanitizing equipment or tools. No intervening event is necessary before equipment is used in organic production.

Crop Products: Adjuvants, for use in fertilizers and soil amendments

Factor Coloidal Eko Coadyuvante Agrícola/Líquido (arv-11660)

Crop Products: Aquatic Plant Products, synthetically extracted

Nautilus Fertilizante Organico/Liquido (arv-4792)

Crop Products: Botanical Pesticides

Tundra Fungicida/Liquido (arv-5175) ◆
May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Crop Products: Calcium Polysulfide

Ambios XPR Fungicida/Liquido (arv-8172) ◆
For use as plant disease control, or as an insecticide (including acaricide or mite control). May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Crop Products: Coppers, fixed

Bactrix Fungicida - Bactericida/Liquido (arv-5174) ◆
For plant disease control. Must be used in a manner that minimizes copper accumulation in the soil and shall not be used as herbicides. May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Crop Products: Fertilizers and Soil Amendments, Blended

Super Engorde Bio Fertilizante Orgánico/ Líquido (arv-16233)

Crop Products: Fertilizers, Blended with uncomposted manure

AgriBat Fertilizante Organico/Liquido (arv-4967) ◆
May only be (i) applied to land used for a crop not intended for human consumption; (ii) incorporated into the soil not less than 120 days prior to the harvest of a product whose edible portion has direct contact with the soil surface or soil particles; or (iii) incorporated into the soil not less than 90 days prior to the harvest of a product whose edible portion does not have direct contact with the soil surface or soil particles.

Crop Products: Microbial Inoculants

Arvensis Voltan Inoculante/Polvo (arv-6348)

Crop Products: Microbial Pesticides

Arvensis Kastelo Nematicida/Polvo (arv-6428) ◆
May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Arvensis Apolo Fungicida/Polvo (arv-6645) ◆
May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

FOGONERO Insecticida Biológico/Líquido (arv-14790) ◆
May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Crop Products: Nematicides

Majesty Nematicida Orgánico/Líquido (arv-5195) ◆
May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Livestock Products: Acid Activators for Chlorine Dioxide

B Bactersan CD2 (Sodium bisulfate) (bat-10561) ◆
Chlorine products may be used up to maximum labeled rates for disinfecting and sanitizing equipment or tools (including dairy pipelines and tanks). Residual chlorine levels in the water in direct contact with food products or animals shall not exceed the maximum residual disinfectant limit under the Safe Drinking Water Act (4 mg/L (4ppm) expressed as chlorine, 0.8 mg/L (0.8 ppm) expressed as chlorine dioxide). May be used up to maximum labeled rates for sanitizing equipment or tools. Label instructions should be followed regarding requirements for rinsing or not rinsing prior to the equipment's next use. Must only be used for the generation of chlorine dioxide. Use of resulting chlorine dioxide must comply with 205.603(a)(10)(ii).

Livestock Products: Chlorine Dioxide

B Bactersan CD1 (Sodium chlorite) (bat-10560) ◆
Chlorine products may be used up to maximum labeled rates for disinfecting and sanitizing equipment or tools (including dairy pipelines and tanks). Residual chlorine levels in the water in direct contact with food products or animals shall not exceed the maximum residual disinfectant limit under the Safe Drinking Water Act (4 mg/L (4ppm) expressed as chlorine, 0.8 mg/L (0.8 ppm) expressed as chlorine dioxide). May be used up to maximum labeled rates for sanitizing equipment or tools. Label instructions should be followed regarding requirements for rinsing or not rinsing prior to the equipment's next use.

Processing Products: Acid Activators for Chlorine Dioxide

B Bactersan CD2 (Sodium bisulfate) (bat-10366) ◆
Must only be used for the generation of chlorine dioxide. Use of resulting chlorine dioxide must comply with 205.605(b).

Processing Products: Chlorine Dioxide

B Bactersan CD1 (Sodium chlorite) (bat-10364) ◆
May be used in direct contact with post-harvest crop or food at levels approved by the FDA or the EPA for such a purpose. Such use must include a final rinse and residual chlorine levels in final rinse water shall not exceed the Maximum Residual Disinfectant Limit under the Safe Drinking Water Act, except that a final rinse is not required for use in FSIS inspected egg breaking facilities. When used as disinfectants and sanitizers for food contact surfaces, may be used up to maximum labeled rates and rinsing is not required unless mandated by the label use directions. May be used up to maximum labeled rates for disinfecting and sanitizing equipment or tools. No intervening event is necessary before equipment is used in organic production.

Crop Products: Boron Products

Phyto-Plus® Brand Boron 3.0% (bai-9570) ◆
Micronutrient deficiency must be documented by soil or tissue testing or other documented and verifiable method as approved by a certifying agent. Must not be used as an herbicide, defoliant or desiccant.

Crop Products: Boron Products, Copper Products, Fertilizers, Blended with micronutrients, Iron Products, Manganese Products, Sodium Nitrate (Chilean Nitrate), Zinc Products

Phyto-Plus® Brand Micro-Plenty 2-0-1 (bai-9573) ◆
This product contains highly soluble nitrogen and must be applied in a manner that does not contribute to the contamination of crops, soil or water. Its use must be part of an organic system plan that maintains or improves the natural resources of the operation, including soil and water quality, and comply with crop nutrient and soil fertility requirements. Refer to specific ingredient categories for applicable use restrictions. Micronutrient deficiency must be documented by soil or tissue testing or other documented and verifiable method as approved by a certifying agent. Must not be used as an herbicide, defoliant or desiccant.

Crop Products: Calcium Chloride

Phyto-Plus® Brand Calcium 5.0% (bai-9993) ◆
For use as a foliar spray to treat a physiological disorder associated with calcium uptake.

Crop Products: Iron Products

Phyto-Plus® Brand Iron 5.0% (bai-9569) ◆
Micronutrient deficiency must be documented by soil or tissue testing or other documented and verifiable method as approved by a certifying agent. Must not be used as an herbicide, defoliant or desiccant.

Crop Products: Lignin Sulfonates

Phyto-Plus® Brand Plant Stimulator 0-0-1 (bai-9575) ◆
For use as a chelating agent or dust suppressant.

Crop Products: Magnesium Sulfate – Allowed With Restrictions

Phyto-Plus® Brand Magnesium 2.5% (bai-9571) ◆
May be used as a plant or soil amendment if soil deficiency of magnesium is documented by testing.

Crop Products: Manganese Products

Phyto-Plus® Brand Manganese 5.0% (bai-9567) ◆
Micronutrient deficiency must be documented by soil or tissue testing or other documented and verifiable method as approved by a certifying agent. Must not be used as an herbicide, defoliant or desiccant.

Crop Products: Wetting Agents

Phyto-Plus® Brand Foliar Friend (bai-9574)

Crop Products: Zinc Products

Phyto-Plus® Brand Zinc 5.0% (bai-8025) ◆
Micronutrient deficiency must be documented by soil or tissue testing or other documented and verifiable method as approved by a certifying agent. Must not be used as an herbicide, defoliant or desiccant.

BASF Pluronic P 105 (bsf-14637) ◆
For use as an inert ingredient in combination with permitted active pesticidal ingredients. May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

BASF Tamol® NH 7519 (bsf-16031) ◆
For use as an inert ingredient in combination with permitted active pesticidal ingredients. May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

BASF Vultamol® NH 7519 (bsf-16032) ◆
For use as an inert ingredient in combination with permitted active pesticidal ingredients. May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

BASF Agnique® BioHance 100 (bsf-18300) ◆
For use as an inert ingredient in combination with permitted active pesticidal ingredients. May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

BASF Agnique SBO 10 (bsf-19537) ◆
For use as an inert ingredient in combination with permitted active pesticidal ingredients. May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

BASF Agnique SMO-20-U (6900) (bsf-19539) ◆
For use as an inert ingredient in combination with permitted active pesticidal ingredients. May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

BASF Agnique FOH 90C-5 (bsf-19541) ◆
For use as an inert ingredient in combination with permitted active pesticidal ingredients. May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

BASF Agnique CSO-36 Ethox Castor Oil (bsf-19543) ◆
For use as an inert ingredient in combination with permitted active pesticidal ingredients. May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Crop Products: Boric Acid

MotherEarth Granular Scatter Bait (bsf-5719) ◆
May be used as an insecticide for structural pest control provided there is no direct contact with organic food or crops. May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Crop Products: Inoculants

BASF Vault® NP Liquid Inoculant for Soybeans (bsf-0399)

BASF Nodulator® Liquid Inoculant for Pea and Lentil (bsf-0713)

Crop Products: Microbial Products

Serifel Biofungicide (bsf-6102) ◆
May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

BASF Subtilex® NG Biological Fungicide (bsf-8963) ◆
May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Serifel NG Biological Fungicide (bsf-12305) ◆
May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

BASF Serifel M Biofungicide Wettable Powder (bsf-19233) ◆
May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Crop Products: Oils, Horticultural

Ultra Pure Oil Horticultural Insecticide, Miticide and Fungicide (bsf-12653) ◆
For use as an insecticide (including acaricide or mite control) and for plant disease control as dormant, suffocating, and stylet (summer) sprays. May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Livestock Products: Excipients

BASF Pluronic® P 105 (bsf-17134) ◆
For use as an excipient in combination with permitted active health care ingredients.

Crop Products: Calcium Chloride

NUTRINATIVA Calcio Fertilizante Foliar (bav-16354) ◆
For use as a foliar spray to treat a physiological disorder associated with calcium uptake.

Crop Products: Magnesium Sulfate – Allowed With Restrictions

NUTRINATIVA@ Multimineral Fertilizante Foliar (bav-16360) ◆
May be used as a plant or soil amendment if soil deficiency of magnesium is documented by testing.

Crop Products: Manganese Products

NUTRINATIVA Manganeso Fertilizante Foliar (bav-16358) ◆
Micronutrient deficiency must be documented by soil or tissue testing or other documented and verifiable method as approved by a certifying agent. Must not be used as an herbicide, defoliant or desiccant.

Crop Products: Microbial Inoculants

Bio Insumos nativa Centeon Max Biological Inoculant (WP) (bav-18409)

BIO-ELEVATE Nutrient Solubilizer (WP) (bav-18429)

Crop Products: Microbial Pesticides

Futron 3.0 WP Fungicida - Bactericida Microbiológico (bav-14539) ◆
May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Nacillus Pro Bactericida - Fungicida Biologico Polvo Mojable (WP) (bav-16265) ◆
May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Crop Products: Copper Products

Biologa® Conat® (bla-13322) ◆
Micronutrient deficiency must be documented by soil or tissue testing or other documented and verifiable method as approved by a certifying agent. Must not be used as an herbicide, defoliant or desiccant.

Biologa® BTX44SC (bla-13638) ◆
Micronutrient deficiency must be documented by soil or tissue testing or other documented and verifiable method as approved by a certifying agent. Must not be used as an herbicide, defoliant or desiccant.

Biologa Masternat® (bla-18408) ◆
Micronutrient deficiency must be documented by soil or tissue testing or other documented and verifiable method as approved by a certifying agent. Must not be used as an herbicide, defoliant or desiccant.

Crop Products: Copper Sulfate

Biologa® Secadert® Sulfato de Cobre Pentahidratado Fungicida Suspensión Concentrada (bla-10581) ◆
For plant disease control, must be used in a manner that minimizes accumulation of copper in the soil. For use as an algicide in aquatic rice systems and for tadpole shrimp control in aquatic rice systems, must not exceed one application per field during any 24-month period. Application rates are limited to those which do not increase baseline soil test values for copper over a time frame agreed upon by the producer and accredited certifying agent. May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Crop Products: Copper Sulfate, Elemental Sulfur

Biologa® Secadert®-S (bla-16066) ◆
For plant disease control, must be used in a manner that minimizes accumulation of copper in the soil. For use as an algicide in aquatic rice systems and for tadpole shrimp control in aquatic rice systems, must not exceed one application per field during any 24-month period. Application rates are limited to those which do not increase baseline soil test values for copper over a time frame agreed upon by the producer and accredited certifying agent. May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices. For use as plant disease control, or as an insecticide (including acaricide or mite control). For use as slug and snail bait.

Crop Products: Coppers, fixed

Biologa BTX (bla-15030) ◆
For plant disease control. Must be used in a manner that minimizes copper accumulation in the soil and shall not be used as herbicides. May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

PRO DET VG (bar-15728) ◆
May be used in direct contact with post-harvest crop or food at levels approved by the FDA or the EPA for such a purpose. Such use must include a final rinse and residual chlorine levels in final rinse water shall not exceed the Maximum Residual Disinfectant Limit under the Safe Drinking Water Act, except that a final rinse is not required for use in FSIS inspected egg breaking facilities. When used as disinfectants and sanitizers for food contact surfaces, may be used up to maximum labeled rates and rinsing is not required unless mandated by the label use directions. May be used up to maximum labeled rates for disinfecting and sanitizing equipment or tools. No intervening event is necessary before equipment is used in organic production. If used for lye peeling of fruits or vegetables, may only be used for peeling peaches.

Processing Products: Peracetic Acid/Peroxyacetic Acid

PRO PERACETIC 15 (bar-14509) ◆

Crop Products: Chlorine Dioxide

Oxine Sanitizer/Disinfectant/Deodorizer (box-10699) ◆
Residual chlorine levels in the water in direct crop contact (when used pre-harvest) or as water from cleaning irrigation systems applied to the soil should not exceed the maximum residual disinfectant level under the Safe Drinking Water Act (4 mg/L (4ppm) expressed as chlorine, 0.8 mg/L (0.8 ppm) expressed as chlorine dioxide), except that chlorine products may be used in edible sprout production according to EPA label directions. May be used up to maximum labeled rates for disinfecting and sanitizing equipment or tools. No intervening event is necessary before equipment is used in contact with organic crops.

Livestock Products: Chlorine Dioxide

Oxine® Sanitizer Disinfectant Bacteriostat/Deodorizer Fungicidal-Bactericidal-Virucidal (box-2885) ◆
Chlorine products may be used up to maximum labeled rates for disinfecting and sanitizing equipment or tools (including dairy pipelines and tanks). Residual chlorine levels in the water in direct contact with food products or animals shall not exceed the maximum residual disinfectant limit under the Safe Drinking Water Act (4 mg/L (4ppm) expressed as chlorine, 0.8 mg/L (0.8 ppm) expressed as chlorine dioxide). May be used up to maximum labeled rates for sanitizing equipment or tools. Label instructions should be followed regarding requirements for rinsing or not rinsing prior to the equipment's next use.

ProOxine AH Sanitizer Disinfectant Fungicidal-Bactericidal-Virucidal (box-3657) ◆
Chlorine products may be used up to maximum labeled rates for disinfecting and sanitizing equipment or tools (including dairy pipelines and tanks). Residual chlorine levels in the water in direct contact with food products or animals shall not exceed the maximum residual disinfectant limit under the Safe Drinking Water Act (4 mg/L (4ppm) expressed as chlorine, 0.8 mg/L (0.8 ppm) expressed as chlorine dioxide). May be used up to maximum labeled rates for sanitizing equipment or tools. Label instructions should be followed regarding requirements for rinsing or not rinsing prior to the equipment's next use.

Processing Products: Acidified Sodium Chlorite

Keeper Professional Post Harvest (box-3346) ◆
For secondary direct antimicrobial food treatment and indirect food contact surface sanitizing. Acidified with citric acid only.

XG-940 (box-3347) ◆
For secondary direct antimicrobial food treatment and indirect food contact surface sanitizing. Acidified with citric acid only.

Keeper Post Harvest (box-3436) ◆
For secondary direct antimicrobial food treatment and indirect food contact surface sanitizing. Acidified with citric acid only.

Keeper Professional Red Meat (box-8762) ◆
For secondary direct antimicrobial food treatment and indirect food contact surface sanitizing. Acidified with citric acid only.

Keeper Red Meat (box-8763) ◆
For secondary direct antimicrobial food treatment and indirect food contact surface sanitizing. Acidified with citric acid only.

Processing Products: Chlorine Dioxide

OXINE® Sanitizer Bacteriostat/Deodorizer - Active Oxine- Disinfectant Fungicidal-Bactericidal (box-0075) ◆
May be used in direct contact with post-harvest crop or food at levels approved by the FDA or the EPA for such a purpose. Such use must include a final rinse and residual chlorine levels in final rinse water shall not exceed the Maximum Residual Disinfectant Limit under the Safe Drinking Water Act, except that a final rinse is not required for use in FSIS inspected egg breaking facilities. When used as disinfectants and sanitizers for food contact surfaces, may be used up to maximum labeled rates and rinsing is not required unless mandated by the label use directions. May be used up to maximum labeled rates for disinfecting and sanitizing equipment or tools. No intervening event is necessary before equipment is used in organic production.

ProOxine Sanitizer -Active ProOxine- Disinfectant Fungicidal-Bactericidal (box-0973) ◆
May be used in direct contact with post-harvest crop or food at levels approved by the FDA or the EPA for such a purpose. Such use must include a final rinse and residual chlorine levels in final rinse water shall not exceed the Maximum Residual Disinfectant Limit under the Safe Drinking Water Act, except that a final rinse is not required for use in FSIS inspected egg breaking facilities. When used as disinfectants and sanitizers for food contact surfaces, may be used up to maximum labeled rates and rinsing is not required unless mandated by the label use directions. May be used up to maximum labeled rates for disinfecting and sanitizing equipment or tools. No intervening event is necessary before equipment is used in organic production.

Purogene Chlorine Dioxide Sanitizer and Deodorizer (box-6601) ◆
May be used in direct contact with post-harvest crop or food at levels approved by the FDA or the EPA for such a purpose. Such use must include a final rinse and residual chlorine levels in final rinse water shall not exceed the Maximum Residual Disinfectant Limit under the Safe Drinking Water Act, except that a final rinse is not required for use in FSIS inspected egg breaking facilities. When used as disinfectants and sanitizers for food contact surfaces, may be used up to maximum labeled rates and rinsing is not required unless mandated by the label use directions. May be used up to maximum labeled rates for disinfecting and sanitizing equipment or tools. No intervening event is necessary before equipment is used in organic production.

Purogene Professional Potato Storage Antimicrobial Sanitizer Disinfectant Bactericidal Fungicidal (box-13142) ◆
May be used in direct contact with post-harvest crop or food at levels approved by the FDA or the EPA for such a purpose. Such use must include a final rinse and residual chlorine levels in final rinse water shall not exceed the Maximum Residual Disinfectant Limit under the Safe Drinking Water Act, except that a final rinse is not required for use in FSIS inspected egg breaking facilities. When used as disinfectants and sanitizers for food contact surfaces, may be used up to maximum labeled rates and rinsing is not required unless mandated by the label use directions. May be used up to maximum labeled rates for disinfecting and sanitizing equipment or tools. No intervening event is necessary before equipment is used in organic production.

Crop Products: Bacillus thuringiensis

Biokrone Bt krone Insecticide Wetting Powder (bik-16131) ◆
May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Crop Products: Biopesticides

Biokrone Baktillis® Fungicide Bacillus subtilis Concentrated suspension (bik-2756) ◆
May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Bac Ilia Bacillus subtilis Fungicida Microbiológico Suspensión concentrada (bik-11070) ◆
May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Crop Products: Botanical Pesticides

Biokrone Capsikron® Allicin and Capsaicin Botanical insecticide Emulsifiable concentrate (bik-7395) ◆
May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Biokrone Cinanim Insecticida/Acaricida Concentrado Emulsionable (bik-17592) ◆
May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Biokrone Comandante Bactericida/Fungicida Concentrado Emulsionable (bik-17593) ◆
May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Crop Products: Garlic

Biokrone Ajick® Garlic extract (Allium sativum) Botanical Repellent/Aqueous Solution (bik-2615) ◆
May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Biokrone SWEET GARLIC Garlic extract (Allium sativum) Repellent botanical / Aqueous solution (bik-19084) ◆
May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Crop Products: Microbial Inoculants

Biokrone Glumix irrigation Inoculant Solid (bik-15644)

Glumix® micorriza Granulated Inoculant (bik-2570)

Biokrone Glumix Inoculant Dust (bik-14073)

Biokrone AZ Seed Inoculant Wetting Powder (bik-15266)

Crop Products: Microbial Products – Allowed With Restrictions, Molybdenum Products

Biokrone Biosser TS Inoculant Wettable Powder (bik-15203) ◆
Micronutrient deficiency must be documented by soil or tissue testing or other documented and verifiable method as approved by a certifying agent. Must not be used as an herbicide, defoliant or desiccant. Refer to specific ingredient categories for applicable use restrictions.

Biokrone ALTEZA Inoculant Wettable Powder (bik-18213) ◆
Micronutrient deficiency must be documented by soil or tissue testing or other documented and verifiable method as approved by a certifying agent. Must not be used as an herbicide, defoliant or desiccant. Refer to specific ingredient categories for applicable use restrictions.

Crop Products: Oils

Biokrone EPA 90® Botanical Insecticide Soybean Vegetable Oil (bik-2629) ◆
May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Crop Products: Pyrethrum

Biokrone Pirelium® Pyrethrins Liquid insecticide Emulsifiable concentrate (bik-7396) ◆
May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

PireKrone Pyrethrins Insecticide/Wettable Powder (bik-8741) ◆
May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Crop Products: Trichoderma spp.

Biokrone NatuControl Trichoderma harzianum Biological Fungicide Wettable Powder (bik-2306) ◆
May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

TrikoStar Trichoderma harzianum Fungicida biológico de Uso Agrícola / Polvo Humectable (bik-11071) ◆
May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

SaniDate WTO (bss-12913) ◆
For use as disinfectant or sanitizer, including irrigation system cleaner.

Crop Products: Hydrogen Peroxide Starting Materials

PerCarb (bss-8484) ◆
Must be mixed with water prior to use. Use of resulting hydrogen peroxide must comply with 205.601(a)(4) and 205.601(i)(5).

Crop Products: Microbial Inoculants

TerraGrow (bss-5931)

TerraGrow (2-0-6) (bss-15889)

Crop Products: Neem and Neem Derivatives

AzaGuard (bss-1943) ◆
May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Crop Products: Peracetic Acid/Peroxyacetic Acid

SaniDate 12.0 (bss-13782) ◆
For disinfecting facility, processing equipment, seed and asexually propagated planting material.

Crop Products: Soap, Ammonium

AXXE® Broad Spectrum Herbicide (bss-2930) ◆
For use as an algicide/demosser, herbicide or insecticide. When used as an herbicide may only be used for farmstead maintenance (roadways, ditches, right of ways, building perimeters) and ornamental crops. When used as animal repellant, may only be used as a large animal repellent and substance must not contact soil or edible portion of crop. May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Crop Products: Sodium Carbonate Peroxyhydrate

GreenCleanPRO Broad-Spectrum Algaecide, Fungicide and Bactericide (bss-2281) ◆
For use as an algicide. Federal law restricts the use of this substance in food crop production to approved food uses identified on the product label. May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

BioSafe Systems GreenClean Granular Algaecide (bss-13190) ◆
For use as an algicide. Federal law restricts the use of this substance in food crop production to approved food uses identified on the product label. May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Livestock Products: Neem

AzaGuard (bss-11996)

Livestock Products: Peracetic Acid/Peroxyacetic Acid

SaniDate 5.0 (bss-2333) ◆
For sanitizing facility and processing equipment.

Processing Products: Peracetic Acid/Peroxyacetic Acid

SaniDate 12.0 (bss-2086) ◆
May be used as a sanitizer on food contact surfaces. Use in wash and/or rinse water must comply with FDA limitations.

SaniDate 5.0 (bss-2087) ◆
May be used as a sanitizer on food contact surfaces. Use in wash and/or rinse water must comply with FDA limitations.

StorOx 2.0 Broad Spectrum Bactericide/Fungicide Disinfectant and Sanitizer (bss-2612) ◆
May be used as a sanitizer on food contact surfaces. Use in wash and/or rinse water must comply with FDA limitations.

SaniDateFD (bss-4550) ◆
May be used as a sanitizer on food contact surfaces. Use in wash and/or rinse water must comply with FDA limitations.

SaniDate 15.0 Sanitizer/Disinfectant (bss-6993) ◆
May be used as a sanitizer on food contact surfaces. Use in wash and/or rinse water must comply with FDA limitations.

Crop Products: Fertilizers and Soil Amendments, Blended

Branch Creek 4-4-4 Bio Performance Fertilizer for Organic Production (brc-20135)

Branch Creek 4-4-4 Bio Fine Performance Fertilizer for Organic Production (brc-20136)

Branch Creek 5-3-2 Bio Performance Fertilizer for Organic Production (brc-20137)

Branch Creek 5-3-2 Bio Fine Performance Fertilizer for Organic Production (brc-20138)

Branch Creek 7-2-1 Bio Performance Fertilizer for Organic Production (brc-20139)

Crop Products: Fertilizers, Blended with sodium nitrate

Branch Creek Liquid Organic Fertilizer 3-0-3-1 (brc-5926) ■◆
This product contains highly soluble nitrogen and must be applied in a manner that does not contribute to the contamination of crops, soil or water. Its use must be part of an organic system plan that maintains or improves the natural resources of the operation, including soil and water quality, and comply with crop nutrient and soil fertility requirements.

Crop Products: Humic Acids – alkali extracted

Branch Creek Paleo Early Earth Organics (brc-7682)

Crop Products: Microbial Inoculants

Branch Creek 4400 Colony Advanced Soil Probiotics (brc-8066)

Branch Creek Breakdown Colony Advanced Soil Probiotics (brc-8386)

Crop Products: Zinc Products

Branch Creek Biogrowth Enhanced Plant Nutrition (brc-8599) ◆
Micronutrient deficiency must be documented by soil or tissue testing or other documented and verifiable method as approved by a certifying agent. Must not be used as an herbicide, defoliant or desiccant.

Crop Products: Adjuvants, for use in crop pesticides

Brandt Organics SKH Sticker Extender (cle-5439) ◆
For use as an inert ingredient in combination with permitted active pesticidal ingredients. May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Brandt Organics EcoSpreader Organosilicone Surfactant (cle-6306) ◆
For use as an inert ingredient in combination with permitted active pesticidal ingredients. May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Brandt Organics Defoamer Antifoaming/Defoaming Agent (cle-6914) ◆
For use as an inert ingredient in combination with permitted active pesticidal ingredients. May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Brandt Super Wetter Wetting Agent•Spreader•Penetrant (cle-7194) ◆
For use as an inert ingredient in combination with permitted active pesticidal ingredients. May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Brandt 719 Spreader Penetrant Wetting Agent Spreader (cle-8202) ◆
For use as an inert ingredient in combination with permitted active pesticidal ingredients. May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Brandt A+ Spreader Activator Drift Reduction Agent (cle-13848) ◆
For use as an inert ingredient in combination with permitted active pesticidal ingredients. May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Crop Products: Boron Products

Brandt Boric Acid Micronutrient Supplement (cle-4355) ◆
Micronutrient deficiency must be documented by soil or tissue testing or other documented and verifiable method as approved by a certifying agent. Must not be used as an herbicide, defoliant or desiccant.

Brandt Organics 3% B Liquid Complexed Micronutrients (cle-13073) ◆
Micronutrient deficiency must be documented by soil or tissue testing or other documented and verifiable method as approved by a certifying agent. Must not be used as an herbicide, defoliant or desiccant.

Crop Products: Boron Products, Cobalt Products, Copper Products, Iron Products, Magnesium Sulfate – Allowed With Restrictions, Manganese Products, Molybdenum Products, Zinc Products

Brandt Organics Hort Mix Liquid Complexed Micronutrient (cle-11332) ◆
May be used as a plant or soil amendment if soil deficiency of magnesium is documented by testing. Micronutrient deficiency must be documented by soil or tissue testing or other documented and verifiable method as approved by a certifying agent. Must not be used as an herbicide, defoliant or desiccant.

Crop Products: Boron Products, Copper Products, Iron Products, Manganese Products, Zinc Products

Brandt Organics Tree & Vine Mix Liquid Complexed Micronutrients (cle-4476) ◆
Micronutrient deficiency must be documented by soil or tissue testing or other documented and verifiable method as approved by a certifying agent. Must not be used as an herbicide, defoliant or desiccant.

Brandt Tree & Vine Mix Fertilizante Inorgánico Líquido (cle-18598) ◆
Micronutrient deficiency must be documented by soil or tissue testing or other documented and verifiable method as approved by a certifying agent. Must not be used as an herbicide, defoliant or desiccant.

Crop Products: Boron Products, Copper Products, Magnesium Sulfate – Allowed With Restrictions

Brandt Organiplex 3% Mg Liquid Complexed Nutrients (cle-12529) ◆
Micronutrient deficiency must be documented by soil or tissue testing or other documented and verifiable method as approved by a certifying agent. Must not be used as an herbicide, defoliant or desiccant. May be used as a plant or soil amendment if soil deficiency of magnesium is documented by testing.

Brandt Organiplex Mg Fertilizante Líquido de Uso Foliar (cle-16752) ◆
Micronutrient deficiency must be documented by soil or tissue testing or other documented and verifiable method as approved by a certifying agent. Must not be used as an herbicide, defoliant or desiccant. May be used as a plant or soil amendment if soil deficiency of magnesium is documented by testing.

Crop Products: Boron Products, Copper Products, Manganese Products

Brandt Organiplex 4% Mn Liquid Complexed Nutrient (cle-12528) ◆
Micronutrient deficiency must be documented by soil or tissue testing or other documented and verifiable method as approved by a certifying agent. Must not be used as an herbicide, defoliant or desiccant.

Brandt Organiplex Mn Fertilizante Líquido de Uso Foliar (cle-16751) ◆
Micronutrient deficiency must be documented by soil or tissue testing or other documented and verifiable method as approved by a certifying agent. Must not be used as an herbicide, defoliant or desiccant.

BRANDT Organiplex Mn (cle-17515) ◆
Micronutrient deficiency must be documented by soil or tissue testing or other documented and verifiable method as approved by a certifying agent. Must not be used as an herbicide, defoliant or desiccant.

Brandt Flo-Plex 4% Mn Fertilizante Inorgánico Líquido (cle-18597) ◆
Micronutrient deficiency must be documented by soil or tissue testing or other documented and verifiable method as approved by a certifying agent. Must not be used as an herbicide, defoliant or desiccant.

Crop Products: Boron Products, Iron Products, Magnesium Sulfate – Allowed With Restrictions, Manganese Products, Zinc Products

Brandt Organiplex ProMix Liquid Complexed Micronutrients (cle-17022) ◆
May be used as a plant or soil amendment if soil deficiency of magnesium is documented by testing. Micronutrient deficiency must be documented by soil or tissue testing or other documented and verifiable method as approved by a certifying agent. Must not be used as an herbicide, defoliant or desiccant.

Crop Products: Botanical Pesticides

Brandt Ecotec Plus Broad Spectrum Insecticide and Miticide (cle-6983) ◆
May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Crop Products: Calcium Chloride

Brandt Organiplex 8% Ca Liquid Complexed Nutrient (cle-12360) ◆
For use as a foliar spray to treat a physiological disorder associated with calcium uptake.

Brandt Organics 6% Ca Liquid Complexed Micronutrients (cle-16006) ◆
For use as a foliar spray to treat a physiological disorder associated with calcium uptake.

Brandt Organiplex Ca Fertilizante Líquido de Uso Foliar (cle-16753) ◆
For use as a foliar spray to treat a physiological disorder associated with calcium uptake.

BRANDT Organiplex Ca (cle-17512) ◆
For use as a foliar spray to treat a physiological disorder associated with calcium uptake.

Crop Products: Calcium Polysulfide

Brandt Lime Sulfur Fungicide (cle-4574) ◆
For use as plant disease control, or as an insecticide (including acaricide or mite control). May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Crop Products: Copper Products

Brandt Organics 5% Cu Liquid Complexed Micronutrients (cle-4472) ◆
Micronutrient deficiency must be documented by soil or tissue testing or other documented and verifiable method as approved by a certifying agent. Must not be used as an herbicide, defoliant or desiccant.

Crop Products: Copper Sulfate

Brandt Drip-Rite 4000 Algaecide/Bactericide (cle-19023) ◆
For plant disease control, must be used in a manner that minimizes accumulation of copper in the soil. For use as an algicide in aquatic rice systems and for tadpole shrimp control in aquatic rice systems, must not exceed one application per field during any 24-month period. Application rates are limited to those which do not increase baseline soil test values for copper over a time frame agreed upon by the producer and accredited certifying agent. May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

BRANDT T.A.C. Algaecide/Bactericide (cle-19691) ◆
For plant disease control, must be used in a manner that minimizes accumulation of copper in the soil. For use as an algicide in aquatic rice systems and for tadpole shrimp control in aquatic rice systems, must not exceed one application per field during any 24-month period. Application rates are limited to those which do not increase baseline soil test values for copper over a time frame agreed upon by the producer and accredited certifying agent. May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Hye-Clean Slime Away Algaecide/Bactericide (cle-19692) ◆
For plant disease control, must be used in a manner that minimizes accumulation of copper in the soil. For use as an algicide in aquatic rice systems and for tadpole shrimp control in aquatic rice systems, must not exceed one application per field during any 24-month period. Application rates are limited to those which do not increase baseline soil test values for copper over a time frame agreed upon by the producer and accredited certifying agent. May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Agri-Valley Irrigation, LLC Micro Pro 4000 Algaecide/Bactericide (cle-19693) ◆
For plant disease control, must be used in a manner that minimizes accumulation of copper in the soil. For use as an algicide in aquatic rice systems and for tadpole shrimp control in aquatic rice systems, must not exceed one application per field during any 24-month period. Application rates are limited to those which do not increase baseline soil test values for copper over a time frame agreed upon by the producer and accredited certifying agent. May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Crop Products: Humates

Brandt Leonardite - Coarse Granular Humic Acid (cle-10250)

Crop Products: Iron Products

Brandt Ferrous Sulfate - Crystal Nutrient Supplement (cle-3767) ◆
Micronutrient deficiency must be documented by soil or tissue testing or other documented and verifiable method as approved by a certifying agent. Must not be used as an herbicide, defoliant or desiccant.

Brandt Organics 5% Fe Liquid Complexed Micronutrients (cle-4474) ◆
Micronutrient deficiency must be documented by soil or tissue testing or other documented and verifiable method as approved by a certifying agent. Must not be used as an herbicide, defoliant or desiccant.

Brandt Ferrous Sulfate - Coarse Granular Nutrient Supplement (cle-11219) ◆
Micronutrient deficiency must be documented by soil or tissue testing or other documented and verifiable method as approved by a certifying agent. Must not be used as an herbicide, defoliant or desiccant.

Brandt Ferrous Sulfate - Fine Granular Nutrient Supplement (cle-11220) ◆
Micronutrient deficiency must be documented by soil or tissue testing or other documented and verifiable method as approved by a certifying agent. Must not be used as an herbicide, defoliant or desiccant.

Brandt Organiplex 4% Fe Liquid Complexed Nutrients (cle-14625) ◆
Micronutrient deficiency must be documented by soil or tissue testing or other documented and verifiable method as approved by a certifying agent. Must not be used as an herbicide, defoliant or desiccant.

Brandt 5% Fe Fertilizante Inorgánico Líquido Soluble (cle-16080) ◆
Micronutrient deficiency must be documented by soil or tissue testing or other documented and verifiable method as approved by a certifying agent. Must not be used as an herbicide, defoliant or desiccant.

Brandt Organiplex Fe Fertilizante Líquido de Uso Foliar (cle-16756) ◆
Micronutrient deficiency must be documented by soil or tissue testing or other documented and verifiable method as approved by a certifying agent. Must not be used as an herbicide, defoliant or desiccant.

BRANDT Organiplex Fe (cle-17513) ◆
Micronutrient deficiency must be documented by soil or tissue testing or other documented and verifiable method as approved by a certifying agent. Must not be used as an herbicide, defoliant or desiccant.

Crop Products: Iron Products, Magnesium Sulfate – Allowed With Restrictions, Manganese Products, Zinc Products

Brandt Organics Crop Mix Liquid Complexed Micronutrients (cle-4473) ◆
May be used as a plant or soil amendment if soil deficiency of magnesium is documented by testing. Micronutrient deficiency must be documented by soil or tissue testing or other documented and verifiable method as approved by a certifying agent. Must not be used as an herbicide, defoliant or desiccant.

Brandt Crop Mix Fertilizante Inorgánico Líquido Soluble (cle-16078) ◆
Micronutrient deficiency must be documented by soil or tissue testing or other documented and verifiable method as approved by a certifying agent. Must not be used as an herbicide, defoliant or desiccant. May be used as a plant or soil amendment if soil deficiency of magnesium is documented by testing.

Crop Products: Iron Products, Manganese Products

Brandt Organics 7% Mn Liquid Complexed Micronutrients (cle-4475) ◆
Micronutrient deficiency must be documented by soil or tissue testing or other documented and verifiable method as approved by a certifying agent. Must not be used as an herbicide, defoliant or desiccant.

Crop Products: Iron Products, Manganese Products, Zinc Products

Brandt Organics Desert Crop Mix Liquid Complexed Micronutrient (cle-11331) ◆
Micronutrient deficiency must be documented by soil or tissue testing or other documented and verifiable method as approved by a certifying agent. Must not be used as an herbicide, defoliant or desiccant.

Brandt Organiplex Micro Mix Liquid Complexed Micronutrients (cle-12530) ◆
Micronutrient deficiency must be documented by soil or tissue testing or other documented and verifiable method as approved by a certifying agent. Must not be used as an herbicide, defoliant or desiccant.

Brandt Organiplex Micromix Fertilizante Líquido de Uso Foliar (cle-16755) ◆
Micronutrient deficiency must be documented by soil or tissue testing or other documented and verifiable method as approved by a certifying agent. Must not be used as an herbicide, defoliant or desiccant.

BRANDT Organiplex Micro Mix (cle-17514) ◆
Micronutrient deficiency must be documented by soil or tissue testing or other documented and verifiable method as approved by a certifying agent. Must not be used as an herbicide, defoliant or desiccant.

Crop Products: Magnesium Sulfate – Allowed With Restrictions

Brandt Magnesium Sulfate - Crystal Nutrient Supplement (cle-3768) ◆
May be used as a plant or soil amendment if soil deficiency of magnesium is documented by testing.

Brandt Magnesium Sulfate - Granular Nutrient Supplement (cle-4356) ◆
May be used as a plant or soil amendment if soil deficiency of magnesium is documented by testing.

Brandt Organics 4% Mg Liquid Complexed Micronutrients (cle-4479) ◆
May be used as a plant or soil amendment if soil deficiency of magnesium is documented by testing.

Brandt 4% Mg Fertilizante Inorgánico Líquido Soluble (cle-16079) ◆
May be used as a plant or soil amendment if soil deficiency of magnesium is documented by testing.

Crop Products: Manganese Products

Brandt Manganese Sulfate - Powder Micronutrient Supplement (cle-3765) ◆
Micronutrient deficiency must be documented by soil or tissue testing or other documented and verifiable method as approved by a certifying agent. Must not be used as an herbicide, defoliant or desiccant.

Brandt Manganese Sulfate - Granular Nutrient Supplement (cle-3766) ◆
Micronutrient deficiency must be documented by soil or tissue testing or other documented and verifiable method as approved by a certifying agent. Must not be used as an herbicide, defoliant or desiccant.

Crop Products: Oils, Horticultural

Saf-T-Side Paraffinic Oil from Petroleum Insecticide and Acaricide Emulsion in Water (cle-1078) ◆
For use as an insecticide (including acaricide or mite control) and for plant disease control as dormant, suffocating, and stylet (summer) sprays. May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Brandt TresOil Spray Oil Emulsion Fungicide, Insecticide and Miticide (cle-2685) ◆
For use as an insecticide (including acaricide or mite control) and for plant disease control as dormant, suffocating, and stylet (summer) sprays. May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Brandt TriTek Spray Oil Emulsion Fungicide, Insecticide and Miticide (cle-2686) ◆
For use as an insecticide (including acaricide or mite control) and for plant disease control as dormant, suffocating, and stylet (summer) sprays. May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Saf-T-Side Miticide / Insecticide 800EL (cle-3773) ◆
For use as an insecticide (including acaricide or mite control) and for plant disease control as dormant, suffocating, and stylet (summer) sprays. May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Saf-T-Side Emulsion d'Huile pour bouillies agricoles Insecticide & Acaricide (cle-5523) ◆
For use as an insecticide (including acaricide or mite control) and for plant disease control as dormant, suffocating, and stylet (summer) sprays. May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Saf-T-Side Insektisit-Akarisit (cle-6981) ◆
For use as an insecticide (including acaricide or mite control) and for plant disease control as dormant, suffocating, and stylet (summer) sprays. May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Crop Products: Peracetic Acid/Peroxyacetic Acid

Hye-Clean Out Antimicrobial Solution (cle-5967) ◆
For disinfecting facility, processing equipment, seed and asexually propagated planting material.

Crop Products: Plant Disease Controls

Brandt Nema-Q A Biopesticide (cle-4343)

Crop Products: Wetting Agents

Brandt Organics Ag Aide Spreader • Activator (cle-6305)

Crop Products: Zinc Products

Brandt Organics 7% Zn Liquid Complexed Micronutrients (cle-4477) ◆
Micronutrient deficiency must be documented by soil or tissue testing or other documented and verifiable method as approved by a certifying agent. Must not be used as an herbicide, defoliant or desiccant.

Brandt Organics 10% Zn Liquid Complexed Micronutrients (cle-4478) ◆
Micronutrient deficiency must be documented by soil or tissue testing or other documented and verifiable method as approved by a certifying agent. Must not be used as an herbicide, defoliant or desiccant.

Brandt Zinc Sulfate - Powder Micronutrient Supplement (cle-11221) ◆
Micronutrient deficiency must be documented by soil or tissue testing or other documented and verifiable method as approved by a certifying agent. Must not be used as an herbicide, defoliant or desiccant.

Brandt Organiplex 6% Zn Liquid Complexed Micronutrient (cle-12359) ◆
Micronutrient deficiency must be documented by soil or tissue testing or other documented and verifiable method as approved by a certifying agent. Must not be used as an herbicide, defoliant or desiccant.

Brandt Zinc Sulfate - Granular Nutrient Supplement (cle-15805) ◆
Micronutrient deficiency must be documented by soil or tissue testing or other documented and verifiable method as approved by a certifying agent. Must not be used as an herbicide, defoliant or desiccant.

Brandt 10% Zn Fertilizante Inorgánico Líquido Soluble (cle-16081) ◆
Micronutrient deficiency must be documented by soil or tissue testing or other documented and verifiable method as approved by a certifying agent. Must not be used as an herbicide, defoliant or desiccant.

Brandt Organiplex Zn Fertilizante Líquido de Uso Foliar (cle-16754) ◆
Micronutrient deficiency must be documented by soil or tissue testing or other documented and verifiable method as approved by a certifying agent. Must not be used as an herbicide, defoliant or desiccant.

BRANDT Organiplex Zn (cle-17516) ◆
Micronutrient deficiency must be documented by soil or tissue testing or other documented and verifiable method as approved by a certifying agent. Must not be used as an herbicide, defoliant or desiccant.

Crop Products: Chlorine Dioxide

CDG Environmental CDG Solution 3000 An Aqueous Solution of Chlorine Dioxide Virucide Pesticide (cdg-2220) ◆
Residual chlorine levels in the water in direct crop contact (when used pre-harvest) or as water from cleaning irrigation systems applied to the soil should not exceed the maximum residual disinfectant level under the Safe Drinking Water Act (4 mg/L (4ppm) expressed as chlorine, 0.8 mg/L (0.8 ppm) expressed as chlorine dioxide), except that chlorine products may be used in edible sprout production according to EPA label directions. May be used up to maximum labeled rates for disinfecting and sanitizing equipment or tools. No intervening event is necessary before equipment is used in contact with organic crops.

Livestock Products: Chlorine Dioxide

CDG Environmental CDG Solution 3000 An Aqueous Solution of Chlorine Dioxide Virucide Pesticide (cdg-2221) ◆
Chlorine products may be used up to maximum labeled rates for disinfecting and sanitizing equipment or tools (including dairy pipelines and tanks). Residual chlorine levels in the water in direct contact with food products or animals shall not exceed the maximum residual disinfectant limit under the Safe Drinking Water Act (4 mg/L (4ppm) expressed as chlorine, 0.8 mg/L (0.8 ppm) expressed as chlorine dioxide). May be used up to maximum labeled rates for sanitizing equipment or tools. Label instructions should be followed regarding requirements for rinsing or not rinsing prior to the equipment's next use.

Processing Products: Chlorine Dioxide

CDG Environmental CDG Solution 3000 An Aqueous Solution of Chlorine Dioxide Virucide Pesticide (cdg-1857) ◆
May be used in direct contact with post-harvest crop or food at levels approved by the FDA or the EPA for such a purpose. Such use must include a final rinse and residual chlorine levels in final rinse water shall not exceed the Maximum Residual Disinfectant Limit under the Safe Drinking Water Act, except that a final rinse is not required for use in FSIS inspected egg breaking facilities. When used as disinfectants and sanitizers for food contact surfaces, may be used up to maximum labeled rates and rinsing is not required unless mandated by the label use directions. May be used up to maximum labeled rates for disinfecting and sanitizing equipment or tools. No intervening event is necessary before equipment is used in organic production.

CDG Aquadioxide (Contains 0.3% Chlorine Dioxide Aqueous Solution) (cdg-14589) ◆
May be used in direct contact with post-harvest crop or food at levels approved by the FDA or the EPA for such a purpose. Such use must include a final rinse and residual chlorine levels in final rinse water shall not exceed the Maximum Residual Disinfectant Limit under the Safe Drinking Water Act, except that a final rinse is not required for use in FSIS inspected egg breaking facilities. When used as disinfectants and sanitizers for food contact surfaces, may be used up to maximum labeled rates and rinsing is not required unless mandated by the label use directions. May be used up to maximum labeled rates for disinfecting and sanitizing equipment or tools. No intervening event is necessary before equipment is used in organic production.

Javelin WG Biological Insecticide (ttc-0101) ◆
May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Agree® WG Biological Insecticide (ttc-8145) ◆
May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Deliver® Biological Insecticide (ttc-9170) ◆
May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Able® 50 WDG Biological Insecticide (ttc-3186) ◆
May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Delfin WG Biological Insecticide (ttc-0422) ◆
May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

CoStar® Biological Insecticide (ttc-1532) ◆
May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Condor WP Wettable Powder Bioinsecticide (ttc-2628) ◆
May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Thuricide HPWP Biological Insecticide (ttc-2673) ◆
May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Thuricide HPC-O for Home & Gardens Biological Insecticide Easy-to-Mix Liquid Concentrate Ready to Spray (ttc-2709) ◆
May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Agree 50WP Biological Insecticide (ttc-6224) ◆
May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

TRIDENT Biological Insecticide (ttc-7168) ◆
May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Crop Products: Beauveria spp.

BoteGHA® Optima ES Emulsifiable Suspension Mycoinsecticide (ttc-19315) ◆
May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Mycotrol® Optima ESO Emulsifiable Suspension Mycoinsecticide (ttc-19318) ◆
May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Crop Products: Biopesticides

MeloCon WG Biological Nematicide (ttc-6525) ◆
May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

MeloCon LC Biological Nematicide (ttc-16172) ◆
May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Crop Products: Coppers, fixed

Kocide 2000-O Fungicide/Bactericide Dry Flowable (ttc-17485) ◆
For plant disease control. Must be used in a manner that minimizes copper accumulation in the soil and shall not be used as herbicides. May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Kocide 3000-O Fungicide/Bactericide Dry Flowable (ttc-17486) ◆
For plant disease control. Must be used in a manner that minimizes copper accumulation in the soil and shall not be used as herbicides. May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Cueva Fungicide Concentrate Flowable Liquid Copper Fungicide (ttc-17600) ◆
For plant disease control. Must be used in a manner that minimizes copper accumulation in the soil and shall not be used as herbicides. May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Kocide 50DF (ttc-18243) ◆
For plant disease control. Must be used in a manner that minimizes copper accumulation in the soil and shall not be used as herbicides. May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Crop Products: Ferric Phosphate

Bug-N-Sluggo Insect, Slug and Snail Bait (ttc-17601) ◆
For use as slug and snail bait. May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Sluggo Slug and Snail Bait (ttc-17602) ◆
For use as slug and snail bait. May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Crop Products: Fungicides

SoilGard® Microbial Fungicide (ttc-0551) ◆
When used pre-harvest, may only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices. When used in post-harvest handling of raw agricultural commodities, not subject to the requirements of 205.206(e).

Crop Products: Herbicides

Homeplate Non-selective Herbicide (ttc-17603) ◆
May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Crop Products: Microbial Pesticides

PFR-97 20% WDG Microbial Insecticide (ttc-2838) ◆
May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Double Nickel 55 Biofungicide Water Dispersible Granular Biofungicide (ttc-2901) ◆
May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Amylo-X Biofungicide Water Dispersible Granular Biofungicide (ttc-2980) ◆
May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Double Nickel LC Biofungicide Aqueous Suspension Biofungicide/Bactericide (ttc-2981) ◆
May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

BoteGHA ES Emulsifiable Suspension Mycoinsecticide (ttc-11155) ◆
May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Mycotrol ESO Emulsifiable Suspension Mycoinsecticide (ttc-11156) ◆
May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

LifeGard LC Biological Plant Activator (ttc-13606) ◆
May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

PFR-97 10% ES Microbial Insecticide (ttc-16272) ◆
May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

NemaClean 10% WP Bionematicide (ttc-18400) ◆
May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

BotaniGard® ES Emulsifiable Suspension Mycoinsecticide (ttc-19954) ◆
May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

BotaniGard® 22WP Wettable Powder Mycoinsecticide (ttc-19956) ◆
May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Mycotrol® WPO Wettable Powder Mycoinsecticide (ttc-19957) ◆
May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Convergence Aqueous Suspension Biofungicide/Bactericide (ttc-20282) ◆
May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Crop Products: Microbial Products

LifeGard WG Biological Plant Activator (ttc-7169) ◆
May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Crop Products: Neem and Neem Derivatives

Trilogy® Fungicide/Miticide/Insecticide (ttc-8073) ◆
May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Neemix® 4.5 Insect Growth Regulator Biological Insecticide (ttc-0550) ◆
May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Triact® 70 Fungicide/Miticide/Insecticide (ttc-9234) ◆
May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Neem Oil RTU Fungicide/Miticide/Insecticide Water Based (ttc-4003) ◆
May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

NeemGard Fungicide/Miticide/Insecticide (ttc-0493) ◆
May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Nimbuz™ Fungicide/Miticide/Insecticide (ttc-2559) ◆
May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Trilogy XL-O Fungicide/Miticide/Insecticide (ttc-3510) ◆
May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Crop Products: Polyoxin D Zinc Salt

OSO 5%SC Fungicide (ttc-13605) ◆
For plant disease control. May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Crop Products: Potassium Bicarbonate

Carb-O-Nator (ttc-6938) ◆
For plant disease control. May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Crop Products: Potassium Silicate, aqueous

Sil-MATRIX LC Fungicide/Miticide/Insecticide (ttc-13607) ◆
For use as plant disease control, or as an insecticide (including acaricide or mite control). May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Crop Products: Soap

DES-X® Insecticidal Soap Concentrate (ttc-1763) ◆
For use as an algicide/demosser, herbicide or insecticide. When used as an herbicide may only be used for farmstead maintenance (roadways, ditches, right of ways, building perimeters) and ornamental crops. May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Final-San-O Non-Selective Grass and Broadleaf Herbicide (ttc-2557) ◆
For use as an algicide/demosser, herbicide or insecticide. When used as an herbicide may only be used for farmstead maintenance (roadways, ditches, right of ways, building perimeters) and ornamental crops. May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Crop Products: Spinosad

Seduce Insect Bait Ant, Earwig, and Cutworm Bait (ttc-1923) ◆
May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Crop Products: Virus Sprays

Gemstar® LC Insecticidal Virus Liquid Concentrate Biological Insecticide (ttc-9821) ◆
May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Spod-X LC Insecticidal Virus Liquid Concentrate Biological Insecticide (ttc-9822) ◆
May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

CYD-X® Insecticidal Virus An Aqueous Suspension Biological Insecticide for Control of the Codling Moth (ttc-3084) ◆
May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

CYD-X® HP Insecticidal Virus High Potency Aqueous Suspension Biological Insecticide for Control of the Codling Moth (ttc-2802) ◆
May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Madex HP Insecticidal Virus Biological Insecticide (ttc-14957) ◆
May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Crop Products: Chlorine Materials

RTU Oxcide + (che-8924) ◆
Residual chlorine levels in the water in direct crop contact (when used pre-harvest) or as water from cleaning irrigation systems applied to the soil should not exceed the maximum residual disinfectant level under the Safe Drinking Water Act (4 mg/L (4ppm) expressed as chlorine, 0.8 mg/L (0.8 ppm) expressed as chlorine dioxide), except that chlorine products may be used in edible sprout production according to EPA label directions. May be used up to maximum labeled rates for disinfecting and sanitizing equipment or tools. No intervening event is necessary before equipment is used in contact with organic crops.

Crop Products: Hypochlorous Acid

Oxcide + Deposition Control 0.05% Sodium Hypochlorite as Hypochlorous Acid at pH 7.0 (che-18199) ◆
Residual chlorine levels in the water in direct crop contact (when used pre-harvest) or as water from cleaning irrigation systems applied to the soil should not exceed the maximum residual disinfectant level under the Safe Drinking Water Act (4 mg/L (4ppm) expressed as chlorine, 0.8 mg/L (0.8 ppm) expressed as chlorine dioxide), except that chlorine products may be used in edible sprout production according to EPA label directions. May be used up to maximum labeled rates for disinfecting and sanitizing equipment or tools. No intervening event is necessary before equipment is used in contact with organic crops.

Processing Products: Chlorine Materials

Oxide+ Deposition Control 0.05% Sodium Hypochlorite as Hypochlorous Acid at pH 7.0 (che-6622) ◆
May be used in direct contact with post-harvest crop or food at levels approved by the FDA or the EPA for such a purpose. Such use must include a final rinse and residual chlorine levels in final rinse water shall not exceed the Maximum Residual Disinfectant Limit under the Safe Drinking Water Act, except that a final rinse is not required for use in FSIS inspected egg breaking facilities. When used as disinfectants and sanitizers for food contact surfaces, may be used up to maximum labeled rates and rinsing is not required unless mandated by the label use directions. May be used up to maximum labeled rates for disinfecting and sanitizing equipment or tools. No intervening event is necessary before equipment is used in organic production.

RTU Oxcide + (che-8769) ◆
May be used in direct contact with post-harvest crop or food at levels approved by the FDA or the EPA for such a purpose. Such use must include a final rinse and residual chlorine levels in final rinse water shall not exceed the Maximum Residual Disinfectant Limit under the Safe Drinking Water Act, except that a final rinse is not required for use in FSIS inspected egg breaking facilities. When used as disinfectants and sanitizers for food contact surfaces, may be used up to maximum labeled rates and rinsing is not required unless mandated by the label use directions. May be used up to maximum labeled rates for disinfecting and sanitizing equipment or tools. No intervening event is necessary before equipment is used in organic production.

Crop Products: Copper Products

C1 Chem One Copper Sulfate Crystals (col-4073) ◆
Micronutrient deficiency must be documented by soil or tissue testing or other documented and verifiable method as approved by a certifying agent. Must not be used as an herbicide, defoliant or desiccant.

Crop Products: Copper Sulfate

Copper Sulfate Crystals (col-4001) ◆
For plant disease control, must be used in a manner that minimizes accumulation of copper in the soil. For use as an algicide in aquatic rice systems and for tadpole shrimp control in aquatic rice systems, must not exceed one application per field during any 24-month period. Application rates are limited to those which do not increase baseline soil test values for copper over a time frame agreed upon by the producer and accredited certifying agent. May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Crop Products: Adjuvants, for use in crop pesticides

Chemurgic's Defoamer OR-10 Anti-foaming agent for spray applications (cac-6606) ◆
For use as an inert ingredient in combination with permitted active pesticidal ingredients. May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Chemurgic's OR-100 Super Spreader Water Reducing Adjuvant (cac-6607) ◆
For use as an inert ingredient in combination with permitted active pesticidal ingredients. May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Chemurgic ORBIT DL d-limonene Adjuvant • Spreader • Activator (cac-18624) ◆
For use as an inert ingredient in combination with permitted active pesticidal ingredients. May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Crop Products: Boron Products

Chemurgic's Boric Acid Crop Nutrition Supplement (cac-6543) ◆
Micronutrient deficiency must be documented by soil or tissue testing or other documented and verifiable method as approved by a certifying agent. Must not be used as an herbicide, defoliant or desiccant.

Crop Products: Boron Products, Copper Products, Fertilizers, Blended with micronutrients, Fertilizers, Blended with synthetic magnesium sulfate, Iron Products, Manganese Products, Molybdenum Products, Zinc Products

Chemurgic's Pacific Multi-Mix Ligno+ Lignin-complexed Plant Nutrient (cac-19689) ◆
Refer to specific ingredient categories for applicable use restrictions. May be used as a plant or soil amendment if soil deficiency of magnesium is documented by testing. Micronutrient deficiency must be documented by soil or tissue testing or other documented and verifiable method as approved by a certifying agent. Must not be used as an herbicide, defoliant or desiccant.

Crop Products: Citric Acid

Chemurgic's Citric Acid Anhydrous Granular (cac-6605)

Crop Products: Copper Products

Chemurgic's Copper 5 Ligno+ Lignin-complexed Plant Nutrient (cac-19690) ◆
Micronutrient deficiency must be documented by soil or tissue testing or other documented and verifiable method as approved by a certifying agent. Must not be used as an herbicide, defoliant or desiccant.

Crop Products: Fertilizers, Blended with micronutrients, Iron Products

Chemurgic's Iron 5 Ligno+ Lignin-complexed Plant Nutrient (cac-19674) ◆
Micronutrient deficiency must be documented by soil or tissue testing or other documented and verifiable method as approved by a certifying agent. Must not be used as an herbicide, defoliant or desiccant. Refer to specific ingredient categories for applicable use restrictions.

Crop Products: Fertilizers, Blended with synthetic magnesium sulfate

Chemurgic's Magnesium 4 Ligno+ Lignin-complexed Plant Nutrient (cac-19687) ◆
May be used as a plant or soil amendment if soil deficiency of magnesium is documented by testing.

Crop Products: Iron Products

Chemurgic's Ferrous Sulfate 20% Nutritional Supplement for Plants/Crops (cac-13143) ◆
Micronutrient deficiency must be documented by soil or tissue testing or other documented and verifiable method as approved by a certifying agent. Must not be used as an herbicide, defoliant or desiccant.

Chemurgic Fine Granular Ferrous Sulfate Monohydrate Plant Food (cac-13479) ◆
Micronutrient deficiency must be documented by soil or tissue testing or other documented and verifiable method as approved by a certifying agent. Must not be used as an herbicide, defoliant or desiccant.

Chemurgic Coarse Granular Ferrous Sulfate Plant Food (cac-14206) ◆
Micronutrient deficiency must be documented by soil or tissue testing or other documented and verifiable method as approved by a certifying agent. Must not be used as an herbicide, defoliant or desiccant.

Crop Products: Iron Products, Manganese Products

Chemurgic's Manganese 7 Ligno+ Lignin-complexed Plant Nutrient (cac-19686) ◆
Micronutrient deficiency must be documented by soil or tissue testing or other documented and verifiable method as approved by a certifying agent. Must not be used as an herbicide, defoliant or desiccant.

Crop Products: Magnesium Sulfate – Allowed With Restrictions

Chemurgic Magnesium Sulfate (Epsom Salts) Nutritional Feed Additive and Plant Food (cac-13141) ◆
May be used as a plant or soil amendment if soil deficiency of magnesium is documented by testing.

Crop Products: Manganese Products

Chemurgic Manganese Sulfate Feed Additive and Plant Food (cac-13478) ◆
Micronutrient deficiency must be documented by soil or tissue testing or other documented and verifiable method as approved by a certifying agent. Must not be used as an herbicide, defoliant or desiccant.

Chemurgic Granular Manganese Sulfate (cac-13746) ◆
Micronutrient deficiency must be documented by soil or tissue testing or other documented and verifiable method as approved by a certifying agent. Must not be used as an herbicide, defoliant or desiccant.

Crop Products: Zinc Products

Chemurgic Hi-Lo Zinc Sulfate Feed Additive and Plant Food (cac-15844) ◆
Micronutrient deficiency must be documented by soil or tissue testing or other documented and verifiable method as approved by a certifying agent. Must not be used as an herbicide, defoliant or desiccant.

Chemurgic's Super Tel Zinc Sulfate Powder - Plant Nutrient (cac-19194) ◆
Micronutrient deficiency must be documented by soil or tissue testing or other documented and verifiable method as approved by a certifying agent. Must not be used as an herbicide, defoliant or desiccant.

Chemurgic's Zinc 7 Ligno+ Lignin-complexed Plant Nutrient (cac-19675) ◆
Micronutrient deficiency must be documented by soil or tissue testing or other documented and verifiable method as approved by a certifying agent. Must not be used as an herbicide, defoliant or desiccant.

Chemurgic's Zinc 9 Ligno+ Lignin-complexed Plant Nutrient (cac-20313) ◆
Micronutrient deficiency must be documented by soil or tissue testing or other documented and verifiable method as approved by a certifying agent. Must not be used as an herbicide, defoliant or desiccant.

Columbia River B-52 Buffer-Acidifier (crv-10477) ◆
For use as an inert ingredient in combination with permitted active pesticidal ingredients. May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Columbia River Silcote 2000 Organosilicone Surfactant (crv-10478) ◆
For use as an inert ingredient in combination with permitted active pesticidal ingredients. May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Crop Products: Calcium Chloride

Columbia River EcoPro Calcium (crv-10895) ◆
For use as a foliar spray to treat a physiological disorder associated with calcium uptake.

Crop Products: Copper Products, Iron Products, Magnesium Sulfate – Allowed With Restrictions, Manganese Products, Zinc Products

Columbia River EcoPro Micro-Pak (crv-10899) ◆
May be used as a plant or soil amendment if soil deficiency of magnesium is documented by testing. Micronutrient deficiency must be documented by soil or tissue testing or other documented and verifiable method as approved by a certifying agent. Must not be used as an herbicide, defoliant or desiccant.

Crop Products: Magnesium Sulfate – Allowed With Restrictions

Columbia River EcoPro Magnesium (crv-10896) ◆
May be used as a plant or soil amendment if soil deficiency of magnesium is documented by testing.

Crop Products: Manganese Products

Columbia River EcoPro Manganese (crv-10898) ◆
Micronutrient deficiency must be documented by soil or tissue testing or other documented and verifiable method as approved by a certifying agent. Must not be used as an herbicide, defoliant or desiccant.

Crop Products: Zinc Products

Columbia River EcoPro Zinc (crv-10900) ◆
Micronutrient deficiency must be documented by soil or tissue testing or other documented and verifiable method as approved by a certifying agent. Must not be used as an herbicide, defoliant or desiccant.

AGRI-CINNA Insecticida Orgánico Extracto Vegetal de Canela Insecticida Agrícola/Líquido Emulsionable (ans-5503) ◆
May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

BLEEM-30 Repelente e Insecticida Orgánico Extracto Vegetal de Neem + Extracto Vegetal de Ajo Insecticida Agricola / Liquido Emulsionable (ans-5504) ◆
May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Fungicit Fungicida Botánico Extracto Vegetal de Almendro Fungicida Agrícola/Líquido Emulsionable (ans-12796) ◆
May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

In-Copalk Insecticida Botánico Extracto Vegetal de Copalquin Insecticida Agrícola/ Líquido Emulsionable (ans-12815) ◆
May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

BIOCREALAB RUDANEM Nematicida Botánico Extracto Vegetal de Ruda Nematicida Agrícola/ Líquido Emulsionable (ans-12819) ◆
May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

BIOCREALAB LEPICIT-70 INSECTICIDA Orgánico Extracto Vegetal de: Neem Insecticida Orgánico/Líquido Emulsionable (ans-12964) ◆
May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Crop Products: Copper Sulfate

FOLI-CU PLUS Sulfato de Cobre Pentahidratado Fungicida Agrícola/Solución Acuosa (ans-5505) ◆
For plant disease control, must be used in a manner that minimizes accumulation of copper in the soil. For use as an algicide in aquatic rice systems and for tadpole shrimp control in aquatic rice systems, must not exceed one application per field during any 24-month period. Application rates are limited to those which do not increase baseline soil test values for copper over a time frame agreed upon by the producer and accredited certifying agent. May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Crop Products: Microbial Products

BIOCREALAB BIO BASSB INSECTICIDA Biológico Beauveria bassiana Insecticida Polvo Humectable (ans-6573) ◆
May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

BIOCREALAB BIO BONT INSECTICIDA Biológico Insecticida Biológico / Líquido Emulsionable (ans-6574) ◆
May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

BIOCREALAB BIO BOSTER FUNGICIDA Biológico (ans-6575) ◆
May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

BIOCREALAB BIO FACEF INSECTICIDA Biológico Polvo Humectable (ans-6576) ◆
May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

BIOCREALAB BIO FACEL NEMATICIDA Biológico Polvo Humectable (ans-6577) ◆
May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

BIOCREALAB BIO MA-BB INSECTICIDA Biológico Polvo Humectable (ans-6578) ◆
May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

BIOCREALAB BIO METT INSECTICIDA Biológico Polvo Humectable (ans-6579) ◆
May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

BIOCREALAB BIO THORK FUNGICIDA Biológico Polvo Humectable (ans-6580) ◆
May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

NURON Organic Spreader (cnb-15186) ◆
For use as an inert ingredient in combination with permitted active pesticidal ingredients. May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

CUBIDEX S.A. de C.V.

PERLA CARRERA
BLVD DE LAS GALAXIAS 151
LA PIEDAD, MICHOACAN 59310
México
ingpicarrera@gmail.com

Crop Products: Copper Sulfate

CUBIDEX (pef-14370) ◆
For plant disease control, must be used in a manner that minimizes accumulation of copper in the soil. For use as an algicide in aquatic rice systems and for tadpole shrimp control in aquatic rice systems, must not exceed one application per field during any 24-month period. Application rates are limited to those which do not increase baseline soil test values for copper over a time frame agreed upon by the producer and accredited certifying agent. May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Agrowlyte Plant Wash (dga-12674) ◆
May be used in direct contact with post-harvest crop or food at levels approved by the FDA or the EPA for such a purpose. Such use must include a final rinse and residual chlorine levels in final rinse water shall not exceed the Maximum Residual Disinfectant Limit under the Safe Drinking Water Act, except that a final rinse is not required for use in FSIS inspected egg breaking facilities. When used as disinfectants and sanitizers for food contact surfaces, may be used up to maximum labeled rates and rinsing is not required unless mandated by the label use directions. May be used up to maximum labeled rates for disinfecting and sanitizing equipment or tools. No intervening event is necessary before equipment is used in organic production.

Crop Products: Copper Sulfate

Masterbac Fungicida/Bactericida de Uso Agrícola (dsn-10806) ◆
For plant disease control, must be used in a manner that minimizes accumulation of copper in the soil. For use as an algicide in aquatic rice systems and for tadpole shrimp control in aquatic rice systems, must not exceed one application per field during any 24-month period. Application rates are limited to those which do not increase baseline soil test values for copper over a time frame agreed upon by the producer and accredited certifying agent. May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Crop Products: Microbial Pesticides

FQ 1500 Fungicida/Nematicida de Uso Agrícola (dsn-10568) ◆

Crop Products: Fertilizers, Blended with sodium nitrate

Drammatic "ONE" Liquid Fish Plant Food 4-4-0.5 (drc-0547) ■◆
This product contains highly soluble nitrogen and must be applied in a manner that does not contribute to the contamination of crops, soil or water. Its use must be part of an organic system plan that maintains or improves the natural resources of the operation, including soil and water quality, and comply with crop nutrient and soil fertility requirements.

Drammatic "O" Earth Friendly Fertilizer (drc-1581) ◆
This product contains highly soluble nitrogen and must be applied in a manner that does not contribute to the contamination of crops, soil or water. Its use must be part of an organic system plan that maintains or improves the natural resources of the operation, including soil and water quality, and comply with crop nutrient and soil fertility requirements.

Drammatic "K" Earth Friendly Fertilizer (drc-1590) ◆
This product contains highly soluble nitrogen and must be applied in a manner that does not contribute to the contamination of crops, soil or water. Its use must be part of an organic system plan that maintains or improves the natural resources of the operation, including soil and water quality, and comply with crop nutrient and soil fertility requirements.

Drammatic "ONE" Earth Friendly Fertilizer 4-4-1 (drc-2811) ■◆
This product contains highly soluble nitrogen and must be applied in a manner that does not contribute to the contamination of crops, soil or water. Its use must be part of an organic system plan that maintains or improves the natural resources of the operation, including soil and water quality, and comply with crop nutrient and soil fertility requirements.

Drammatic "5N" Liquid Fish Plant Food 5-4-2 (drc-3734) ■◆
This product contains highly soluble nitrogen and must be applied in a manner that does not contribute to the contamination of crops, soil or water. Its use must be part of an organic system plan that maintains or improves the natural resources of the operation, including soil and water quality, and comply with crop nutrient and soil fertility requirements.

Dramm Drammatic Organic Fertilizer with Kelp 2-4-1 (drc-10474) ◆
This product contains highly soluble nitrogen and must be applied in a manner that does not contribute to the contamination of crops, soil or water. Its use must be part of an organic system plan that maintains or improves the natural resources of the operation, including soil and water quality, and comply with crop nutrient and soil fertility requirements.

Dramm Drammatic Organic Original Fertilizer 2-4-1 (drc-12755) ◆
This product contains highly soluble nitrogen and must be applied in a manner that does not contribute to the contamination of crops, soil or water. Its use must be part of an organic system plan that maintains or improves the natural resources of the operation, including soil and water quality, and comply with crop nutrient and soil fertility requirements.

Dramm Drammatic Organic Premium Fertilizer 4-4-1 (drc-12768) ■◆
This product contains highly soluble nitrogen and must be applied in a manner that does not contribute to the contamination of crops, soil or water. Its use must be part of an organic system plan that maintains or improves the natural resources of the operation, including soil and water quality, and comply with crop nutrient and soil fertility requirements.

Drammatic "O" 2-5-0.2 w/Sodium Nitrate Liquid Fish Plant Food (drc-18878) ◆
This product contains highly soluble nitrogen and must be applied in a manner that does not contribute to the contamination of crops, soil or water. Its use must be part of an organic system plan that maintains or improves the natural resources of the operation, including soil and water quality, and comply with crop nutrient and soil fertility requirements.

Livestock Products: Chlorine Dioxide

dutrion Tablet DT-25-C Disinfectant•Virucide•Deoderizer•Biocide•Fungistatic•Algaestatic•Mildewstatic•Slimicide (dna-18883) ◆

Chlorine products may be used up to maximum labeled rates for disinfecting and sanitizing equipment or tools (including dairy pipelines and tanks). Residual chlorine levels in the water in direct contact with food products or animals shall not exceed the maximum residual disinfectant limit under the Safe Drinking Water Act (4 mg/L (4ppm) expressed as chlorine, 0.8 mg/L (0.8 ppm) expressed as chlorine dioxide). May be used up to maximum labeled rates for sanitizing equipment or tools. Label instructions should be followed regarding requirements for rinsing or not rinsing prior to the equipment's next use.

Processing Products: Chlorine Dioxide

dutrion Tablet Disinfectant•Virucide•Deoderizer•Biocide•Fungistatic•Algaestatic•Mildewstatic•Slimicide (dna-7526) ◆

May be used in direct contact with post-harvest crop or food at levels approved by the FDA or the EPA for such a purpose. Such use must include a final rinse and residual chlorine levels in final rinse water shall not exceed the Maximum Residual Disinfectant Limit under the Safe Drinking Water Act, except that a final rinse is not required for use in FSIS inspected egg breaking facilities. When used as disinfectants and sanitizers for food contact surfaces, may be used up to maximum labeled rates and rinsing is not required unless mandated by the label use directions. May be used up to maximum labeled rates for disinfecting and sanitizing equipment or tools. No intervening event is necessary before equipment is used in organic production.

Crop Products: Copper Sulfate

AgriTec Algaecide/Nonpublic Health Bactericide (eal-10433) ◆
For plant disease control, must be used in a manner that minimizes accumulation of copper in the soil. For use as an algicide in aquatic rice systems and for tadpole shrimp control in aquatic rice systems, must not exceed one application per field during any 24-month period. Application rates are limited to those which do not increase baseline soil test values for copper over a time frame agreed upon by the producer and accredited certifying agent. May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

CopCheck To Control Algae and Tadpole Shrimp in Rice Fields (eal-14003) ◆
For plant disease control, must be used in a manner that minimizes accumulation of copper in the soil. For use as an algicide in aquatic rice systems and for tadpole shrimp control in aquatic rice systems, must not exceed one application per field during any 24-month period. Application rates are limited to those which do not increase baseline soil test values for copper over a time frame agreed upon by the producer and accredited certifying agent. May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Crop Products: Coppers, fixed

ET-F Bactericde/Fungicide (eal-8838) ◆
For plant disease control. Must be used in a manner that minimizes copper accumulation in the soil and shall not be used as herbicides. May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

COP-KLEEN Algicide/ Bactericide/ Fungicide (eal-14669) ◆
For plant disease control. Must be used in a manner that minimizes copper accumulation in the soil and shall not be used as herbicides. May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Crop Products: Coppers, fixed

Econatur FUNGICAR Fungicida Liquido Soluble (lab-17164) ◆
For plant disease control. Must be used in a manner that minimizes copper accumulation in the soil and shall not be used as herbicides. May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Crop Products: Fertilizers and Soil Amendments, Blended

Econatur Laboratorios Phytonatur KALIMAX Fertilizante Órgano-Minera Polvo (lab-13739)

NUTRIPRO KMg Fertilizante Órgano-Mineral Polvo (lab-15389)

Econatur FÓSFORO Fertilizante Fosfatado Indicado Para Todos Los Cultivos (lab-16395)

Econatur EcoFlow-Ca Fertilizante Órgano-Mineral Líquido (lab-19628)

Crop Products: Fertilizers and Soil Amendments, Blended – Allowed With Restrictions, Magnesium Sulfate – Allowed With Restrictions

Econatur EcoFLOW-Mg Fertilizante Organo-Mineral (lab-18604) ◆
Refer to specific ingredient categories for applicable use restrictions. May be used as a plant or soil amendment if soil deficiency of magnesium is documented by testing.

Crop Products: Fertilizers and Soil Amendments, Blended – Allowed With Restrictions, Potassium Chloride

Econatur EcoFlow-K Fertilizante Órgano-Mineral Liquido (lab-18388) ◆
Must be applied in a manner that minimizes chloride accumulation in the soil. Refer to specific ingredient categories for applicable use restrictions.

Crop Products: Plant Extracts

Phytonatur BIOESTIM Fertilizante Órgano-Mineral Líquido Soluble (lab-13731)

Crop Products: Hypochlorous Acid

VEGGOX CT Broad Spectrum Disinfectant for Crop Mgmt Tools & Production Aids (eaw-13487) ◆
Residual chlorine levels in the water in direct crop contact (when used pre-harvest) or as water from cleaning irrigation systems applied to the soil should not exceed the maximum residual disinfectant level under the Safe Drinking Water Act (4 mg/L (4ppm) expressed as chlorine, 0.8 mg/L (0.8 ppm) expressed as chlorine dioxide), except that chlorine products may be used in edible sprout production according to EPA label directions. May be used up to maximum labeled rates for disinfecting and sanitizing equipment or tools. No intervening event is necessary before equipment is used in contact with organic crops.

Processing Products: Hypochlorous Acid

VEGGOX PS Broad-Spectrum Disinfectant for Sanitation Processes, Food and Instruments (eaw-13488) ◆
May be used in direct contact with post-harvest crop or food at levels approved by the FDA or the EPA for such a purpose. Such use must include a final rinse and residual chlorine levels in final rinse water shall not exceed the Maximum Residual Disinfectant Limit under the Safe Drinking Water Act, except that a final rinse is not required for use in FSIS inspected egg breaking facilities. When used as disinfectants and sanitizers for food contact surfaces, may be used up to maximum labeled rates and rinsing is not required unless mandated by the label use directions. May be used up to maximum labeled rates for disinfecting and sanitizing equipment or tools. No intervening event is necessary before equipment is used in organic production.

Crop Products: Copper Products, Fertilizers, Blended with micronutrients, Iron Products, Manganese Products, Zinc Products

Soil Zyme for Organic Production (esg-16218) ◆

Refer to specific ingredient categories for applicable use restrictions. Micronutrient deficiency must be documented by soil or tissue testing or other documented and verifiable method as approved by a certifying agent. Must not be used as an herbicide, defoliant or desiccant.

Crop Products: Fertilizers and Soil Amendments, Blended

Liquid Humic for Organic Production (esg-15494)

Brix Up Liquid Brown Sugar with Kelp for Organic Production (esg-15524)

CO2 Complex Carbon Regulator for Organic Production (esg-16659)

Crop Products: Fertilizers and Soil Amendments, Blended – Allowed With Restrictions, Iron Products, Manganese Products

Bio Amino Cell Fusion for Organic Production (esg-19703) ◆

Refer to specific ingredient categories for applicable use restrictions. Micronutrient deficiency must be documented by soil or tissue testing or other documented and verifiable method as approved by a certifying agent. Must not be used as an herbicide, defoliant or desiccant.

Crop Products: Chlorine Dioxide

EnviroChlorite 7.5 Chlorine Dioxide and Acidified Chlorite Solution Precursor (ent-10480) ◆

Residual chlorine levels in the water in direct crop contact (when used pre-harvest) or as water from cleaning irrigation systems applied to the soil should not exceed the maximum residual disinfectant level under the Safe Drinking Water Act (4 mg/L (4ppm) expressed as chlorine, 0.8 mg/L (0.8 ppm) expressed as chlorine dioxide), except that chlorine products may be used in edible sprout production according to EPA label directions. May be used up to maximum labeled rates for disinfecting and sanitizing equipment or tools. No intervening event is necessary before equipment is used in contact with organic crops.

EnviroChlorite 15 Chlorine Dioxide and Acidified Chlorite Solution Precursor (ent-10481) ◆

Residual chlorine levels in the water in direct crop contact (when used pre-harvest) or as water from cleaning irrigation systems applied to the soil should not exceed the maximum residual disinfectant level under the Safe Drinking Water Act (4 mg/L (4ppm) expressed as chlorine, 0.8 mg/L (0.8 ppm) expressed as chlorine dioxide), except that chlorine products may be used in edible sprout production according to EPA label directions. May be used up to maximum labeled rates for disinfecting and sanitizing equipment or tools. No intervening event is necessary before equipment is used in contact with organic crops.

EnviroChlorite 25 Chlorine Dioxide and Acidified Chlorite Solution Precursor (ent-17319) ◆

Residual chlorine levels in the water in direct crop contact (when used pre-harvest) or as water from cleaning irrigation systems applied to the soil should not exceed the maximum residual disinfectant level under the Safe Drinking Water Act (4 mg/L (4ppm) expressed as chlorine, 0.8 mg/L (0.8 ppm) expressed as chlorine dioxide), except that chlorine products may be used in edible sprout production according to EPA label directions. May be used up to maximum labeled rates for disinfecting and sanitizing equipment or tools. No intervening event is necessary before equipment is used in contact with organic crops.

Crop Products: Hydrogen Peroxide

Perasan 'A' Antimicrobial Solution (ent-5117) ◆

For use as a plant disease control or as an algicide. May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Peragreen® 5.6% Antimicrobial Solution (ent-7249) ◆

For use as a plant disease control or as an algicide. May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Crop Products: Peracetic Acid/Peroxyacetic Acid

BioSide™ HS 15% (Antimicrobial Solution) (ent-2949) ◆

For disinfecting facility, processing equipment, seed and asexually propagated planting material.

Peragreen 15% (Antimicrobial Solution) (ent-11505) ◆
For disinfecting facility, processing equipment, seed and asexually propagated planting material.

Livestock Products: Acid Activators for Chlorine Dioxide

EnviroTech Acivate-O Acid Activator (ent-13094) ◆
Chlorine products may be used up to maximum labeled rates for disinfecting and sanitizing equipment or tools (including dairy pipelines and tanks). Residual chlorine levels in the water in direct contact with food products or animals shall not exceed the maximum residual disinfectant limit under the Safe Drinking Water Act (4 mg/L (4ppm) expressed as chlorine, 0.8 mg/L (0.8 ppm) expressed as chlorine dioxide). May be used up to maximum labeled rates for sanitizing equipment or tools. Label instructions should be followed regarding requirements for rinsing or not rinsing prior to the equipment's next use. Must only be used for the generation of chlorine dioxide. Use of resulting chlorine dioxide must comply with 205.603(a)(10)(ii).

Livestock Products: Chlorine Dioxide

EnviroChlorite 7.5 Chlorine Dioxide and Acidified Chlorite Solution Precursor (ent-8702) ◆
Chlorine products may be used up to maximum labeled rates for disinfecting and sanitizing equipment or tools (including dairy pipelines and tanks). Residual chlorine levels in the water in direct contact with food products or animals shall not exceed the maximum residual disinfectant limit under the Safe Drinking Water Act (4 mg/L (4ppm) expressed as chlorine, 0.8 mg/L (0.8 ppm) expressed as chlorine dioxide). May be used up to maximum labeled rates for sanitizing equipment or tools. Label instructions should be followed regarding requirements for rinsing or not rinsing prior to the equipment's next use.

SureCide AH Chlorine Dioxide and Acidified Chlorite Solution Precursor (ent-10867) ◆
Chlorine products may be used up to maximum labeled rates for disinfecting and sanitizing equipment or tools (including dairy pipelines and tanks). Residual chlorine levels in the water in direct contact with food products or animals shall not exceed the maximum residual disinfectant limit under the Safe Drinking Water Act (4 mg/L (4ppm) expressed as chlorine, 0.8 mg/L (0.8 ppm) expressed as chlorine dioxide). May be used up to maximum labeled rates for sanitizing equipment or tools. Label instructions should be followed regarding requirements for rinsing or not rinsing prior to the equipment's next use.

ChlorCide Chlorine Dioxide and Acidified Chlorite Solution Precursor (ent-11958) ◆
Chlorine products may be used up to maximum labeled rates for disinfecting and sanitizing equipment or tools (including dairy pipelines and tanks). Residual chlorine levels in the water in direct contact with food products or animals shall not exceed the maximum residual disinfectant limit under the Safe Drinking Water Act (4 mg/L (4ppm) expressed as chlorine, 0.8 mg/L (0.8 ppm) expressed as chlorine dioxide). May be used up to maximum labeled rates for sanitizing equipment or tools. Label instructions should be followed regarding requirements for rinsing or not rinsing prior to the equipment's next use.

Livestock Products: Peracetic Acid/Peroxyacetic Acid

BioSide HS 15% (Antimicrobial Solution) (ent-16782) ◆
For sanitizing facility and processing equipment.

Processing Products: Chlorine Dioxide

EnviroChlorite 7.5 Chlorine Dioxide and Acidified Chlorite Solution Precursor (ent-8701) ◆
May be used in direct contact with post-harvest crop or food at levels approved by the FDA or the EPA for such a purpose. Such use must include a final rinse and residual chlorine levels in final rinse water shall not exceed the Maximum Residual Disinfectant Limit under the Safe Drinking Water Act, except that a final rinse is not required for use in FSIS inspected egg breaking facilities. When used as disinfectants and sanitizers for food contact surfaces, may be used up to maximum labeled rates and rinsing is not required unless mandated by the label use directions. May be used up to maximum labeled rates for disinfecting and sanitizing equipment or tools. No intervening event is necessary before equipment is used in organic production.

Processing Products: Peracetic Acid/Peroxyacetic Acid

BioSide™ HS 15% (Antimicrobial Solution) (ent-1708) ◆
May be used as a sanitizer on food contact surfaces. Use in wash and/or rinse water must comply with FDA limitations.

Perasan 'A' Antimicrobial Solution (ent-5118) ◆
May be used as a sanitizer on food contact surfaces. Use in wash and/or rinse water must comply with FDA limitations.

Perasan MP-2 (Antimicrobial Solution) For Meat, Poultry, Seafood, and Produce (ent-6349) ◆
May be used as a sanitizer on food contact surfaces. Use in wash and/or rinse water must comply with FDA limitations.

Perasan MP-2C (Antimicrobial Solution) For Meat, Poultry, Seafood, and Produce (ent-6350) ◆
May be used as a sanitizer on food contact surfaces. Use in wash and/or rinse water must comply with FDA limitations.

Peragreen® 5.6% Antimicrobial Solution (ent-7248) ◆
May be used as a sanitizer on food contact surfaces. Use in wash and/or rinse water must comply with FDA limitations.

Peragreen® 22 Antimicrobial Solution (ent-7289) ◆
May be used as a sanitizer on food contact surfaces. Use in wash and/or rinse water must comply with FDA limitations.

Perasan OG (Antimicrobial Solution) (ent-12982) ◆
May be used as a sanitizer on food contact surfaces. Use in wash and/or rinse water must comply with FDA limitations.

Peraspray Ready To Use Sanitizer/Disinfectant (ent-13203) ◆
May be used as a sanitizer on food contact surfaces. Use in wash and/or rinse water must comply with FDA limitations.

BioFruit XF-15 (Antimicrobial Solution) (ent-13794) ◆
May be used as a sanitizer on food contact surfaces. Use in wash and/or rinse water must comply with FDA limitations.

EnviroTech ReducX (Fungicide, Bactericide, Virucide) Acid Liquid Sanitizer and Disinfectant (ent-14005) ◆
May be used as a sanitizer on food contact surfaces. Use in wash and/or rinse water must comply with FDA limitations.

Peraguard Peracetic Acid (PAA) Floor & Equipment Sanitizer (ent-16676) ◆
May be used as a sanitizer on food contact surfaces. Use in wash and/or rinse water must comply with FDA limitations.

Peragrain A (ANTIMICROBIAL SOLUTION) (ent-19841) ◆
May be used as a sanitizer on food contact surfaces. Use in wash and/or rinse water must comply with FDA limitations.

Crop Products: Chlorine Materials

SES® Desinfectante agrícola (est-7429) ◆
Residual chlorine levels in the water in direct crop contact (when used pre-harvest) or as water from cleaning irrigation systems applied to the soil should not exceed the maximum residual disinfectant level under the Safe Drinking Water Act (4 mg/L (4ppm) expressed as chlorine, 0.8 mg/L (0.8 ppm) expressed as chlorine dioxide), except that chlorine products may be used in edible sprout production according to EPA label directions. May be used up to maximum labeled rates for disinfecting and sanitizing equipment or tools. No intervening event is necessary before equipment is used in contact with organic crops.

Livestock Products: Chlorine Materials

SoluVet Bio-Seguridad Desinfectante de alto nivel (est-8688) ◆
Chlorine products may be used up to maximum labeled rates for disinfecting and sanitizing equipment or tools (including dairy pipelines and tanks). Residual chlorine levels in the water in direct contact with food products or animals shall not exceed the maximum residual disinfectant limit under the Safe Drinking Water Act (4 mg/L (4ppm) expressed as chlorine, 0.8 mg/L (0.8 ppm) expressed as chlorine dioxide). May be used up to maximum labeled rates for sanitizing equipment or tools. Label instructions should be followed regarding requirements for rinsing or not rinsing prior to the equipment's next use.

OVOSES Desinfectante Avicola (est-16057) ◆
Chlorine products may be used up to maximum labeled rates for disinfecting and sanitizing equipment or tools (including dairy pipelines and tanks). Residual chlorine levels in the water in direct contact with food products or animals shall not exceed the maximum residual disinfectant limit under the Safe Drinking Water Act (4 mg/L (4ppm) expressed as chlorine, 0.8 mg/L (0.8 ppm) expressed as chlorine dioxide). May be used up to maximum labeled rates for sanitizing equipment or tools. Label instructions should be followed regarding requirements for rinsing or not rinsing prior to the equipment's next use.

Processing Products: Hypochlorous Acid

SES® Desinfección de alto nivel (est-7428) ◆
May be used in direct contact with post-harvest crop or food at levels approved by the FDA or the EPA for such a purpose. Such use must include a final rinse and residual chlorine levels in final rinse water shall not exceed the Maximum Residual Disinfectant Limit under the Safe Drinking Water Act, except that a final rinse is not required for use in FSIS inspected egg breaking facilities. When used as disinfectants and sanitizers for food contact surfaces, may be used up to maximum labeled rates and rinsing is not required unless mandated by the label use directions. May be used up to maximum labeled rates for disinfecting and sanitizing equipment or tools. No intervening event is necessary before equipment is used in organic production.

SES® Desinfectante agrícola (est-7430) ◆
May be used in direct contact with post-harvest crop or food at levels approved by the FDA or the EPA for such a purpose. Crop Products: Adjuvants, for use in crop pesticides

Evonik BREAK-THRU (deg-2155) ◆
For use as an inert ingredient in combination with permitted active pesticidal ingredients. May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Evonik BREAK-THRU S 279 (deg-5201) ◆
For use as an inert ingredient in combination with permitted active pesticidal ingredients. May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Evonik BREAK-THRU OE 446 (deg-5402) ◆
For use as an inert ingredient in combination with permitted active pesticidal ingredients. May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Evonik BREAK-THRU EM O 7 (deg-6079) ◆
For use as an inert ingredient in combination with permitted active pesticidal ingredients. May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Evonik ISOLAN GO 33 (deg-6080) ◆
For use as an inert ingredient in combination with permitted active pesticidal ingredients. May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Evonik TEGO STO 85 V (deg-6081) ◆
For use as an inert ingredient in combination with permitted active pesticidal ingredients. May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Evonik BREAK-THRU SP 133 (deg-6109) ◆
For use as an inert ingredient in combination with permitted active pesticidal ingredients. May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Evonik BREAK-THRU EM O 5 (deg-7096) ◆
For use as an inert ingredient in combination with permitted active pesticidal ingredients. May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Evonik BREAK-THRU S 200 (deg-7097) ◆
For use as an inert ingredient in combination with permitted active pesticidal ingredients. May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Evonik BREAK-THRU S 301 (deg-7098) ◆
For use as an inert ingredient in combination with permitted active pesticidal ingredients. May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Evonik BREAK THRU S 233 (deg-7419) ◆
For use as an inert ingredient in combination with permitted active pesticidal ingredients. May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Evonik BREAK THRU S 240 (deg-7420) ◆
For use as an inert ingredient in combination with permitted active pesticidal ingredients. May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Evonik Tegoplant (deg-7642) ◆
For use as an inert ingredient in combination with permitted active pesticidal ingredients. May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

EVONIK BREAK-THRU S 321 (deg-8212) ◆
For use as an inert ingredient in combination with permitted active pesticidal ingredients. May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

EVONIK TEGIN O V (deg-8233) ◆
For use as an inert ingredient in combination with permitted active pesticidal ingredients. May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

EVONIK BREAK-THRU OE 440 (deg-8583) ◆
For use as an inert ingredient in combination with permitted active pesticidal ingredients. May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Evonik NONIDET SF 3 (deg-10608) ◆
For use as an inert ingredient in combination with permitted active pesticidal ingredients. May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Evonik TEGO SML 20 (deg-11010) ◆
For use as an inert ingredient in combination with permitted active pesticidal ingredients. May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Evonik AERODISP® W 7520 (deg-11260) ◆
For use as an inert ingredient in combination with permitted active pesticidal ingredients. May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Evonik AEROSIL® 200 (deg-11261) ◆
For use as an inert ingredient in combination with permitted active pesticidal ingredients. May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Evonik AEROSIL® R 972 (deg-11262) ◆
For use as an inert ingredient in combination with permitted active pesticidal ingredients. May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Evonik AEROSIL® R 974 (deg-11263) ◆
For use as an inert ingredient in combination with permitted active pesticidal ingredients. May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Evonik AEROSIL® R 812 S (deg-11264) ◆
For use as an inert ingredient in combination with permitted active pesticidal ingredients. May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Evonik SIPERNAT® 22 Precipitated Silica (deg-11266) ◆
For use as an inert ingredient in combination with permitted active pesticidal ingredients. May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Evonik SIPERNAT® 22 S Precipitated Silica (deg-11267) ◆
For use as an inert ingredient in combination with permitted active pesticidal ingredients. May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Evonik SIPERNAT® 50 Precipitated Silica (deg-11268) ◆
For use as an inert ingredient in combination with permitted active pesticidal ingredients. May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Evonik SIPERNAT® 310 Precipitated Silica (deg-11269) ◆
For use as an inert ingredient in combination with permitted active pesticidal ingredients. May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Evonik SIPERNAT® 340 Precipitated Silica (deg-11270) ◆
For use as an inert ingredient in combination with permitted active pesticidal ingredients. May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Evonik SIPERNAT® 350 (deg-11271) ◆
For use as an inert ingredient in combination with permitted active pesticidal ingredients. May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Evonik ZEOFREE® 600 (deg-11272) ◆
For use as an inert ingredient in combination with permitted active pesticidal ingredients. May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Evonik BREAK-THRU 100 SL (deg-11275) ◆
For use as an inert ingredient in combination with permitted active pesticidal ingredients. May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Evonik SIPERNAT® 807 A Silica (deg-11283) ◆
For use as an inert ingredient in combination with permitted active pesticidal ingredients. May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Evonik ZEOFREE® PLUS 5782 (deg-11284) ◆
For use as an inert ingredient in combination with permitted active pesticidal ingredients. May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Evonik AERODISP® W 7622 (deg-11285) ◆
For use as an inert ingredient in combination with permitted active pesticidal ingredients. May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Evonik SURFYNOL 440 (deg-12904) ◆
For use as an inert ingredient in combination with permitted active pesticidal ingredients. May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Evonik SURFYNOL 465 (deg-12905) ◆
For use as an inert ingredient in combination with permitted active pesticidal ingredients. May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Evonik SURFYNOL 485 (deg-12906) ◆
For use as an inert ingredient in combination with permitted active pesticidal ingredients. May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Evonik SURFYNOL 485 W (deg-12907) ◆
For use as an inert ingredient in combination with permitted active pesticidal ingredients. May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Evonik BREAK THRU SD 260 (deg-15564) ◆
For use as an inert ingredient in combination with permitted active pesticidal ingredients. May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

AERODISP® W 7520 P (deg-16604) ◆
For use as an inert ingredient in combination with permitted active pesticidal ingredients. May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

BREAK-THRU EM V 85 (deg-18325) ◆
For use as an inert ingredient in combination with permitted active pesticidal ingredients. May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

SIPERNAT® 380 (deg-18795) ◆
For use as an inert ingredient in combination with permitted active pesticidal ingredients. May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Evonik REWOPAL EO 70 (deg-19578) ◆
For use as an inert ingredient in combination with permitted active pesticidal ingredients. May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Livestock Products: Probiotics

Evonik Ecobiol 500 Microbiological Feed Ingredient Bacillus amyloliquefaciens CECT 5940 (deg-14464)

Ecobiol Plus Microbiological Feed Ingredient Bacillus amyloliquefaciens CECT 5940 (deg-16602)

Processing Products: Peracetic Acid/Peroxyacetic Acid

Peraclean® 5 (Peroxyacetic Acid Solution) Sanitizer/Disinfectant (deg-0494) ◆
May be used as a sanitizer on food contact surfaces. Use in wash and/or rinse water must comply with FDA limitations.

Peraclean® 15 (Peroxyacetic Acid Solution) Sanitizer/Disinfectant (deg-0495) ◆
May be used as a sanitizer on food contact surfaces. Use in wash and/or rinse water must comply with FDA limitations.

Evonik Peraclean 22 CW (deg-5809) ◆
May be used as a sanitizer on food contact surfaces. Use in wash and/or rinse water must comply with FDA limitations.

Crop Products: Adjuvants, for use in crop pesticides

Bonne Org Sticker Agent for Use in Organic Production (bri-6389) ◆
For use as an inert ingredient in combination with permitted active pesticidal ingredients. May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Kompat Org Emulsifier - Compatibility Agent (bri-15024) ◆
For use as an inert ingredient in combination with permitted active pesticidal ingredients. May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Crop Products: Biopesticides

Ovex Ovicide for Use in Organic Production (bri-6813) ◆
May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Crop Products: Boron Products, Fertilizers, Blended with micronutrients, Potassium Chloride

Magnet-B Org 1-7-5 (bri-10804) ◆
Must be applied in a manner that minimizes chloride accumulation in the soil. Refer to specific ingredient categories for applicable use restrictions. Micronutrient deficiency must be documented by soil or tissue testing or other documented and verifiable method as approved by a certifying agent. Must not be used as an herbicide, defoliant or desiccant.

Crop Products: Botanical Pesticides

Bemix Insecticide for Use in Organic Production (bri-3400) ◆
May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

NemaKill Nematicide for Use in Organic Production (bri-3497) ◆
May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Slam Org Bactericide (bri-11567) ◆
May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Steward Bactericide (bri-12411) ◆
May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Boom Insecticide for Use in Organic Production (bri-14960) ◆
May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Reap Nematicide for Use in Organic Production (bri-17841) ◆
May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Fender Nematicide for Use in Organic Production (bri-18453) ◆
May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Crop Products: Calcium Chloride, Fertilizers and Soil Amendments, Blended – Allowed With Restrictions, Potassium Chloride

EvergreenOrg 3-3-3 (bri-5659) ◆
For use as a foliar spray to treat a physiological disorder associated with calcium uptake. Refer to specific ingredient categories for applicable use restrictions. Must be applied in a manner that minimizes chloride accumulation in the soil.

Invencible Forte 3-3-3 (bri-16723) ◆
For use as a foliar spray to treat a physiological disorder associated with calcium uptake. Refer to specific ingredient categories for applicable use restrictions. Must be applied in a manner that minimizes chloride accumulation in the soil.

Crop Products: Copper Products

Mamba Org Micronutrient Fertilizer (bri-17324) ◆
Micronutrient deficiency must be documented by soil or tissue testing or other documented and verifiable method as approved by a certifying agent. Must not be used as an herbicide, defoliant or desiccant.

Crop Products: Copper Products, Fertilizers, Blended with micronutrients, Zinc Products

Fosfi-Cal Org 1-8-0 (bri-5956) ◆
Refer to specific ingredient categories for applicable use restrictions. Micronutrient deficiency must be documented by soil or tissue testing or other documented and verifiable method as approved by a certifying agent. Must not be used as an herbicide, defoliant or desiccant.

Saeta Org 1-8-0 (bri-16326) ◆
Refer to specific ingredient categories for applicable use restrictions. Micronutrient deficiency must be documented by soil or tissue testing or other documented and verifiable method as approved by a certifying agent. Must not be used as an herbicide, defoliant or desiccant.

Crop Products: Fertilizers and Soil Amendments, Blended

Humiplant 6% Organic Soil Ammendent and Conditioner (bri-5130)

Crop Products: Fertilizers and Soil Amendments, Blended – Allowed With Restrictions, Potassium Chloride

Best-K Org™ Foliar Nutrition 0-0-13 (bri-10754) ◆
Refer to specific ingredient categories for applicable use restrictions. Must be applied in a manner that minimizes chloride accumulation in the soil.

Crop Products: Fungicides

Jaque Mate Fungicide for Use in Organic Production (bri-3392) ◆
When used pre-harvest, may only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices. When used in post-harvest handling of raw agricultural commodities, not subject to the requirements of 205.206(e).

Cyclops Fungicide for Use in Organic Production (bri-3974) ◆
When used pre-harvest, may only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices. When used in post-harvest handling of raw agricultural commodities, not subject to the requirements of 205.206(e).

Burst Fungicide for Use in Organic Production (bri-17842) ◆
When used pre-harvest, may only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices. When used in post-harvest handling of raw agricultural commodities, not subject to the requirements of 205.206(e).

Crop Products: Growth Regulators for Plants

Sucker Zap Tobacco Sucker Control Agent Plant Growth Regulator for Use in Organic Production (bri-15681) ◆
May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Smash Tobacco Sucker Control Agent Plant Growth Regulator for Use in Organic Production (bri-17843) ◆
May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Outbreak Tobacco Sucker Control Agent Plant Growth Regulator for Use in Organic Production (bri-19656) ◆
May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Crop Products: Herbicides

Herbor-G Herbicide (bri-5268) ◆
May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Weed Crush Herbicide for Use in Organic Production (bri-14769) ◆
May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Torch Org Herbicide for Use in Organic Production (bri-18566) ◆
May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Crop Products: Oils

Aramite Insecticide (bri-2474) ◆
May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Bent Insecticide for Use in Organic Production (bri-2690) ◆
May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

IC Turbo Insecticide for Use in Organic Production (bri-14240) ◆
May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Akar-X Insecticide for Use in Organic Production (bri-16330) ◆
May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Crop Products: Repellents – Allowed With Restrictions

Zig-Zag Natural Oil Insect Repellent (bri-14958) ◆
May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Tickless Natural Oil Insect Repellent (bri-14959) ◆
May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Processing Products: Vitamin D3

BRAT-G Rodenticide for Use in Organic Production (bri-18122) ◆
For use as a pesticide only in conjunction with the facility pest management practices provided for in paragraphs 205.271(a) and (b) and only if those practices are not effective to prevent or control pests alone. For use as a rodenticide.

Crop Products: Fertilizers and Soil Amendments, Blended – Allowed With Restrictions, Iron Products

EZ-GRO IRON (FE) 10% 9-0-0 (hgi-16790) ◆
Refer to specific ingredient categories for applicable use restrictions. Micronutrient deficiency must be documented by soil or tissue testing or other documented and verifiable method as approved by a certifying agent. Must not be used as an herbicide, defoliant or desiccant.

Crop Products: Fertilizers, Blended with micronutrients, Fertilizers, Blended with synthetic magnesium sulfate, Iron Products

EZ-GRO Crushed Completion Bloom 1-11-0 Bud & Bloom Fertilizer (hgi-11498) ◆
May be used as a plant or soil amendment if soil deficiency of magnesium is documented by testing. Refer to specific ingredient categories for applicable use restrictions. Micronutrient deficiency must be documented by soil or tissue testing or other documented and verifiable method as approved by a certifying agent. Must not be used as an herbicide, defoliant or desiccant.

Crop Products: Fertilizers, Blended with micronutrients, Iron Products

EZ-GRO Crushed Creation 6-1-1 Concentrated Plant Nutrients (hgi-11054) ◆
Refer to specific ingredient categories for applicable use restrictions. Micronutrient deficiency must be documented by soil or tissue testing or other documented and verifiable method as approved by a certifying agent. Must not be used as an herbicide, defoliant or desiccant.

Crop Products: Fertilizers, Blended with synthetic magnesium sulfate

EZ-GRO Crushed Catapult 1.5-1.5-1.5 (hgi-11051) ◆
May be used as a plant or soil amendment if soil deficiency of magnesium is documented by testing.

EZ-GRO Crushed Complexi-Tea 1.5-1.5-1.5 (hgi-11052) ◆
May be used as a plant or soil amendment if soil deficiency of magnesium is documented by testing.

EZ-GRO Crushed Correction 0.7-0-0.8 (hgi-11053) ◆
May be used as a plant or soil amendment if soil deficiency of magnesium is documented by testing.

Crop Products: Fertilizers, Blended with synthetic magnesium sulfate, Iron Products

EZ-Gro Crushed Transition 1.5-1.5-1.5 (hgi-10564) ◆
May be used as a plant or soil amendment if soil deficiency of magnesium is documented by testing. Micronutrient deficiency must be documented by soil or tissue testing or other documented and verifiable method as approved by a certifying agent. Must not be used as an herbicide, defoliant or desiccant.

Crop Products: Humic Acids – alkali extracted

Crop Products: Copper Products

Quimag Quimicos Aguila Copper Sulfate Crystal (fab-0991) ◆
Micronutrient deficiency must be documented by soil or tissue testing or other documented and verifiable method as approved by a certifying agent. Must not be used as an herbicide, defoliant or desiccant.

QUIMAG Químicos Águila Fertiazul Sulfato De Cobre Pentahidratado (fab-8239) ◆
Micronutrient deficiency must be documented by soil or tissue testing or other documented and verifiable method as approved by a certifying agent. Must not be used as an herbicide, defoliant or desiccant.

Quimag Quimicos Aguila Copper Sulfate Crystal Fertilizer (fab-13527) ◆
Micronutrient deficiency must be documented by soil or tissue testing or other documented and verifiable method as approved by a certifying agent. Must not be used as an herbicide, defoliant or desiccant.

Crop Products: Copper Sulfate

Quimag Quimicos Aguila Copper Sulfate Crystal (fab-0979) ◆
For plant disease control, must be used in a manner that minimizes accumulation of copper in the soil. For use as an algicide in aquatic rice systems and for tadpole shrimp control in aquatic rice systems, must not exceed one application per field during any 24-month period. Application rates are limited to those which do not increase baseline soil test values for copper over a time frame agreed upon by the producer and accredited certifying agent. May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Quimag Quimicos Aguila Copper Sulfate Crystal - Crop (fab-1986) ◆
For plant disease control, must be used in a manner that minimizes accumulation of copper in the soil. Crop Products: Chlorine Dioxide

GC 30 Disinfectant/Sanitizer/Tuberculocide/Virucide */Fungicide/Algaecide/Slimicide/Deodorizer (gcr-11069) ◆
Residual chlorine levels in the water in direct crop contact (when used pre-harvest) or as water from cleaning irrigation systems applied to the soil should not exceed the maximum residual disinfectant level under the Safe Drinking Water Act (4 mg/L (4ppm) expressed as chlorine, 0.8 mg/L (0.8 ppm) expressed as chlorine dioxide), except that chlorine products may be used in edible sprout production according to EPA label directions. May be used up to maximum labeled rates for disinfecting and sanitizing equipment or tools. No intervening event is necessary before equipment is used in contact with organic crops.

Processing Products: Chlorine Dioxide

GC 2 Disinfectant/Sanitizer/Tuberculocide/Virucide */Fungicide/Algaecide/Slimicide/Deodorizer (gcr-15841) ◆
May be used in direct contact with post-harvest crop or food at levels approved by the FDA or the EPA for such a purpose. Such use must include a final rinse and residual chlorine levels in final rinse water shall not exceed the Maximum Residual Disinfectant Limit under the Safe Drinking Water Act, except that a final rinse is not required for use in FSIS inspected egg breaking facilities. When used as disinfectants and sanitizers for food contact surfaces, may be used up to maximum labeled rates and rinsing is not required unless mandated by the label use directions. May be used up to maximum labeled rates for disinfecting and sanitizing equipment or tools. No intervening event is necessary before equipment is used in organic production.

GC 12.5 Disinfectant/Sanitizer/Tuberculocide/Virucide */Fungicide/Algaecide/Slimicide/Deodorizer (gcr-16015) ◆
May be used in direct contact with post-harvest crop or food at levels approved by the FDA or the EPA for such a purpose. Such use must include a final rinse and residual chlorine levels in final rinse water shall not exceed the Maximum Residual Disinfectant Limit under the Safe Drinking Water Act, except that a final rinse is not required for use in FSIS inspected egg breaking facilities. When used as disinfectants and sanitizers for food contact surfaces, may be used up to maximum labeled rates and rinsing is not required unless mandated by the label use directions. Crop Products: Boron Products, Copper Products, Fertilizers, Blended with micronutrients

K boron Ca Fertilizante foliar de resistencia y calidad Bioestimulante Líquido Concentrado (grb-7455) ◆
Micronutrient deficiency must be documented by soil or tissue testing or other documented and verifiable method as approved by a certifying agent. Must not be used as an herbicide, defoliant or desiccant. Refer to specific ingredient categories for applicable use restrictions.

Stoma-OR Bio estimulate Orgánico-Osmoregulador Líquido Emulsificable (grb-14083) ◆
Refer to specific ingredient categories for applicable use restrictions. Micronutrient deficiency must be documented by soil or tissue testing or other documented and verifiable method as approved by a certifying agent. Must not be used as an herbicide, defoliant or desiccant.

N+ERGY Optimizador Hídrico (grb-19754) ◆
Refer to specific ingredient categories for applicable use restrictions. Micronutrient deficiency must be documented by soil or tissue testing or other documented and verifiable method as approved by a certifying agent. Must not be used as an herbicide, defoliant or desiccant.

Crop Products: Boron Products, Copper Products, Fertilizers, Blended with micronutrients, Iron Products, Magnesium Sulfate – Allowed With Restrictions, Manganese Products, Zinc Products

Organiflor dos Fertilizante foliar para amarre y cuajado de frutos. Bioestimulante Líquido Soluble (grb-7460) ◆
May be used as a plant or soil amendment if soil deficiency of magnesium is documented by testing. Refer to specific ingredient categories for applicable use restrictions. Micronutrient deficiency must be documented by soil or tissue testing or other documented and verifiable method as approved by a certifying agent. Must not be used as an herbicide, defoliant or desiccant.

Crop Products: Boron Products, Copper Products, Fertilizers, Blended with micronutrients, Iron Products, Manganese Products, Zinc Products

ViraBlock Orgánico Bioestimulante Promotor de resistencia vegetal Líquido Soluble (grb-15032) ◆
Refer to specific ingredient categories for applicable use restrictions. Micronutrient deficiency must be documented by soil or tissue testing or other documented and verifiable method as approved by a certifying agent. Must not be used as an herbicide, defoliant or desiccant.

ProBo 53VF Bioestimulante Liquido Ligeramente Viscoso (grb-15869) ◆
Refer to specific ingredient categories for applicable use restrictions. Micronutrient deficiency must be documented by soil or tissue testing or other documented and verifiable method as approved by a certifying agent. Must not be used as an herbicide, defoliant or desiccant.

Crop Products: Boron Products, Fertilizers, Blended with micronutrients

OrganiMaster cuatro Fertilizante foliar para maduración y calidad de frutos. Bioestimulante Líquido Soluble (grb-7471) ◆
Refer to specific ingredient categories for applicable use restrictions. Micronutrient deficiency must be documented by soil or tissue testing or other documented and verifiable method as approved by a certifying agent. Must not be used as an herbicide, defoliant or desiccant.

Crop Products: Boron Products, Fertilizers, Blended with micronutrients, Zinc Products

OrganiGrow tres Fertilizante foliar para crecimiento inicial de frutos Bioestimulante Líquido Soluble (grb-7468) ◆
Refer to specific ingredient categories for applicable use restrictions. Micronutrient deficiency must be documented by soil or tissue testing or other documented and verifiable method as approved by a certifying agent. Must not be used as an herbicide, defoliant or desiccant.

Organiflush uno Fertilizante foliar para prefloración. Bioestimulante Líquido Soluble (grb-7470) ◆
Refer to specific ingredient categories for applicable use restrictions. Micronutrient deficiency must be documented by soil or tissue testing or other documented and verifiable method as approved by a certifying agent. Must not be used as an herbicide, defoliant or desiccant.

GreenZinc BMo Fertilizante foliar alto en Zn, B, Mo y aminoácidos Bioestimulante LÍQUIDO SOLUBLE (grb-18183) ◆
Refer to specific ingredient categories for applicable use restrictions. Micronutrient deficiency must be documented by soil or tissue testing or other documented and verifiable method as approved by a certifying agent. Must not be used as an herbicide, defoliant or desiccant.

Genera (grb-18267) ◆
Micronutrient deficiency must be documented by soil or tissue testing or other documented and verifiable method as approved by a certifying agent. Must not be used as an herbicide, defoliant or desiccant. Refer to specific ingredient categories for applicable use restrictions.

terrum raíces activas (grb-19755) ◆
Refer to specific ingredient categories for applicable use restrictions. Micronutrient deficiency must be documented by soil or tissue testing or other documented and verifiable method as approved by a certifying agent. Must not be used as an herbicide, defoliant or desiccant.

Crop Products: Botanical Pesticides

Akabrown Acaricida Orgánico - Bioacaricida Líquido Emulsionable (grb-3778) ◆
May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

eBioluzion Plus vO Insecticida de amplio espectro de acción Líquido Soluble (grb-3783) ◆
May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

FullKover O Orgánico Fungicida Orgánico Inductor de Resistencia Líquido Soluble (grb-3784) ◆
May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

PestilOut Repelente Insecticida Compuesto a Base de Productos Orgánicos - Bioinsecticida Líquido Emulsionable (grb-3789) ◆
May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

TripzOut Insecticida Biológico-Botánico para el Control de Trips- Bioinsecticida Líquido Soluble (grb-3791) ◆
May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

BioFumigate-Or N+ Biofumigante Orgánico de Suelos Agrícolas Líquido Emulsionable (grb-4961) ◆
May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

PestilGreen Repelente insecticida compuesto a base de productos orgánicos Bioinsecticida Líquido emulsionable (grb-8296) ◆
May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Aka-X-Empt Acaricida Orgánico - Bioacaricida Líquido Emulsionable (grb-13373) ◆
May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Pestilent (SINERGISTA) (grb-14008) ◆
May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Atzingao Ovicida-Acaricida de amplio espectro Líquido Emulsionable (grb-15031) ◆
May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

ProbO 18 IF Insecticida de amplio espectro de acción LÍQUIDO SOLUBLE (grb-16694) ◆
May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

ProbO 24 FF Fungicida orgánico inductor de resistencia LÍQUIDO SOLUBLE (grb-16695) ◆
May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

PiQ2 Insecticida Biológico/Líquido (grb-18051) ◆
May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Hongo Cero BioFungicida Orgánico Líquido Soluble (grb-18116) ◆
May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Forisekt Mix Insecticida de amplio espectro de acción Líquido Soluble (grb-19785) ◆
May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Crop Products: Fertilizers and Soil Amendments, Blended

FulvimaxAlga+ Mejorador Orgánico y Biológico de Suelos Líquido Soluble (grb-3785)

Crop Products: Fertilizers, Blended with micronutrients, Fertilizers, Blended with synthetic magnesium sulfate, Iron Products, Manganese Products

Multigreen L Fertilizante complejo con micronutrientes quelatados - Bioestimulante Líquido Soluble (grb-3788) ◆
May be used as a plant or soil amendment if soil deficiency of magnesium is documented by testing. Refer to specific ingredient categories for applicable use restrictions. Micronutrient deficiency must be documented by soil or tissue testing or other documented and verifiable method as approved by a certifying agent. Must not be used as an herbicide, defoliant or desiccant.

Crop Products: Fish Products, Liquid, Stabilized

Biocharger Bioestimulante Orgánico. Líquido Soluble (grb-3782)

Crop Products: Fungicides

RoyaOut Fungicida Orgánico Microbiológico Líquido Emulsionable (grb-4963) ◆
When used pre-harvest, may only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices. When used in post-harvest handling of raw agricultural commodities, not subject to the requirements of 205.206(e).

Crop Products: Microbial Pesticides

Best Ultra F Fungicida Microbiológico de Protección Foliar Inductor de Resistencia Sistemática Vegetal Líquido Soluble (grb-3779) ◆
May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Best Ultra S Fungicida Microbiológico de Amplio Espectro para Enfermedades de Raiz Líquido Soluble (grb-3780) ◆
May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Biobacter O Bactericida inductor de resistencia - Biobactericida Líquido soluble (grb-3781) ◆
May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Larbiol 2X Larvicida Biológico - Bioinsecticida Líquido Soluble (grb-3786) ◆
May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

MildOut Plus Biofungicida Para el Control de Mildius y Cenicillas Líquido Soluble (grb-3787) ◆
May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Trichobiol Agente de Biocontrol de Hongos Fitopatógenos Líquido Soluble (grb-3790) ◆
May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

NemaxxionBiol Nematicida Biológico de Amplio Espectro - Bionematicida Líquido Soluble (grb-4962) ◆
May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

BacterGreen Bactericida inductor de resistencia-Biobactericida Líquido Soluble (grb-8294) ◆
May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

NemaGreen Nematicida biológico de amplio espectro Bionematicida Líquido Soluble (grb-8295) ◆
May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Crop Products: Microbial Products

Entomaxx 5x2 Insecticida Biológico-botánico de Amplio Espectro Líquido Emulsionable (grb-7446) ◆
May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

GreenPlanet Medi One 4-3-3 (hit-8582) ■◆

This product contains highly soluble nitrogen and must be applied in a manner that does not contribute to the contamination of crops, soil or water. Its use must be part of an organic system plan that maintains or improves the natural resources of the operation, including soil and water quality, and comply with crop nutrient and soil fertility requirements. May be used as a plant or soil amendment if soil deficiency of magnesium is documented by testing. Refer to specific ingredient categories for applicable use restrictions. Micronutrient deficiency must be documented by soil or tissue testing or other documented and verifiable method as approved by a certifying agent. Must not be used as an herbicide, defoliant or desiccant.

For plant disease control, must be used in a manner that minimizes accumulation of copper in the soil. For use as an algicide in aquatic rice systems and for tadpole shrimp control in aquatic rice systems, must not exceed one application per field during any 24-month period. Application rates are limited to those which do not increase baseline soil test values for copper over a time frame agreed upon by the producer and accredited certifying agent. May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Crop Products: Adjuvants, for use in crop pesticides

Suppressor 3112 (hyc-8365) ◆
For use as an inert ingredient in combination with permitted active pesticidal ingredients. May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Suppressor ORG60 (hyc-13110) ◆
For use as an inert ingredient in combination with permitted active pesticidal ingredients. May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Suppressor 3101 (hyc-16671) ◆
For use as an inert ingredient in combination with permitted active pesticidal ingredients. May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Crop Products: Hydrogen Peroxide

Hydroxycide 527 Agricultural Use Fungicide · Bactericide · Algaecide · Cleaner & Deodorizer (hyc-17706) ◆
For use as disinfectant or sanitizer, including irrigation system cleaner.

Crop Products: Peracetic Acid/Peroxyacetic Acid

HYDROXYCIDE 527 Agricultural Use Fungicide* · Bactericide* · Algaecide · Cleaner · Deodorizer (hyc-15903) ◆
For use as a pesticide to control fireblight. May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Hydroxycide 1522 Agricultural Use Non-public Health Fungicide • Bactericide • Algaecide • Cleaner & Deodorizer (hyc-19334) ◆
For disinfecting facility, processing equipment, seed and asexually propagated planting material.

Processing Products: Agricultural Ingredients, Defoamers – Allowed With Restrictions

Suppressor ORG60 (hyc-10266) ◆ 10
Nonorganic agricultural ingredients may be used in processed products labeled as "Made with Organic (specified ingredients or food group(s))." Prohibited in the production of products labeled as "Organic" or "100% Organic." Refer to specific ingredient categories for applicable use restrictions.

Processing Products: Chlorine Materials

San-I-King No. 451 Liquid Sodium Hypochlorite (hyc-1129) ◆
May be used in direct contact with post-harvest crop or food at levels approved by the FDA or the EPA for such a purpose. Such use must include a final rinse and residual chlorine levels in final rinse water shall not exceed the Maximum Residual Disinfectant Limit under the Safe Drinking Water Act, except that a final rinse is not required for use in FSIS inspected egg breaking facilities. When used as disinfectants and sanitizers for food contact surfaces, may be used up to maximum labeled rates and rinsing is not required unless mandated by the label use directions. May be used up to maximum labeled rates for disinfecting and sanitizing equipment or tools. No intervening event is necessary before equipment is used in organic production.

Processing Products: Peracetic Acid/Peroxyacetic Acid

Hydroxysan Plus Cleaner • Disinfectant • Food Contact Sanitizer (hyc-6369) ◆
May be used as a sanitizer on food contact surfaces. Use in wash and/or rinse water must comply with FDA limitations.

HydriShield PA 22 HP (hyc-11517) ◆
May be used as a sanitizer on food contact surfaces. Use in wash and/or rinse water must comply with FDA limitations.

HydriShield PA 15 HP (hyc-11902) ◆
May be used as a sanitizer on food contact surfaces. Use in wash and/or rinse water must comply with FDA limitations.

Hydroxycide 1522 Agricultural Use Non-public Health Fungicide • Bactericide • Algaecide • Cleaner & Deodorizer (hyc-18277) ◆
May be used as a sanitizer on food contact surfaces. Use in wash and/or rinse water must comply with FDA limitations.

Hydroxysan + No. 494 Disinfectant • Food Contact Sanitizer • Viricide • Controls Non-public Health Mold and Mildew • Cleaner • Deodorizer (hyc-18720) ◆
May be used as a sanitizer on food contact surfaces. Use in wash and/or rinse water must comply with FDA limitations.

Hydroxysan 1522 Disinfectant • Food Contact Sanitizer • Non-Food Contact Sanitizer • Non-public Health Fungicide • Cleaner • Deodorizer (hyc-19060) ◆
May be used as a sanitizer on food contact surfaces. Use in wash and/or rinse water must comply with FDA limitations.

Crop Products: Biopesticides

ACS-811 Biological Pesticide (iul-16414) ◆
May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Crop Products: Copper Products, Fertilizers, Blended with micronutrients

Alltech Crop Science Agro Mos (iul-10691) ◆
Refer to specific ingredient categories for applicable use restrictions. Micronutrient deficiency must be documented by soil or tissue testing or other documented and verifiable method as approved by a certifying agent. Must not be used as an herbicide, defoliant or desiccant.

Alltech Crop Science CHROMA micronutrient fertilizer (iul-11749) ◆
Refer to specific ingredient categories for applicable use restrictions. Micronutrient deficiency must be documented by soil or tissue testing or other documented and verifiable method as approved by a certifying agent. Must not be used as an herbicide, defoliant or desiccant.

Crop Products: Copper Products, Fertilizers, Blended with micronutrients, Iron Products, Manganese Products

Alltech Crop Science Crop Set® Micronutrient Fertilizer (iul-2429) ◆
Refer to specific ingredient categories for applicable use restrictions. Micronutrient deficiency must be documented by soil or tissue testing or other documented and verifiable method as approved by a certifying agent. Must not be used as an herbicide, defoliant or desiccant.

Alltech Crop Science Viable (iul-8647) ◆
Refer to specific ingredient categories for applicable use restrictions. Micronutrient deficiency must be documented by soil or tissue testing or other documented and verifiable method as approved by a certifying agent. Must not be used as an herbicide, defoliant or desiccant.

Crop Products: Copper Products, Fertilizers, Blended with micronutrients, Iron Products, Manganese Products, Zinc Products

Alltech Crop Science Soil Set® Micronutrient Fertilizer (iul-2428) ◆
Refer to specific ingredient categories for applicable use restrictions. Micronutrient deficiency must be documented by soil or tissue testing or other documented and verifiable method as approved by a certifying agent. Must not be used as an herbicide, defoliant or desiccant.

Alltech Crop Science Turn (iul-8645) ◆
Refer to specific ingredient categories for applicable use restrictions. Micronutrient deficiency must be documented by soil or tissue testing or other documented and verifiable method as approved by a certifying agent. Must not be used as an herbicide, defoliant or desiccant.

Alltech Crop Science Galvanize Contact (iul-10479) ◆
Refer to specific ingredient categories for applicable use restrictions. Micronutrient deficiency must be documented by soil or tissue testing or other documented and verifiable method as approved by a certifying agent. Must not be used as an herbicide, defoliant or desiccant.

Crop Products: Copper Products, Fertilizers, Blended with micronutrients, Manganese Products, Zinc Products

Alltech Crop Science Grain Set (iul-10693) ◆
Refer to specific ingredient categories for applicable use restrictions. Micronutrient deficiency must be documented by soil or tissue testing or other documented and verifiable method as approved by a certifying agent. Must not be used as an herbicide, defoliant or desiccant.

Crop Products: Botanical Pesticides

Scary Garlic Plus (asj-3372) ◆
May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

IAN METAGARLIC RP Insecticida Orgánico (asj-15709) ◆
May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

GARLIC MAX Organic Insecticide (asj-16570) ◆
May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Crop Products: Neem and Neem Derivatives

Cinnapro Natural Miticide (asj-3774) ◆
May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

IAN CINNAMO Acaricida Orgánico (asj-15711) ◆
May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

IAN BAJA NEEM Insecticida Orgánico (asj-15721) ◆
May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

CINNAPLUS Natural Miticide (asj-16571) ◆
May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Crop Products: Soap

KOCH Jabón Potásico Insecticida y Acaricida (asj-3631) ◆
For use as an algicide/demosser, herbicide or insecticide. When used as an herbicide may only be used for farmstead maintenance (roadways, ditches, right of ways, building perimeters) and ornamental crops. May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

IAN KSOAP MB Jabón Potásico Insecticida y Acaricida Orgánico (asj-15710) ◆
For use as an algicide/demosser, herbicide or insecticide. When used as an herbicide may only be used for farmstead maintenance (roadways, ditches, right of ways, building perimeters) and ornamental crops. May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

KO PLUS Potassium Soap Pesticide and Acraricide (asj-16572) ◆
For use as an algicide/demosser, herbicide or insecticide. When used as an herbicide may only be used for farmstead maintenance (roadways, ditches, right of ways, building perimeters) and ornamental crops. May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Processing Products: Chlorine Materials

QuimiTech BIOCLOR Limpiador Concentrado a Base de Hipoclorito de Sodio (iqt-13784) ◆
May be used in direct contact with post-harvest crop or food at levels approved by the FDA or the EPA for such a purpose. Such use must include a final rinse and residual chlorine levels in final rinse water shall not exceed the Maximum Residual Disinfectant Limit under the Safe Drinking Water Act, except that a final rinse is not required for use in FSIS inspected egg breaking facilities. When used as disinfectants and sanitizers for food contact surfaces, may be used up to maximum labeled rates and rinsing is not required unless mandated by the label use directions. May be used up to maximum labeled rates for disinfecting and sanitizing equipment or tools. No intervening event is necessary before equipment is used in organic production.

Processing Products: Peracetic Acid/Peroxyacetic Acid

QuimiTech Zone 15 (iqt-10475) ◆
May be used as a sanitizer on food contact surfaces. Use in wash and/or rinse water must comply with FDA limitations.

Crop Products: Copper Sulfate

Mastercop Bactericide/Fungicide (iis-7534) ◆
For plant disease control, must be used in a manner that minimizes accumulation of copper in the soil. For use as an algicide in aquatic rice systems and for tadpole shrimp control in aquatic rice systems, must not exceed one application per field during any 24-month period. Application rates are limited to those which do not increase baseline soil test values for copper over a time frame agreed upon by the producer and accredited certifying agent. May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Crop Products: Botanical Pesticides

AgroIQC INTERGOBER Extracto de gobernadora (Larrea tridentata) Fungicida y Bactericida Botanico/Líquido Soluble (iqc-9008) ◆
May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

AgroIQC INTERNEEM-A Extracto de Neem + Extracto de Canela Insecticida y/o Acaricida Botánico/Concentrado Emulsionable (iqc-9009) ◆
May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Agro IQC INTERPIRET Extracto de Tagetes (Tagetes spp.) Insecticida Botánico/Concentrado Emulsionable (iqc-10434) ◆
May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

CANEEMA 70 EC INSECTICIDA, ACARICIDA - BOTÁNICO EXTRACTO DE NEEN+EXTRACTO CANELA (iqc-10744) ◆
May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

PIRETAGE 90 EC INSECTICIDA-BOTÁNICO EXTRACTO DE TAGETES (iqc-10745) ◆
May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

EXTRAGOBER 95 SL FUNGICIDA, BACTERICIDA - BOTANICO EXTRACTO DE GOBERNADORA (iqc-10820) ◆
May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Crop Products: Copper Sulfate

AgroIQC COPPERSYST Sulfato de Cobre Pentahidratado Fungicida Agrícola/Solución Acuosa (iqc-13370) ◆
For plant disease control, must be used in a manner that minimizes accumulation of copper in the soil. For use as an algicide in aquatic rice systems and for tadpole shrimp control in aquatic rice systems, must not exceed one application per field during any 24-month period. Application rates are limited to those which do not increase baseline soil test values for copper over a time frame agreed upon by the producer and accredited certifying agent. May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Crop Products: Coppers, fixed

AgroIQC CUPERQUIMM SUPER Oxicloruro de Cobre Fungicida Agrícola/Polvo Humectable (iqc-17861) ◆
For plant disease control. Must be used in a manner that minimizes copper accumulation in the soil and shall not be used as herbicides. May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

AgroIQC SUPERFLUABLE Oxicloruro de Cobre Fungicida Agrícola/Suspensión Acuosa (iqc-17863) ◆
For plant disease control. Must be used in a manner that minimizes copper accumulation in the soil and shall not be used as herbicides. May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Crop Products: Elemental Sulfur

AgroIQC INTERSUL 725 Azufre Elemental Acaricida/Suspensión Acuosa (iqc-17862) ◆
For use as plant disease control, or as an insecticide (including acaricide or mite control). For use as slug and snail bait. May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Crop Products: Humic Acids – alkali extracted

HUMIC 12 ACIDOS HÚMICOS Fertilizante Bioactivador-Catalizador-Estimulante/Líquido (iqc-16578)

Crop Products: Boron Products

Biomin Boron (jhb-9265) ◆
Micronutrient deficiency must be documented by soil or tissue testing or other documented and verifiable method as approved by a certifying agent. Must not be used as an herbicide, defoliant or desiccant.

Biomin Boron Powder 5-0-0 (jhb-6872) ◆
Micronutrient deficiency must be documented by soil or tissue testing or other documented and verifiable method as approved by a certifying agent. Must not be used as an herbicide, defoliant or desiccant.

Crop Products: Boron Products, Cobalt Products, Copper Products, Fertilizers, Blended with micronutrients, Iron Products, Magnesium Sulfate – Allowed With Restrictions, Manganese Products, Molybdenum Products, Zinc Products

Nutrimin 534-SP (jhb-19093) ◆
Refer to specific ingredient categories for applicable use restrictions. Micronutrient deficiency must be documented by soil or tissue testing or other documented and verifiable method as approved by a certifying agent. Must not be used as an herbicide, defoliant or desiccant. May be used as a plant or soil amendment if soil deficiency of magnesium is documented by testing.

Buffermin 534-SP (jhb-19094) ◆
Refer to specific ingredient categories for applicable use restrictions. Micronutrient deficiency must be documented by soil or tissue testing or other documented and verifiable method as approved by a certifying agent. Must not be used as an herbicide, defoliant or desiccant. May be used as a plant or soil amendment if soil deficiency of magnesium is documented by testing.

Crop Products: Boron Products, Cobalt Products, Copper Products, Iron Products, Magnesium Sulfate – Allowed With Restrictions, Manganese Products, Molybdenum Products, Zinc Products

BIOMIN 446-SP (jhb-10761) ◆
May be used as a plant or soil amendment if soil deficiency of magnesium is documented by testing. Micronutrient deficiency must be documented by soil or tissue testing or other documented and verifiable method as approved by a certifying agent. Must not be used as an herbicide, defoliant or desiccant.

Biomin 454-SP (jhb-13459) ◆
May be used as a plant or soil amendment if soil deficiency of magnesium is documented by testing. Micronutrient deficiency must be documented by soil or tissue testing or other documented and verifiable method as approved by a certifying agent. Must not be used as an herbicide, defoliant or desiccant.

Biomin 534-SP (jhb-13470) ◆
May be used as a plant or soil amendment if soil deficiency of magnesium is documented by testing. Micronutrient deficiency must be documented by soil or tissue testing or other documented and verifiable method as approved by a certifying agent. Must not be used as an herbicide, defoliant or desiccant.

Nutrimin 534 Special (jhb-15011) ◆
May be used as a plant or soil amendment if soil deficiency of magnesium is documented by testing. Micronutrient deficiency must be documented by soil or tissue testing or other documented and verifiable method as approved by a certifying agent. Must not be used as an herbicide, defoliant or desiccant.

Crop Products: Boron Products, Cobalt Products, Copper Products, Iron Products, Manganese Products, Molybdenum Products, Zinc Products

BIOMIN 464-SP (jhb-10762) ◆
Micronutrient deficiency must be documented by soil or tissue testing or other documented and verifiable method as approved by a certifying agent. Must not be used as an herbicide, defoliant or desiccant.

BIOMIN 347-SP (jhb-18256) ◆
Micronutrient deficiency must be documented by soil or tissue testing or other documented and verifiable method as approved by a certifying agent. Must not be used as an herbicide, defoliant or desiccant.

Crop Products: Boron Products, Copper Products, Iron Products, Magnesium Sulfate – Allowed With Restrictions, Manganese Products, Zinc Products

Biomin Booster 126 (jhb-0020) ◆
May be used as a plant or soil amendment if soil deficiency of magnesium is documented by testing. Micronutrient deficiency must be documented by soil or tissue testing or other documented and verifiable method as approved by a certifying agent. Must not be used as an herbicide, defoliant or desiccant.

Biomin Booster 153 (jhb-0021) ■◆
May be used as a plant or soil amendment if soil deficiency of magnesium is documented by testing. Micronutrient deficiency must be documented by soil or tissue testing or other documented and verifiable method as approved by a certifying agent. Must not be used as an herbicide, defoliant or desiccant.

Biomin 235-L (jhb-11128) ◆
May be used as a plant or soil amendment if soil deficiency of magnesium is documented by testing. Micronutrient deficiency must be documented by soil or tissue testing or other documented and verifiable method as approved by a certifying agent. Must not be used as an herbicide, defoliant or desiccant.

Crop Products: Boron Products, Fertilizers, Blended with micronutrients

Biomin® Cal-Boro Calcium with Boron (jhb-0156) ◆
Refer to specific ingredient categories for applicable use restrictions. Micronutrient deficiency must be documented by soil or tissue testing or other documented and verifiable method as approved by a certifying agent. Must not be used as an herbicide, defoliant or desiccant.

Biomin® Cal-Boro Light Calcium with Boron (jhb-0476) ◆
Refer to specific ingredient categories for applicable use restrictions. Micronutrient deficiency must be documented by soil or tissue testing or other documented and verifiable method as approved by a certifying agent. Must not be used as an herbicide, defoliant or desiccant.

BIOMIN CALBOR-L (jhb-10763) ◆
Refer to specific ingredient categories for applicable use restrictions. Micronutrient deficiency must be documented by soil or tissue testing or other documented and verifiable method as approved by a certifying agent. Must not be used as an herbicide, defoliant or desiccant.

Biomin CalBor-SP Powder (jhb-13133) ◆
Refer to specific ingredient categories for applicable use restrictions. Micronutrient deficiency must be documented by soil or tissue testing or other documented and verifiable method as approved by a certifying agent. Must not be used as an herbicide, defoliant or desiccant.

BIOMIN Cal-Boro Complexed Minerals for Soil and Foliar Application 1-0-0 (jhb-14434) ◆
Refer to specific ingredient categories for applicable use restrictions. Micronutrient deficiency must be documented by soil or tissue testing or other documented and verifiable method as approved by a certifying agent. Must not be used as an herbicide, defoliant or desiccant.

Biomin Cal-Boro Calcium with Boron 1-0-0 (jhb-14446) ◆
Refer to specific ingredient categories for applicable use restrictions. Micronutrient deficiency must be documented by soil or tissue testing or other documented and verifiable method as approved by a certifying agent. Must not be used as an herbicide, defoliant or desiccant.

Biomin Cal-Boro Calcium with Boron - Amino Acid Mineral for Soil and Foliar Application (jhb-14525) ◆
Refer to specific ingredient categories for applicable use restrictions. Micronutrient deficiency must be documented by soil or tissue testing or other documented and verifiable method as approved by a certifying agent. Must not be used as an herbicide, defoliant or desiccant.

Nutrimin Calbor-SP (jhb-19088) ◆
Refer to specific ingredient categories for applicable use restrictions. Micronutrient deficiency must be documented by soil or tissue testing or other documented and verifiable method as approved by a certifying agent. Must not be used as an herbicide, defoliant or desiccant.

Buffermin Calbor-SP (jhb-19089) ◆
Refer to specific ingredient categories for applicable use restrictions. Micronutrient deficiency must be documented by soil or tissue testing or other documented and verifiable method as approved by a certifying agent. Must not be used as an herbicide, defoliant or desiccant.

Crop Products: Botanical Pesticides

Ant Out® Botanical Insecticide (jhb-4131) ◆
May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Mildew Cure Fungicide For Powdery Mildew Control (jhb-4132) ◆
May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Pest Out Broad Spectrum Miticide/Insecticide (jhb-4133) ◆
May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

No Moss® Broad Spectrum Mossicide-Control Mosses and Liverworts (jhb-4134) ◆
May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

GC-3 Fungicide for Powdery Mildew Control (jhb-1691) ◆
May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

GC-Mite Broad Spectrum Miticide/Insecticide (jhb-1693) ◆
May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Chick Gard Broad Spectrum Miticide/Insecticide (jhb-12585) ◆
May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

PEST OUT ULTRA Broad Spectrum Botanical Insecticide (jhb-17832) ◆
May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Blite Gard (jhb-20268) ◆
May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Crop Products: Hypochlorous Acid

K-100 Desinfectante Concentrado Soluble (kte-17683) ◆
Residual chlorine levels in the water in direct crop contact (when used pre-harvest) or as water from cleaning irrigation systems applied to the soil should not exceed the maximum residual disinfectant level under the Safe Drinking Water Act (4 mg/L (4ppm) expressed as chlorine, 0.8 mg/L (0.8 ppm) expressed as chlorine dioxide), except that chlorine products may be used in edible sprout production according to EPA label directions. May be used up to maximum labeled rates for disinfecting and sanitizing equipment or tools. No intervening event is necessary before equipment is used in contact with organic crops.

Processing Products: Hypochlorous Acid

K-100 Desinfectante Concentrado Soluble (kte-17129) ◆
May be used in direct contact with post-harvest crop or food at levels approved by the FDA or the EPA for such a purpose. Such use must include a final rinse and residual chlorine levels in final rinse water shall not exceed the Maximum Residual Disinfectant Limit under the Safe Drinking Water Act, except that a final rinse is not required for use in FSIS inspected egg breaking facilities. When used as disinfectants and sanitizers for food contact surfaces, may be used up to maximum labeled rates and rinsing is not required unless mandated by the label use directions. May be used up to maximum labeled rates for disinfecting and sanitizing equipment or tools. No intervening event is necessary before equipment is used in organic production.

Processing Products: Chlorine Materials, Potassium Hydroxide

FOM-100 PRODUCTO DE LIMPIEZA Y DESINFECCIÓN (kyq-18160) ◆
May be used in direct contact with post-harvest crop or food at levels approved by the FDA or the EPA for such a purpose. Such use must include a final rinse and residual chlorine levels in final rinse water shall not exceed the Maximum Residual Disinfectant Limit under the Safe Drinking Water Act, except that a final rinse is not required for use in FSIS inspected egg breaking facilities. When used as disinfectants and sanitizers for food contact surfaces, may be used up to maximum labeled rates and rinsing is not required unless mandated by the label use directions. May be used up to maximum labeled rates for disinfecting and sanitizing equipment or tools. No intervening event is necessary before equipment is used in organic production. If used for lye peeling of fruits or vegetables, may only be used for peeling peaches.

Crop Products: Hydrogen Peroxide

Biotrol 115 (Antimicrobial Solution) (kai-15395) ◆
For use as a plant disease control or as an algicide. May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Crop Products: Peracetic Acid/Peroxyacetic Acid

Biotrol 150 (ANTIMICROBIAL SOLUTION) (kai-15835) ◆
For disinfecting facility, processing equipment, seed and asexually propagated planting material.

Processing Products: Peracetic Acid/Peroxyacetic Acid

Biotrol 220 (ANTIMICROBIAL SOLUTION) (kai-15394) ◆
May be used as a sanitizer on food contact surfaces. Use in wash and/or rinse water must comply with FDA limitations.

Biotrol 115 (ANTIMICROBIAL SOLUTION) (kai-15833) ◆
May be used as a sanitizer on food contact surfaces. Use in wash and/or rinse water must comply with FDA limitations.

Biotrol 150 (ANTIMICROBIAL SOLUTION) (kai-15834) ◆
May be used as a sanitizer on food contact surfaces. Use in wash and/or rinse water must comply with FDA limitations.

Monterey Sluggo Plus Insect, Slug & Snail Pellets (lgp-2870) ◆
For use as slug and snail bait. May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Monterey Sluggo Maxx Brand (lgp-12051) ◆
For use as slug and snail bait. May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Crop Products: Fertilizers, Blended with micronutrients, Iron Products

Monterey Dr. Iron® (lgp-0268) ◆
Micronutrient deficiency must be documented by soil or tissue testing or other documented and verifiable method as approved by a certifying agent. Must not be used as an herbicide, defoliant or desiccant. Refer to specific ingredient categories for applicable use restrictions.

Crop Products: Magnesium Sulfate – Allowed With Restrictions

Monterey Epsom Salts Magnesium Sulfate (lgp-0376) ◆
May be used as a plant or soil amendment if soil deficiency of magnesium is documented by testing.

Crop Products: Microbial Pesticides

Monterey Complete Disease Control Brand RTU Ready-to-Use Aqueous Suspension Biofungicide/Bactericide (lgp-6454) ◆
May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Monterey Complete Disease Control Brand Aqueous Suspension Biofungicide/Bactericide (lgp-6455) ◆
May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Crop Products: Neem and Neem Derivatives

Monterey Fruit Tree Spray Plus Broad Spectrum Insecticide, Fungicide, and Miticide (lgp-3720) ◆
May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Crop Products: Oils, Horticultural

Monterey Horticultural Oil Fungicide, Insecticide, & Miticide (lgp-2574) ◆
For use as an insecticide (including acaricide or mite control) and for plant disease control as dormant, suffocating, and stylet (summer) sprays. May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Crop Products: Plant Disease Controls

Monterey Nematode Control (lgp-3282)

Crop Products: Pyrethrum

Monterey Bug Buster-O (lgp-4823) ◆
May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Monterey Take Down-O Garden Spray Insecticide/Miticide (lgp-17405) ◆
May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Crop Products: Soap

Monterey Garden Insect Spray RTU (lgp-5689) ◆
For use as an algicide/demosser, herbicide or insecticide. When used as an herbicide may only be used for farmstead maintenance (roadways, ditches, right of ways, building perimeters) and ornamental crops. May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Monterey Insecticidal Soap RTU (lgp-14034) ◆
For use as an algicide/demosser, herbicide or insecticide. When used as an herbicide may only be used for farmstead maintenance (roadways, ditches, right of ways, building perimeters) and ornamental crops. May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Crop Products: Spinosad

Monterey Garden Insect Spray (lgp-0034) ◆
May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Crop Products: Copper Sulfate

Along-Life Algaecide/Bactericide* (lsg-5470) ◆
For plant disease control, must be used in a manner that minimizes accumulation of copper in the soil. For use as an algicide in aquatic rice systems and for tadpole shrimp control in aquatic rice systems, must not exceed one application per field during any 24-month period. Application rates are limited to those which do not increase baseline soil test values for copper over a time frame agreed upon by the producer and accredited certifying agent. May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

RiceGuard Algaecide (lsg-8205) ◆
For plant disease control, must be used in a manner that minimizes accumulation of copper in the soil. For use as an algicide in aquatic rice systems and for tadpole shrimp control in aquatic rice systems, must not exceed one application per field during any 24-month period. Application rates are limited to those which do not increase baseline soil test values for copper over a time frame agreed upon by the producer and accredited certifying agent. May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

RiceTec Algaecide/ Bactericide (lsg-13703) ◆
For plant disease control, must be used in a manner that minimizes accumulation of copper in the soil. For use as an algicide in aquatic rice systems and for tadpole shrimp control in aquatic rice systems, must not exceed one application per field during any 24-month period. Crop Products: Adjuvants, for use in crop pesticides

Leaf Life® Widespread® Organic Silicone Surfactant (lpi-2674) ◆
For use as an inert ingredient in combination with permitted active pesticidal ingredients. May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Attach Soil Deposition Aid (lpi-5311) ◆
For use as an inert ingredient in combination with permitted active pesticidal ingredients. May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Freeway Organosilicone Super Wetter Organosilicone Surfactant Blend Wetter/Spreader/Penetrant (lpi-10146) ◆
For use as an inert ingredient in combination with permitted active pesticidal ingredients. May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Crop Products: Aquatic Plant Products

Loveland Products Maritime (lpi-11727)

Loveland Products MARITIME CA (lpi-19036)

Crop Products: Boron Products

Loveland Products leaf life Organo-mAAx B 3% (lpi-17970) ◆
Micronutrient deficiency must be documented by soil or tissue testing or other documented and verifiable method as approved by a certifying agent. Must not be used as an herbicide, defoliant or desiccant.

Loveland Products Leaf Life 2% Boron Solution (lpi-19240) ◆
Micronutrient deficiency must be documented by soil or tissue testing or other documented and verifiable method as approved by a certifying agent. Must not be used as an herbicide, defoliant or desiccant.

Crop Products: Calcium Chloride

Loveland Products. leaf life Organo-mAAx Ca 7% (lpi-17989) ◆
For use as a foliar spray to treat a physiological disorder associated with calcium uptake.

Loveland Products leaf life Organo-Cal (lpi-19561) ◆
For use as a foliar spray to treat a physiological disorder associated with calcium uptake.

Crop Products: Citric Acid

Leaf Life Slingshot Acidifier (lpi-10418)

Crop Products: Copper Products

Loveland Products leaf life Organo-mAAx Cu 4.5% (lpi-17987) ◆
Micronutrient deficiency must be documented by soil or tissue testing or other documented and verifiable method as approved by a certifying agent. Must not be used as an herbicide, defoliant or desiccant.

Crop Products: Elemental Sulfur

Loveland Products Thiolux Fungicide - Miticide (lpi-4845) ◆
For use as plant disease control, or as an insecticide (including acaricide or mite control). For use as slug and snail bait. May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Dusting Sulfur Fungicide-Insecticide (lpi-10076) ◆
For use as plant disease control, or as an insecticide (including acaricide or mite control). For use as slug and snail bait. May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Loveland Dusting Sulfur (lpi-15382) ◆
For use as plant disease control, or as an insecticide (including acaricide or mite control). For use as slug and snail bait. May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Crop Products: Ferric Phosphate

Loveland Products Leaf Life Sluggo Snail and Slug Bait (lpi-3702) ◆
For use as slug and snail bait. May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Crop Products: Fertilizers and Soil Amendments, Blended

Loveland Products leaf life Organo-mAAx K 5% 0-0-6 (lpi-17971)

Crop Products: Humic Acids – alkali extracted

Loveland Products Leaf Life Humic 600 For Soil and Foliar Applications (lpi-8590)

Loveland Products ReaX Organic C2 0-0-2 (lpi-13595)

Crop Products: Iron Products

Loveland Products leaf life Organo-mAAx Fe 5% (lpi-17988) ◆
Micronutrient deficiency must be documented by soil or tissue testing or other documented and verifiable method as approved by a certifying agent. Must not be used as an herbicide, defoliant or desiccant.

Crop Products: Magnesium Sulfate – Allowed With Restrictions

Loveland Products leaf life Organo-mAAx Mg 3% (lpi-17992) ◆
May be used as a plant or soil amendment if soil deficiency of magnesium is documented by testing.

Crop Products: Manganese Products

Loveland Products leaf life Organo-mAAx Mn 5% (lpi-17980) ◆
Micronutrient deficiency must be documented by soil or tissue testing or other documented and verifiable method as approved by a certifying agent. Must not be used as an herbicide, defoliant or desiccant.

Crop Products: Manure, processed

Groganic 5-3-2 Fertilizer (lpi-0718)

Crop Products: Microbial Products, with manure

Loveland Products Accomplish LM (lpi-10728) ◆
May only be (i) applied to land used for a crop not intended for human consumption; (ii) incorporated into the soil not less than 120 days prior to the harvest of a product whose edible portion has direct contact with the soil surface or soil particles; or (iii) incorporated into the soil not less than 90 days prior to the harvest of a product whose edible portion does not have direct contact with the soil surface or soil particles.

Loveland Products Accomplish CA (lpi-17056) ◆
May only be (i) applied to land used for a crop not intended for human consumption; (ii) incorporated into the soil not less than 120 days prior to the harvest of a product whose edible portion has direct contact with the soil surface or soil particles; or (iii) incorporated into the soil not less than 90 days prior to the harvest of a product whose edible portion does not have direct contact with the soil surface or soil particles.

Loveland Products Accomplish Max (lpi-17856) ◆
May only be (i) applied to land used for a crop not intended for human consumption; (ii) incorporated into the soil not less than 120 days prior to the harvest of a product whose edible portion has direct contact with the soil surface or soil particles; or (iii) incorporated into the soil not less than 90 days prior to the harvest of a product whose edible portion does not have direct contact with the soil surface or soil particles.

Crop Products: Oils, Horticultural

Loveland Products Glacial Spray Fluid (lpi-0653) ◆
For use as an insecticide (including acaricide or mite control) and for plant disease control as dormant, suffocating, and stylet (summer) sprays. May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Loveland Products Leaf Life® Gavicide Green® 415 (lpi-2405) ◆
For use as an insecticide (including acaricide or mite control) and for plant disease control as dormant, suffocating, and stylet (summer) sprays. May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Loveland Products Leaf Life® Gavicide Green® 440 (lpi-2406) ◆
For use as an insecticide (including acaricide or mite control) and for plant disease control as dormant, suffocating, and stylet (summer) sprays. May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Crop Products: Plants

Loveland Rice Bran 2-1-1 (lpi-11923)

Crop Products: Zinc Products

Loveland Products leaf life Organo-mAAx Zn 9% (lpi-17993) ◆
Micronutrient deficiency must be documented by soil or tissue testing or other documented and verifiable method as approved by a certifying agent. Must not be used as an herbicide, defoliant or desiccant.

Loveland Products leaf life LZn 8.50 (lpi-18916) ◆
Micronutrient deficiency must be documented by soil or tissue testing or other documented and verifiable method as approved by a certifying agent. Must not be used as an herbicide, defoliant or desiccant.

Crop Products: Adjuvants, for use in crop pesticides

GreenFurrow Organics Foam Preventer (mav-13441) ◆
For use as an inert ingredient in combination with permitted active pesticidal ingredients. May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

GreenFurrow Organics VistaSil 100 Silicone Surfactant (mav-13442) ◆
For use as an inert ingredient in combination with permitted active pesticidal ingredients. May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

GreenFurrow® Organics Aqua Buff Acidifier & Buffering Agent (mav-14113) ◆
For use as an inert ingredient in combination with permitted active pesticidal ingredients. May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Crop Products: Boron Products

GreenFurrow Organics Boron 2% (mav-14713) ◆
Micronutrient deficiency must be documented by soil or tissue testing or other documented and verifiable method as approved by a certifying agent. Must not be used as an herbicide, defoliant or desiccant.

Crop Products: Boron Products, Copper Products, Iron Products, Magnesium Sulfate – Allowed With Restrictions, Manganese Products, Zinc Products

GreenFurrow Organics MultiMix (mav-13908) ◆
Micronutrient deficiency must be documented by soil or tissue testing or other documented and verifiable method as approved by a certifying agent. Must not be used as an herbicide, defoliant or desiccant. May be used as a plant or soil amendment if soil deficiency of magnesium is documented by testing.

Crop Products: Calcium Chloride, Zinc Products

GreenFurrow Organics 8% Calcium (mav-14146) ◆
Micronutrient deficiency must be documented by soil or tissue testing or other documented and verifiable method as approved by a certifying agent. Must not be used as an herbicide, defoliant or desiccant. For use as a foliar spray to treat a physiological disorder associated with calcium uptake.

Crop Products: Copper Products, Zinc Products

GreenFurrow Organics Copper 5% (mav-13699) ◆
Micronutrient deficiency must be documented by soil or tissue testing or other documented and verifiable method as approved by a certifying agent. Must not be used as an herbicide, defoliant or desiccant.

Crop Products: Elemental Sulfur

Mar Vista Resources Dusting Sulfur (mav-9685) ◆
For use as plant disease control, or as an insecticide (including acaricide or mite control). For use as slug and snail bait. May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

GreenFurrow® Organics Dusting Sulfur (mav-14758) ◆
For use as plant disease control, or as an insecticide (including acaricide or mite control). For use as slug and snail bait. May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Crop Products: Fertilizers, Blended with micronutrients, Molybdenum Products

GreenFurrow® Organics Nutri-Drive (mav-15446) ◆
Micronutrient deficiency must be documented by soil or tissue testing or other documented and verifiable method as approved by a certifying agent. Must not be used as an herbicide, defoliant or desiccant. Refer to specific ingredient categories for applicable use restrictions.

Crop Products: Humic Acids – alkali extracted

GreenFurrow Organics Humic Acid 12% (mav-12717)

GreenFurrow Organics Humic Acid 6% (mav-12790)

Crop Products: Iron Products, Zinc Products

GreenFurrow Organics Iron 5% (mav-13700) ◆
Micronutrient deficiency must be documented by soil or tissue testing or other documented and verifiable method as approved by a certifying agent. Must not be used as an herbicide, defoliant or desiccant.

Crop Products: Magnesium Sulfate – Allowed With Restrictions, Zinc Products

GreenFurrow Organics Magnesium 3% (mav-14367) ◆
Micronutrient deficiency must be documented by soil or tissue testing or other documented and verifiable method as approved by a certifying agent. Must not be used as an herbicide, defoliant or desiccant. May be used as a plant or soil amendment if soil deficiency of magnesium is documented by testing.

Crop Products: Manganese Products, Zinc Products

GreenFurrow® Organics Manganese 6% (mav-14368) ◆
Micronutrient deficiency must be documented by soil or tissue testing or other documented and verifiable method as approved by a certifying agent. Must not be used as an herbicide, defoliant or desiccant.

Crop Products: Oils, Horticultural

VistaSpray™ 440 Spray Oil (mav-10344) ◆
For use as an insecticide (including acaricide or mite control) and for plant disease control as dormant, suffocating, and stylet (summer) sprays. May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

VistaSpray™ 415 Spray Oil (mav-10592) ◆
For use as an insecticide (including acaricide or mite control) and for plant disease control as dormant, suffocating, and stylet (summer) sprays. May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Crop Products: Seaweed and Seaweed Products

GreenFurrow® Organics 0-0-3 Seaweed Extract (mav-14550)

Crop Products: Summer Oils

GreenFurrow Organics Vista Clear Spray Oil II (mav-13598) ◆
For use as an insecticide (including acaricide or mite control) and for plant disease control as dormant, suffocating, and stylet (summer) sprays. May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Crop Products: Wetting Agents

GreenFurrow Organics Root-Active (mav-12433)

GreenFurrow Organics Soil Rx (mav-12512)

Crop Products: Zinc Products

GreenFurrow® Organics Zinc 6.5% (mav-13701) ◆
Micronutrient deficiency must be documented by soil or tissue testing or other documented and verifiable method as approved by a certifying agent. Must not be used as an herbicide, defoliant or desiccant.

GreenFurrow® Organics MVR+ (mav-15369) ◆
Micronutrient deficiency must be documented by soil or tissue testing or other documented and verifiable method as approved by a certifying agent. Must not be used as an herbicide, defoliant or desiccant.

Crop Products: Coppers, fixed

CSC Copper Sulfur Dust Fungicide (csc-0033) ◆
For plant disease control. Must be used in a manner that minimizes copper accumulation in the soil and shall not be used as herbicides. May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Crop Products: Elemental Sulfur

CSC DS-90 90% Elemental Sulfur Pastille (csc-9230)

Martin Resources DS-85% Organic Water Degradable Sulfur (csc-8195)

Martin Resources Pastille Sulfur (csc-13866)

CSC Dusting Sulfur (csc-3066) ◆
For use as plant disease control, or as an insecticide (including acaricide or mite control). For use as slug and snail bait. May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Crop Products: Acid Activators for Chlorine Dioxide

MCHEM HYDROFLO CLEANER & PROCESS WATER TREATMENT (mce-13486) ◆
Residual chlorine levels in the water in direct crop contact (when used pre-harvest) or as water from cleaning irrigation systems applied to the soil should not exceed the maximum residual disinfectant level under the Safe Drinking Water Act (4 mg/L (4ppm) expressed as chlorine, 0.8 mg/L (0.8 ppm) expressed as chlorine dioxide), except that chlorine products may be used in edible sprout production according to EPA label directions. May be used up to maximum labeled rates for disinfecting and sanitizing equipment or tools. No intervening event is necessary before equipment is used in contact with organic crops. Must only be used for the generation of chlorine dioxide. Use of resulting chlorine dioxide must comply with 205.601(a)(2)(ii).

Crop Products: Chlorine Dioxide

MCHEM MClean 15 Chlorine Dioxide and Acidified Chlorite Solution Precursor (mce-13485) ◆
Residual chlorine levels in the water in direct crop contact (when used pre-harvest) or as water from cleaning irrigation systems applied to the soil should not exceed the maximum residual disinfectant level under the Safe Drinking Water Act (4 mg/L (4ppm) expressed as chlorine, 0.8 mg/L (0.8 ppm) expressed as chlorine dioxide), except that chlorine products may be used in edible sprout production according to EPA label directions. May be used up to maximum labeled rates for disinfecting and sanitizing equipment or tools. No intervening event is necessary before equipment is used in contact with organic crops.

Crop Products: Hydrogen Peroxide

OxiGreen (Antimicrobial Solution) (mce-5411) ◆
For use as a plant disease control or as an algicide. May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Crop Products: Peracetic Acid/Peroxyacetic Acid

OxiGreen 15 (Antimicrobial Solution) (mce-5413) ◆
For disinfecting facility, processing equipment, seed and asexually propagated planting material.

Processing Products: Peracetic Acid/Peroxyacetic Acid

OxiGreen (Antimicrobial Solution) (mce-5412) ◆
May be used as a sanitizer on food contact surfaces. Use in wash and/or rinse water must comply with FDA limitations.

OxiGreen 15 (Antimicrobial Solution) (mce-5414) ◆
May be used as a sanitizer on food contact surfaces. Use in wash and/or rinse water must comply with FDA limitations.

Crop Products: Acid Activators for Chlorine Dioxide

Mionix FreshFlo 100 Acid Activator for Chlorine Dioxide (mix-8627) ◆
Residual chlorine levels in the water in direct crop contact (when used pre-harvest) or as water from cleaning irrigation systems applied to the soil should not exceed the maximum residual disinfectant level under the Safe Drinking Water Act (4 mg/L (4ppm) expressed as chlorine, 0.8 mg/L (0.8 ppm) expressed as chlorine dioxide), except that chlorine products may be used in edible sprout production according to EPA label directions. May be used up to maximum labeled rates for disinfecting and sanitizing equipment or tools. No intervening event is necessary before equipment is used in contact with organic crops. Must only be used for the generation of chlorine dioxide. Use of resulting chlorine dioxide must comply with 205.601(a)(2)(ii).

Livestock Products: Acid Activators for Chlorine Dioxide

Mionix FreshFlo 100 Acid Activator for Chlorine Dioxide (mix-8628) ◆
Chlorine products may be used up to maximum labeled rates for disinfecting and sanitizing equipment or tools (including dairy pipelines and tanks). Residual chlorine levels in the water in direct contact with food products or animals shall not exceed the maximum residual disinfectant limit under the Safe Drinking Water Act (4 mg/L (4ppm) expressed as chlorine, 0.8 mg/L (0.8 ppm) expressed as chlorine dioxide). May be used up to maximum labeled rates for sanitizing equipment or tools. Label instructions should be followed regarding requirements for rinsing or not rinsing prior to the equipment's next use. Must only be used for the generation of chlorine dioxide. Use of resulting chlorine dioxide must comply with 205.603(a)(10)(ii).

Momentive Silwet 719 Spreader (mpm-7592) ◆
For use as an inert ingredient in combination with permitted active pesticidal ingredients. May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Momentive Y-20400 (mpm-8370) ◆
For use as an inert ingredient in combination with permitted active pesticidal ingredients. May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Momentive SILWET L AG (mpm-8755) ◆
For use as an inert ingredient in combination with permitted active pesticidal ingredients. May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

AgroSpred Flex Adjuvant (mpm-12026) ◆
For use as an inert ingredient in combination with permitted active pesticidal ingredients. May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Momentive Silwet 641 Concentrate (mpm-16424) ◆
For use as an inert ingredient in combination with permitted active pesticidal ingredients. May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Momentive Y-20408 (mpm-16426) ◆
For use as an inert ingredient in combination with permitted active pesticidal ingredients. May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

SAG 471 antifoam concentrate (mpm-16655) ◆
For use as an inert ingredient in combination with permitted active pesticidal ingredients. May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Momentive Silwet ECO Super Spreader Organosilicone Spreader (mpm-16801) ◆
For use as an inert ingredient in combination with permitted active pesticidal ingredients. May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

MOMENTIVE SILWET 408 Super Spreader (mpm-16802) ◆
For use as an inert ingredient in combination with permitted active pesticidal ingredients. May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Momentive SILWET L-77 Super Spreader (mpm-16818) ◆
For use as an inert ingredient in combination with permitted active pesticidal ingredients. May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Momentive Silwet 806 super spreader (mpm-16819) ◆
For use as an inert ingredient in combination with permitted active pesticidal ingredients. May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Antifoam OR-90 Compound (mpm-16885) ◆
For use as an inert ingredient in combination with permitted active pesticidal ingredients. May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Antifoam OR-10 Emulsion (mpm-16886) ◆
For use as an inert ingredient in combination with permitted active pesticidal ingredients. May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

SAG™ 47 Antifoam Compound (mpm-16898) ◆
For use as an inert ingredient in combination with permitted active pesticidal ingredients. May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

AgroSpred™ Prime Adjuvant (mpm-16900) ◆
For use as an inert ingredient in combination with permitted active pesticidal ingredients. May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

SAG™ 5693 Antifoam Concentrate (mpm-16902) ◆
For use as an inert ingredient in combination with permitted active pesticidal ingredients. May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Silwet™ OPTIM (mpm-16942) ◆
For use as an inert ingredient in combination with permitted active pesticidal ingredients. May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Indusil 47NK Silicone (mpm-17699) ◆
For use as an inert ingredient in combination with permitted active pesticidal ingredients. May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Momentive Silwet™ Boost (mpm-17915) ◆
For use as an inert ingredient in combination with permitted active pesticidal ingredients. May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

SAG 47E foam control agent (mpm-18865) ◆
For use as an inert ingredient in combination with permitted active pesticidal ingredients. May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Crop Products: Adjuvants, for use in crop pesticides

BB5 NC Acidifier/Surfactant (ntl-7570) ◆
For use as an inert ingredient in combination with permitted active pesticidal ingredients. May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Crop Products: Boron Products

Enviro Boron (ntl-7665) ◆
Micronutrient deficiency must be documented by soil or tissue testing or other documented and verifiable method as approved by a certifying agent. Must not be used as an herbicide, defoliant or desiccant.

Crop Products: Boron Products, Manganese Products

MangaMax Lite A Manganese and Boron True Solution for use in Organic Production (ntl-2307) ◆
Micronutrient deficiency must be documented by soil or tissue testing or other documented and verifiable method as approved by a certifying agent. Must not be used as an herbicide, defoliant or desiccant.

Crop Products: Calcium

Enviro Ca-4 (ntl-19859)

Crop Products: Calcium Chloride

Enviro Calcium (ntl-7641) ◆
For use as a foliar spray to treat a physiological disorder associated with calcium uptake.

Crop Products: Calcium Chloride, Potassium Chloride

Enviro Lex 0-0-8 (ntl-12053) ◆
For use as a foliar spray to treat a physiological disorder associated with calcium uptake. Must be applied in a manner that minimizes chloride accumulation in the soil.

Crop Products: Copper Products

Enviro Copper (ntl-8974) ◆
Micronutrient deficiency must be documented by soil or tissue testing or other documented and verifiable method as approved by a certifying agent. Must not be used as an herbicide, defoliant or desiccant.

Crop Products: Fertilizers and Soil Amendments, Blended

NPK Lite 12-0-1 (ntl-4761)

Enviro 12-0-1 (ntl-7664)

Enviro 6-7-10 (ntl-14882)

Crop Products: Fertilizers and Soil Amendments, Blended – Allowed With Restrictions, Potassium Chloride

Enviro 5-0-20 (ntl-7663) ◆
Refer to specific ingredient categories for applicable use restrictions. Must be applied in a manner that minimizes chloride accumulation in the soil.

Crop Products: Iron Products

Enviro Iron (ntl-10263) ◆
Micronutrient deficiency must be documented by soil or tissue testing or other documented and verifiable method as approved by a certifying agent. Must not be used as an herbicide, defoliant or desiccant.

Crop Products: Iron Products, Manganese Products, Zinc Products

Enviro Trio (ntl-14366) ◆
Micronutrient deficiency must be documented by soil or tissue testing or other documented and verifiable method as approved by a certifying agent. Must not be used as an herbicide, defoliant or desiccant.

Crop Products: Magnesium Sulfate – Allowed With Restrictions

Enviro Magnesium (ntl-7755) ◆
May be used as a plant or soil amendment if soil deficiency of magnesium is documented by testing.

Crop Products: Manganese Products

Enviro Manganese (ntl-7629) ◆
Micronutrient deficiency must be documented by soil or tissue testing or other documented and verifiable method as approved by a certifying agent. Must not be used as an herbicide, defoliant or desiccant.

Crop Products: Potassium Chloride

K-Max Lite 0-0-14.5 A Potassium True Solution for use in Organic Production (ntl-2263) ◆
Must be applied in a manner that minimizes chloride accumulation in the soil.

Enviro Potassium 0-0-14 (ntl-7766) ◆
Must be applied in a manner that minimizes chloride accumulation in the soil.

Crop Products: Potassium Sulfate

Enviro K-6 0-0-6 (ntl-18220)

Crop Products: Zinc Products

Enviro Zinc (ntl-7756) ◆
Micronutrient deficiency must be documented by soil or tissue testing or other documented and verifiable method as approved by a certifying agent. Must not be used as an herbicide, defoliant or desiccant.

Org Zinc (ntl-11441) ◆
Micronutrient deficiency must be documented by soil or tissue testing or other documented and verifiable method as approved by a certifying agent. Must not be used as an herbicide, defoliant or desiccant.

Crop Products: Copper Sulfate

ICC Ionic Copper Concentrate Liquid Concentrate Natural-Based Contact Fungicide & Bactericide (ocn-5303) ◆
For plant disease control, must be used in a manner that minimizes accumulation of copper in the soil. For use as an algicide in aquatic rice systems and for tadpole shrimp control in aquatic rice systems, must not exceed one application per field during any 24-month period. Application rates are limited to those which do not increase baseline soil test values for copper over a time frame agreed upon by the producer and accredited certifying agent. May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Ocion PT81 Algicide/Bactericide/Fungicide (ocn-5305) ◆
For plant disease control, must be used in a manner that minimizes accumulation of copper in the soil. For use as an algicide in aquatic rice systems and for tadpole shrimp control in aquatic rice systems, must not exceed one application per field during any 24-month period. Application rates are limited to those which do not increase baseline soil test values for copper over a time frame agreed upon by the producer and accredited certifying agent. May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Crop Products: Adjuvants, for use in crop pesticides

Orgachemics Co Emulsificante (och-8304) ◆
For use as an inert ingredient in combination with permitted active pesticidal ingredients. May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Orgachemics Emulsificante (och-8305) ◆
For use as an inert ingredient in combination with permitted active pesticidal ingredients. May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Orgachemics Emulsificante de Aceite Mineral (och-8306) ◆
For use as an inert ingredient in combination with permitted active pesticidal ingredients. May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Orgachemics mejorador de emulsion de aceite (och-8504) ◆
For use as an inert ingredient in combination with permitted active pesticidal ingredients. May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Orgachemics Simpledet Spread Wet (och-14282) ◆
For use as an inert ingredient in combination with permitted active pesticidal ingredients. May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Orgachemics Surfocip (och-14283) ◆
For use as an inert ingredient in combination with permitted active pesticidal ingredients. May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Orgachemics Tride HF & HRS (och-14284) ◆
For use as an inert ingredient in combination with permitted active pesticidal ingredients. May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Orgachemics Duocip-Surf (och-14285) ◆
For use as an inert ingredient in combination with permitted active pesticidal ingredients. May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Orgachemics Nonisurf Disperse (och-14286) ◆
For use as an inert ingredient in combination with permitted active pesticidal ingredients. May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Orgachemics Seven HF & HRS (och-14287) ◆
For use as an inert ingredient in combination with permitted active pesticidal ingredients. May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Orgachemics Orga Green Citrus (och-15962) ◆
For use as an inert ingredient in combination with permitted active pesticidal ingredients. May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

ORGACHEMICS ORGA FERTISIP (och-16135) ◆
For use as an inert ingredient in combination with permitted active pesticidal ingredients. May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

ORGACHEMICS ORGA FERTISIL (och-16136) ◆
For use as an inert ingredient in combination with permitted active pesticidal ingredients. May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Processing Products: Peracetic Acid/Peroxyacetic Acid

SANOX PURE PAA 22 CW (och-8308) ◆
May be used as a sanitizer on food contact surfaces. Use in wash and/or rinse water must comply with FDA limitations.

Orgachemics BIOXAN 15 F&V (och-8373) ◆
May be used as a sanitizer on food contact surfaces. Use in wash and/or rinse water must comply with FDA limitations.

ORGA GREEN 02 PURE (och-8398) ◆
May be used as a sanitizer on food contact surfaces. Use in wash and/or rinse water must comply with FDA limitations.

Unisan Sani-800 (och-11615) ◆
May be used as a sanitizer on food contact surfaces. Use in wash and/or rinse water must comply with FDA limitations.

Unisan Sani-850 (och-11616) ◆
May be used as a sanitizer on food contact surfaces. Use in wash and/or rinse water must comply with FDA limitations.

Orgachemics Prolimp Cetic 100 Desinfectante Base Acido Peracetico (och-18896) ◆
May be used as a sanitizer on food contact surfaces. Use in wash and/or rinse water must comply with FDA limitations.

Crop Products: Adjuvants, for use in crop pesticides

Polaquimia PerfectDuo Adjuvant Modified Trisiloxane Superdispersant/ Penetrating / Moisturizing (poo-11562) ◆
For use as an inert ingredient in combination with permitted active pesticidal ingredients. May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Ecopol 6402 OR (poo-13592) ◆
For use as an inert ingredient in combination with permitted active pesticidal ingredients. May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

polaquimia LIBER PRO Coadyuvante Penetrante, dispersante, antideriva (poo-14223) ◆
For use as an inert ingredient in combination with permitted active pesticidal ingredients. May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Triónex Agtimum Coadyuvante agrícola / Líquido Humectante, dispersante, penetrante (poo-14702) ◆
For use as an inert ingredient in combination with permitted active pesticidal ingredients. May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Consus Pro Coadyvante Regulador de pH, humectante, dispersante, penetrante, antiespumante, agente de compatibilidad (poo-14770) ◆
For use as an inert ingredient in combination with permitted active pesticidal ingredients. May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Perfect KOOR Trisiloxano Modificado Coadyuvante Agrícola Superdispersante/Penetrante/Humectante (poo-15567) ◆
For use as an inert ingredient in combination with permitted active pesticidal ingredients. May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Mastin Duo Coadyuvante Humectante, dispersante, penetrante (poo-16394) ◆
For use as an inert ingredient in combination with permitted active pesticidal ingredients. May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Intrawet Coadyuvante Humectante, dispersante, penetrante (poo-18292) ◆
For use as an inert ingredient in combination with permitted active pesticidal ingredients. May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

DISPERWET Coadyuvante Superdispersante/Penetrante/Humectante (poo-19523) ◆
For use as an inert ingredient in combination with permitted active pesticidal ingredients. May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Adigor Plus Trisiloxano Modificado Coadyuvante Agrícola Superdispersante/Penetrante/Humectante (poo-19762) ◆
For use as an inert ingredient in combination with permitted active pesticidal ingredients. May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Crop Products: Hypochlorous Acid

INACTIV Ácido Hipocloroso para uso agrícola (ppj-19735) ◆
Residual chlorine levels in the water in direct crop contact (when used pre-harvest) or as water from cleaning irrigation systems applied to the soil should not exceed the maximum residual disinfectant level under the Safe Drinking Water Act (4 mg/L (4ppm) expressed as chlorine, 0.8 mg/L (0.8 ppm) expressed as chlorine dioxide), except that chlorine products may be used in edible sprout production according to EPA label directions. May be used up to maximum labeled rates for disinfecting and sanitizing equipment or tools. No intervening event is necessary before equipment is used in contact with organic crops.

Crop Products: Copper Sulfate, Seed Treatments

Manage (phb-14488) ◆
For plant disease control, must be used in a manner that minimizes accumulation of copper in the soil. For use as an algicide in aquatic rice systems and for tadpole shrimp control in aquatic rice systems, must not exceed one application per field during any 24-month period. Application rates are limited to those which do not increase baseline soil test values for copper over a time frame agreed upon by the producer and accredited certifying agent. May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Succeed Seed Treatment (phb-15505) ◆

Crop Products: Chlorine Dioxide

ProKure V Cultivator Liquid Mold & Mildew Eliminator (pks-7120) ◆
Residual chlorine levels in the water in direct crop contact (when used pre-harvest) or as water from cleaning irrigation systems applied to the soil should not exceed the maximum residual disinfectant level under the Safe Drinking Water Act (4 mg/L (4ppm) expressed as chlorine, 0.8 mg/L (0.8 ppm) expressed as chlorine dioxide), except that chlorine products may be used in edible sprout production according to EPA label directions. May be used up to maximum labeled rates for disinfecting and sanitizing equipment or tools. No intervening event is necessary before equipment is used in contact with organic crops.

Processing Products: Acidified Sodium Chlorite

ProKure V Liquid Deodorizer/Disinfectant/Fungicide (pks-7136) ◆
For secondary direct antimicrobial food treatment and indirect food contact surface sanitizing. Acidified with citric acid only.

Crop Products: Coppers, fixed

Technical Copper Oxychloride (qin-5966) ◆
For plant disease control. Must be used in a manner that minimizes copper accumulation in the soil and shall not be used as herbicides. May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Crop Products: Elemental Sulfur

Defend DF Micronized Wettable Sulphur WDG (Water Dispersible Granule) (qin-4443) ◆
For use as plant disease control, or as an insecticide (including acaricide or mite control). For use as slug and snail bait. May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Quimetal ACOIDAL Fungicide • Miticide Micronized Wettable Sulphur WDG (Water Dispersable Granule) (qin-4634) ◆
For use as plant disease control, or as an insecticide (including acaricide or mite control). For use as slug and snail bait. May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Sulphur Technical For Manufacturing Fungicide and Insecticide Products (qin-6623) ◆
For use as plant disease control, or as an insecticide (including acaricide or mite control). For use as slug and snail bait. May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Sulfur Dust (qin-12110) ◆
For use as plant disease control, or as an insecticide (including acaricide or mite control). For use as slug and snail bait. May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Nufarm Microsulf Azufre micronizado FUNGICIDA/GRÁNULOS DISPERSABLES (qin-12532) ◆
For use as plant disease control, or as an insecticide (including acaricide or mite control). For use as slug and snail bait. May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Crop Products: Microbial Pesticides

Akorde Bacillus amyloliquefaciens Fungicida Biológico Polvo Humectable (qam-6033) ◆
May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Milini Beauveria bassiana Insecticida Biológico Polvo Humectable (qam-6034) ◆
May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Arrecife Paecilomyces lilacinus y Bacillus firmus Nematicida Biologico Polvo Humectable (qam-6078) ◆
May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Crop Products: Microbial Products

Tango Inoculante (Sólido/Polvo) (qam-12419) ◆
May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Crop Products: Trichoderma spp.

Fragata Trichoderma harzianum Fungicida Biológico Polvo Humectable (qam-5982) ◆
May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Crop Products: Botanical Pesticides

Grupo Lucava BioCinnamon extracto de canela Insecticida y/o Acaricida Emulsión Aceite en Agua (qmc-11480) ◆
May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Grupo Lucava RetriX4 extracto de tagetes Insecticida Botánico Concentrado Emulsionable (qmc-11482) ◆
May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

BIOEFECT agremonina, berberina, ricinina, a-terthienyl Insecticida y/o Acaricida Botánico Extracto Acuoso (qmc-17397) ◆
May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

urban protec CHICALO PROTEC extracto de chicalote Concentrado Emulsionable Insecticida (qmc-17851) ◆
May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Crop Products: Coppers, fixed

Agro Lucava MAGNA-BON CS 2005 sulfato de cobre pentahidratado Fungicida Solución Acuosa (qmc-13630) ◆
For plant disease control. Must be used in a manner that minimizes copper accumulation in the soil and shall not be used as herbicides. May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Crop Products: Coppers, fixed, Elemental Sulfur

Agro Lucava Lucaflow Cu azufre elemental + oxicloruro de cobre Suspensión Acuosa Fungicida (qmc-11533) ◆
For plant disease control. Must be used in a manner that minimizes copper accumulation in the soil and shall not be used as herbicides. May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices. For use as plant disease control, or as an insecticide (including acaricide or mite control). For use as slug and snail bait.

urban protec SUPER CuS azufre elemental + oxicloruro de cobre Suspensión Acuosa Fungicida (qmc-17849) ◆
For plant disease control. Must be used in a manner that minimizes copper accumulation in the soil and shall not be used as herbicides. May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices. For use as plant disease control, or as an insecticide (including acaricide or mite control). For use as slug and snail bait.

Crop Products: Elemental Sulfur

Agro Lucava AZUFRAM S Azufre Sólido Mejorador de Suelo Inorgánico (qmc-5935)

Grupo Lucava urban protec SMART GREEN azufre elemental Sólido Mejorador de Suelo Inorgánico (qmc-17847)

Agro Lucava AZUFRE PERFECTO 93 S azufre elemental Polvo Fungicida (qmc-5293) ◆
For use as plant disease control, or as an insecticide (including acaricide or mite control). For use as slug and snail bait. May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Agro Lucava AZUFRE ELECTRICO S Azufre Elemental Polvo Fungicida (qmc-5919) ◆
For use as plant disease control, or as an insecticide (including acaricide or mite control). For use as slug and snail bait. May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Agro Lucava Azufre Humectable 90 azufre elemental Polvo Humectable Fungicida (qmc-11431) ◆
For use as plant disease control, or as an insecticide (including acaricide or mite control). For use as slug and snail bait. May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Agro Lucava Lucaflow azufre elemental Suspensión Acuosa Fungicida (qmc-11432) ◆
For use as plant disease control, or as an insecticide (including acaricide or mite control). For use as slug and snail bait. May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Agro Lucava Aguerrido S azufre elemental Fungicida Gránulos Dispersables (qmc-12739) ◆
For use as plant disease control, or as an insecticide (including acaricide or mite control). For use as slug and snail bait. May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Crop Products: Growth Regulators for Plants

Grupo Lucava Vitazyme Regulador de Crecimiento Típo 1/ Líquido (qmc-13482) ◆
May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Grupo Lucava Vita Zuper Regulador de Crecimiento Típo 1/ Líquido (qmc-13483) ◆
May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Grupo Lucava BRASINEXT RAÍCES Regulador de Crecimiento Tipo 1 Líquido (qmc-14657) ◆
May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Grupo Lucava BRASINEXT SEMILLAS Regulador de Crecimiento Tipo 1 Líquido (qmc-14658) ◆
May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Grupo Lucava BRASINEXT FRUTOS Regulador de Crecimiento Tipo 1 Líquido (qmc-14659) ◆
May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Grupo Lucava BRASINEXT CRECIMIENTO Regulador de Crecimiento Tipo 1 Líquido (qmc-14660) ◆
May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Grupo Lucava urban protec URBAN GREEN Líquido Regulador de crecimiento tipo 1 (qmc-17848) ◆
May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Crop Products: Microbial Inoculants

MICELIUM Rhizophagus irregularis Inoculante Sólido (qmc-19502)

AZONITRUM Bacteria Azospirillum brasilense Inoculante Líquido (qmc-19503)

Crop Products: Neem and Neem Derivatives

Grupo Lucava DiraXtra80 Extracto de aceite de neem Insecticida y Acaricida Concentrado Emulsionable (qmc-11481) ◆
May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Crop Products: Oils, Horticultural

Agro Lucava LUCASOIL aceite parafínico Insecticida / Acaricida Emulsíon Aceite en Agua (qmc-12698) ◆
For use as an insecticide (including acaricide or mite control) and for plant disease control as dormant, suffocating, and stylet (summer) sprays. May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Agro Lucava AGUIJÓN azufre elemental + aceite parafinico Insecticida - Acaricida - Fungicida Suspensión Concentada (qmc-12738) ◆
For use as an insecticide (including acaricide or mite control) and for plant disease control as dormant, suffocating, and stylet (summer) sprays. May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Crop Products: Adjuvants, for use in crop pesticides

RESINAL Adherente/Penetrante/Prolongador Concentrado Emulsionable (quc-15179) ◆
For use as an inert ingredient in combination with permitted active pesticidal ingredients. May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

RESINEX Concentrado Emulsionable Adherente/Penetrante/Prolongador (quc-16732) ◆
For use as an inert ingredient in combination with permitted active pesticidal ingredients. May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

QUINOA 97 EC Adherente/Penetrante/Prolongador Concentrado Emulsionable (quc-18542) ◆
For use as an inert ingredient in combination with permitted active pesticidal ingredients. May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Crop Products: Amino Acids

AMINOSATO POTASIO Líquido Quelato Orgánico de Aminoácidos de Rápida Asimilación (quc-19152)

IS Icarsato Potasio Fertilizante Inorgánico. Líquido (quc-19153)

Crop Products: Aquatic Plant Products, synthetically extracted

Algamar Nutriente Orgànico a Base de 5 Algas Marinas Polvo (quc-13910)

Crop Products: Bacillus thuringiensis

TURIGEN Bioinsecticida Polvo Humectable (quc-17090) ◆
May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Crop Products: Beauveria spp.

EKO-VERIA Plaguicida Microbiano Polvo Humectable (quc-16400) ◆
May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Crop Products: Biological Controls

EKO-MET Bioinsecticida Polvo Humectable (quc-17089)

Crop Products: Biopesticides

EKO-LECANI Plagicida Agrícola Polvo Humectable (quc-16399) ◆
May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

EKO-SARIA Plaguicida Agrícola Polvo Humectable (quc-16401) ◆
May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Crop Products: Boron Products, Cobalt Products, Copper Products, Fertilizers, Blended with micronutrients, Iron Products, Magnesium Sulfate – Allowed With Restrictions, Manganese Products, Molybdenum Products, Zinc Products

BIOFORTE Fitorregulador Completo Con Alta Concentración de Citocininas Líquido (quc-17375) ◆
Micronutrient deficiency must be documented by soil or tissue testing or other documented and verifiable method as approved by a certifying agent. Must not be used as an herbicide, defoliant or desiccant. May be used as a plant or soil amendment if soil deficiency of magnesium is documented by testing. Refer to specific ingredient categories for applicable use restrictions.

BIOTEK Fitorregulador Completo Con Alta Concentración de Citocininas Líquido (quc-18328) ◆
Micronutrient deficiency must be documented by soil or tissue testing or other documented and verifiable method as approved by a certifying agent. Must not be used as an herbicide, defoliant or desiccant. May be used as a plant or soil amendment if soil deficiency of magnesium is documented by testing. Refer to specific ingredient categories for applicable use restrictions.

Crop Products: Boron Products, Cobalt Products, Fertilizers, Blended with micronutrients, Iron Products, Magnesium Sulfate – Allowed With Restrictions, Manganese Products, Molybdenum Products, Zinc Products

VITALEX Fertilizante Orgánico Con Algas Marinas. Líquido (quc-17157) ◆
May be used as a plant or soil amendment if soil deficiency of magnesium is documented by testing. Refer to specific ingredient categories for applicable use restrictions. Micronutrient deficiency must be documented by soil or tissue testing or other documented and verifiable method as approved by a certifying agent. Must not be used as an herbicide, defoliant or desiccant.

Crop Products: Boron Products, Cobalt Products, Fertilizers, Blended with micronutrients, Magnesium Sulfate – Allowed With Restrictions, Zinc Products

DOLCE Bioestimulante de la Coloración y Azúcares. Solución Acuosa (quc-15730) ◆
May be used as a plant or soil amendment if soil deficiency of magnesium is documented by testing. Refer to specific ingredient categories for applicable use restrictions. Micronutrient deficiency must be documented by soil or tissue testing or other documented and verifiable method as approved by a certifying agent. Must not be used as an herbicide, defoliant or desiccant.

Crop Products: Boron Products, Copper Products, Fertilizers, Blended with synthetic magnesium sulfate, Iron Products, Manganese Products, Molybdenum Products, Zinc Products

FLORAMIN Fertilizante Especial con Aminoácidos, Macroelementos y Microelementos. Líquido. (quc-17376) ◆
Micronutrient deficiency must be documented by soil or tissue testing or other documented and verifiable method as approved by a certifying agent. Must not be used as an herbicide, defoliant or desiccant. May be used as a plant or soil amendment if soil deficiency of magnesium is documented by testing.

Crop Products: Boron Products, Copper Products, Fertilizers, Blended with synthetic magnesium sulfate, Iron Products, Manganese Products, Zinc Products

AMINOSATO CROP Líquido Quelato orgánico de aminoácidos de rápida asimilación (quc-18432) ◆
May be used as a plant or soil amendment if soil deficiency of magnesium is documented by testing. Micronutrient deficiency must be documented by soil or tissue testing or other documented and verifiable method as approved by a certifying agent. Must not be used as an herbicide, defoliant or desiccant.

Icarsato Crop Quelato de Aminoácido de Rápida Asimilación. Lìquido (quc-18824) ◆
May be used as a plant or soil amendment if soil deficiency of magnesium is documented by testing. Micronutrient deficiency must be documented by soil or tissue testing or other documented and verifiable method as approved by a certifying agent. Must not be used as an herbicide, defoliant or desiccant.

Crop Products: Boron Products, Fertilizers, Blended with micronutrients

AMINOSATO BORO Líquido Quelato orgánico de aminoácidos de rápida asimilación (quc-18435) ◆
Refer to specific ingredient categories for applicable use restrictions. Micronutrient deficiency must be documented by soil or tissue testing or other documented and verifiable method as approved by a certifying agent. Must not be used as an herbicide, defoliant or desiccant.

IS Icarsato Boro Fertilizante Orgánico. Líquido (quc-18823) ◆
Refer to specific ingredient categories for applicable use restrictions. Micronutrient deficiency must be documented by soil or tissue testing or other documented and verifiable method as approved by a certifying agent. Must not be used as an herbicide, defoliant or desiccant.

Crop Products: Boron Products, Fertilizers, Blended with micronutrients, Iron Products, Magnesium Sulfate – Allowed With Restrictions, Manganese Products, Zinc Products

CITOZYM Fitorregulador De Origen Natural Líquido (quc-17156) ◆
Micronutrient deficiency must be documented by soil or tissue testing or other documented and verifiable method as approved by a certifying agent. Must not be used as an herbicide, defoliant or desiccant. May be used as a plant or soil amendment if soil deficiency of magnesium is documented by testing. Refer to specific ingredient categories for applicable use restrictions.

Agrozyme Bioestimulante a Base de Extractos Vegetales y Fitohormonas Enriquecido con Microelementos Líquido (quc-18327) ◆
Micronutrient deficiency must be documented by soil or tissue testing or other documented and verifiable method as approved by a certifying agent. Must not be used as an herbicide, defoliant or desiccant. Refer to specific ingredient categories for applicable use restrictions. May be used as a plant or soil amendment if soil deficiency of magnesium is documented by testing.

Crop Products: Botanical Pesticides

PROTEK Insecticida Orgánico Agrícola Concentrado Emulsionable (quc-13938) ◆
May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

SIKURI Insecticida Orgánico Agrícola. Concentrado Emulsionable (quc-19155) ◆
May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Crop Products: Copper Products, Fertilizers, Blended with micronutrients, Fertilizers, Blended with synthetic magnesium sulfate, Iron Products, Manganese Products, Molybdenum Products, Zinc Products

AMINOSATO MULTI Líquido Quelato orgánico de aminoácidos de rápida asimilación (quc-18433) ◆
Refer to specific ingredient categories for applicable use restrictions. Micronutrient deficiency must be documented by soil or tissue testing or other documented and verifiable method as approved by a certifying agent. Must not be used as an herbicide, defoliant or desiccant. May be used as a plant or soil amendment if soil deficiency of magnesium is documented by testing.

IS Icarsato Multi Fertilizante Orgánico. Lìquido (quc-18825) ◆
Refer to specific ingredient categories for applicable use restrictions. Micronutrient deficiency must be documented by soil or tissue testing or other documented and verifiable method as approved by a certifying agent. Must not be used as an herbicide, defoliant or desiccant. May be used as a plant or soil amendment if soil deficiency of magnesium is documented by testing.

Crop Products: Copper Sulfate

PENTAMAX Fungicida y Bactericida Agrícola. Líquido (quc-16412) ◆
For plant disease control, must be used in a manner that minimizes accumulation of copper in the soil. For use as an algicide in aquatic rice systems and for tadpole shrimp control in aquatic rice systems, must not exceed one application per field during any 24-month period. Application rates are limited to those which do not increase baseline soil test values for copper over a time frame agreed upon by the producer and accredited certifying agent. May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Crop Products: Coppers, fixed

GLUCOBRE Bactericida Agrícola Concentrado Soluble (quc-17374) ◆
For plant disease control. Must be used in a manner that minimizes copper accumulation in the soil and shall not be used as herbicides. May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Crop Products: Elemental Sulfur

SAGASUL Gránulos Finos Superdispersables Fungicida Y Acaricida Agrícola (quc-16411) ◆
For use as plant disease control, or as an insecticide (including acaricide or mite control). For use as slug and snail bait. May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Crop Products: Fermentation Products

SAGASTIM Bioestimulante Orgánico Vegetal Líquido (quc-17816)

STRESSO Biostimulante Orgánico Vegetal Líquido (quc-18329)

MAXIVIO 5.2 SL Fitofortificante - Orgánico (quc-18543)

Crop Products: Fertilizers and Soil Amendments, Blended

BROTAMIN Fertilizante Especial con Aminoácidos y Macroelementos, Líquido (quc-17158)

AMINOSATO CALCIO Quelato de Aminoácidos de Rápida Asimilación (quc-18186)

Icarsato Calcio Fertilizante Orgánico. Líquido (quc-18521)

Crop Products: Fertilizers, Blended with micronutrients, Iron Products

AMINOSATO FIERRO Quelato Orgánico de Aminoácidos de Rápida Asimilación (quc-18188) ◆
Micronutrient deficiency must be documented by soil or tissue testing or other documented and verifiable method as approved by a certifying agent. Must not be used as an herbicide, defoliant or desiccant. Refer to specific ingredient categories for applicable use restrictions.

Crop Products: Fertilizers, Blended with micronutrients, Iron Products, Magnesium Sulfate – Allowed With Restrictions, Manganese Products, Zinc Products

BIOFOL (TF) Regulador de Crecimiento Vegetal Inductor para la Floración y Fructificación. Líquido (quc-15732) ◆
Micronutrient deficiency must be documented by soil or tissue testing or other documented and verifiable method as approved by a certifying agent. Must not be used as an herbicide, defoliant or desiccant. May be used as a plant or soil amendment if soil deficiency of magnesium is documented by testing. Refer to specific ingredient categories for applicable use restrictions.

Crop Products: Fertilizers, Blended with micronutrients, Zinc Products

AMINOSATO ZINC Quelato Orgánico de Aminoácidos de Rápida Asimilación (quc-18189) ◆
Micronutrient deficiency must be documented by soil or tissue testing or other documented and verifiable method as approved by a certifying agent. Must not be used as an herbicide, defoliant or desiccant. Refer to specific ingredient categories for applicable use restrictions.

Crop Products: Fertilizers, Blended with synthetic magnesium sulfate

AMINOSATO MAGNESIO Quelato Orgánico de Aminoácidos de Rápida Asimilación (quc-18187) ◆
May be used as a plant or soil amendment if soil deficiency of magnesium is documented by testing.

Icarsato Magnesio Fertilizante Orgánico. Líquido (quc-18523) ◆
May be used as a plant or soil amendment if soil deficiency of magnesium is documented by testing.

Crop Products: Gibberellic Acid

Activ 4SL Activador de Crecimiento Vegetal Solución Acuosa (quc-17373) ◆
May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Crop Products: Chlorine Dioxide

Dioxy ORG Desinfectante de Contacto Fungicida-Bactericida-Virucida-Alguicida (qca-14606) ◆
Residual chlorine levels in the water in direct crop contact (when used pre-harvest) or as water from cleaning irrigation systems applied to the soil should not exceed the maximum residual disinfectant level under the Safe Drinking Water Act (4 mg/L (4ppm) expressed as chlorine, 0.8 mg/L (0.8 ppm) expressed as chlorine dioxide), except that chlorine products may be used in edible sprout production according to EPA label directions. May be used up to maximum labeled rates for disinfecting and sanitizing equipment or tools. No intervening event is necessary before equipment is used in contact with organic crops.

Processing Products: Chlorine Dioxide

Dioxy ORG Desinfectante de Contacto Fungicida-Bactericida-Virucida-Alguicida (qca-14604) ◆
May be used in direct contact with post-harvest crop or food at levels approved by the FDA or the EPA for such a purpose. Such use must include a final rinse and residual chlorine levels in final rinse water shall not exceed the Maximum Residual Disinfectant Limit under the Safe Drinking Water Act, except that a final rinse is not required for use in FSIS inspected egg breaking facilities. When used as disinfectants and sanitizers for food contact surfaces, may be used up to maximum labeled rates and rinsing is not required unless mandated by the label use directions. May be used up to maximum labeled rates for disinfecting and sanitizing equipment or tools. No intervening event is necessary before equipment is used in organic production.

Crop Products: Copper Products

Attest-O Plant Growth Nutrient Organic (stj-15771) ◆
Micronutrient deficiency must be documented by soil or tissue testing or other documented and verifiable method as approved by a certifying agent. Must not be used as an herbicide, defoliant or desiccant.

Crop Products: Copper Sulfate

INSTILL-O (stj-12513) ◆
For plant disease control, must be used in a manner that minimizes accumulation of copper in the soil. For use as an algicide in aquatic rice systems and for tadpole shrimp control in aquatic rice systems, must not exceed one application per field during any 24-month period. Application rates are limited to those which do not increase baseline soil test values for copper over a time frame agreed upon by the producer and accredited certifying agent. May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

North Little Rock, Arkansas 72114
United States
P: +15017588500
bmaingi@pssi.com
www.pssi.com

Processing Products: Chlorine Materials

Safe Foods Chemical Innovations KC-615 (sfc-18771) ◆
May be used in direct contact with post-harvest crop or food at levels approved by the FDA or the EPA for such a purpose. Such use must include a final rinse and residual chlorine levels in final rinse water shall not exceed the Maximum Residual Disinfectant Limit under the Safe Drinking Water Act, except that a final rinse is not required for use in FSIS inspected egg breaking facilities. When used as disinfectants and sanitizers for food contact surfaces, may be used up to maximum labeled rates and rinsing is not required unless mandated by the label use directions. May be used up to maximum labeled rates for disinfecting and sanitizing equipment or tools. No intervening event is necessary before equipment is used in organic production.

Processing Products: Peracetic Acid/Peroxyacetic Acid

PROMOAT FV™ (sfc-10937) ◆
May be used as a sanitizer on food contact surfaces. Use in wash and/or rinse water must comply with FDA limitations.

SAFE-pHix LLC

Livestock Products: Acid Activators for Chlorine Dioxide

SAFE-pHix brand LpH 100 Activator & Adjuvant for Chlorine Dioxide, Biocide, Fungicide, Disinfectant, pH/ORP Adjuster (ath-7609) ◆
Chlorine products may be used up to maximum labeled rates for disinfecting and sanitizing equipment or tools (including dairy pipelines and tanks). Residual chlorine levels in the water in direct contact with food products or animals shall not exceed the maximum residual disinfectant limit under the Safe Drinking Water Act (4 mg/L (4ppm) expressed as chlorine, 0.8 mg/L (0.8 ppm) expressed as chlorine dioxide). May be used up to maximum labeled rates for sanitizing equipment or tools. Label instructions should be followed regarding requirements for rinsing or not rinsing prior to the equipment's next use. Must only be used for the generation of chlorine dioxide. Use of resulting chlorine dioxide must comply with 205.603(a)(10)(ii).

Crop Products: Adjuvants, for use in fertilizers and soil amendments

SaferGro pH Down pH Adjuster - Complexing Agent (sli-2531)

Crop Products: Boron Products

SaferGro® Biomin® Boron Mineral For Soil and Foliar Application (sli-2517) ◆
Micronutrient deficiency must be documented by soil or tissue testing or other documented and verifiable method as approved by a certifying agent. Must not be used as an herbicide, defoliant or desiccant.

Crop Products: Boron Products, Fertilizers, Blended with micronutrients

SaferGro Biomin Cal-Boro 1-0-0 Minerals For Soil and Foliar Application (sli-2511) ◆
Refer to specific ingredient categories for applicable use restrictions. Micronutrient deficiency must be documented by soil or tissue testing or other documented and verifiable method as approved by a certifying agent. Must not be used as an herbicide, defoliant or desiccant.

Crop Products: Botanical Pesticides

SaferGro® Pest Out Broad Spectrum Miticide/Insecticide Controls Mites, Thrips and Aphids (sli-2512) ◆
May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

SaferGro Ant Out Botanical Insecticide Concentrate (sli-2513) ◆
May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

SaferGro® Mildew Cure® Fungicide for Powdery Mildew Control (sli-2514) ◆
May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

SaferGro® No Moss® Broad Spectrum Mossicide Controls Mosses and Liverworts (sli-2516) ◆
May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

SaferGro Mildew Cure Fungicide for Powdery Mildew Control Ready To Use (sli-3528) ◆
May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

SaferGro Ant Out Botanical Insecticide Ready To Use (sli-3530) ◆
May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

SaferGro® Pest Out Broad Spectrum Miticide/Insecticide Ready to Use (sli-4911) ◆
May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Crop Products: Calcium

SaferGro Biomin Calcium 1-0-0 Complexed Nutrient For Soil and Foliar Application (sli-2518)

Crop Products: Copper Products

SaferGro Biomin Copper 1-0-0 Complexed Micronutrient For Soil And Foliar Application (sli-2519) ◆
Micronutrient deficiency must be documented by soil or tissue testing or other documented and verifiable method as approved by a certifying agent. Must not be used as an herbicide, defoliant or desiccant.

Crop Products: Fish Products, Liquid, Stabilized

SaferGro Aqua Power Organic Fish Fertilizer 5-1-1 (sli-3532) ■

Crop Products: Garlic

SaferGro Biorepel Natural Insect Repellent Concentrate (sli-2524) ◆
May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

SaferGro Biorepel Natural Insect Repellent Ready To Use (sli-3531) ◆
May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Crop Products: Herbicides

SaferGro Weed Zap Non-selective Herbicide For Annual Grasses And Weeds Concentrate (sli-2530) ◆
May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

SaferGro Weed Zap Non-Selective Herbicide for Annual Grasses and Weeds Ready To Use (sli-3529) ◆
May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Crop Products: Humic Acids – alkali extracted

SaferGro® Humax Humic Acid (sli-2525)

Crop Products: Iron Products

SaferGro® Biomin® Iron Complexed Micronutrient For Soil and Foliar Application (sli-2520) ◆
Micronutrient deficiency must be documented by soil or tissue testing or other documented and verifiable method as approved by a certifying agent. Must not be used as an herbicide, defoliant or desiccant.

Crop Products: Magnesium Sulfate – Allowed With Restrictions

SaferGro Biomin Magnesium 1-0-0 Complexed Micronutrient For Soil and Foliar Application (sli-2521) ◆
May be used as a plant or soil amendment if soil deficiency of magnesium is documented by testing.

Crop Products: Magnesium Sulfate – Allowed With Restrictions, Manganese Products, Zinc Products

SaferGro Promot MZM Organic Starter Fertilizer (sli-2529) ◆
May be used as a plant or soil amendment if soil deficiency of magnesium is documented by testing. Micronutrient deficiency must be documented by soil or tissue testing or other documented and verifiable method as approved by a certifying agent. Must not be used as an herbicide, defoliant or desiccant.

Crop Products: Manganese Products

SaferGro® Biomin® Manganese Complexed Micronutrient For Soil and Foliar Application (sli-2522) ◆
Micronutrient deficiency must be documented by soil or tissue testing or other documented and verifiable method as approved by a certifying agent. Must not be used as an herbicide, defoliant or desiccant.

Crop Products: Microbial Inoculants

SaferGro Mycormax™ Biological Inoculum Soil Amendment (sli-7291)

Crop Products: Wetting Agents

SaferGro® Natural Wet Wetting Agent (sli-2527)

Crop Products: Zinc Products

SaferGro® Biomin® Zinc Complexed Micronutrient For Soil and Foliar Application (sli-2523) ◆
Micronutrient deficiency must be documented by soil or tissue testing or other documented and verifiable method as approved by a certifying agent. Must not be used as an herbicide, defoliant or desiccant.

Crop Products: Biopesticides

Grower's Ally Crop Defender 3 Miticide Insecticide Fungicide (sge-16939) ◆
May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Grower's Ally Crop Defender 3 Miticide Insecticide Fungicide Concentrate (sge-16940) ◆
May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Crop Products: Botanical Pesticides

Grower's Ally Spider Mite Control Concentrate (sge-12822) ◆
May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Grower's Ally Spider Mite Control (sge-12823) ◆
May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Earth's Ally Insect Control For Organic Gardening (sge-12824) ◆
May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Earth's Ally Insect Control for Organic Gardening Concentrate (sge-15329) ◆
May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Earth's Ally 3-IN-1 Plant Spray For Organic Gardening Insecticide, Miticide & Fungicide Concentrate (sge-16768) ◆
May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Earth's Ally 3-IN-1 Plant Spray For Organic Gardening Insecticide, Miticide & Fungicide (sge-16769) ◆
May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Crop Products: Fungicides

Grower's Ally Fungicide Concentrate (sge-13252) ◆
When used pre-harvest, may only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices. When used in post-harvest handling of raw agricultural commodities, not subject to the requirements of 205.206(e).

Grower's Ally Fungicide (sge-13253) ◆
When used pre-harvest, may only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices. When used in post-harvest handling of raw agricultural commodities, not subject to the requirements of 205.206(e).

Earth's Ally Disease Control for Organic Gardening (sge-13254) ◆
When used pre-harvest, may only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices. When used in post-harvest handling of raw agricultural commodities, not subject to the requirements of 205.206(e).

Earth's Ally Disease Control For Organic Gardening Concentrate (sge-13255) ◆
When used pre-harvest, may only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices. When used in post-harvest handling of raw agricultural commodities, not subject to the requirements of 205.206(e).

Earth's Ally Disease Control For Organic Lawn Care Concentrate Ready-To-Spray (sge-16770) ◆
When used pre-harvest, may only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices. When used in post-harvest handling of raw agricultural commodities, not subject to the requirements of 205.206(e).

Crop Products: Herbicides

Earth's Ally Weed & Grass Killer Concentrate (sge-18527) ◆
May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

BioAdvanced Science-Based Solutions Organics Brand Disease & Fungus Control Ready-To-Use (sbm-17464) ◆
For plant disease control. Must be used in a manner that minimizes copper accumulation in the soil and shall not be used as herbicides. May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Natria Disease & Fungus Control Ready-To-Use (sbm-17465) ◆
For plant disease control. Must be used in a manner that minimizes copper accumulation in the soil and shall not be used as herbicides. May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

BioAdvanced Science-Based Solutions Organics Brand Disease & Fungus Control Concentrate (sbm-17466) ◆
For plant disease control. Must be used in a manner that minimizes copper accumulation in the soil and shall not be used as herbicides. May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Crop Products: Ferric Phosphate

Natria Snail & Slug Killer Bait Ready-To-Use (sbm-10100) ◆
For use as slug and snail bait. May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Crop Products: Neem and Neem Derivatives

Natria Neem Oil Ready-To-Use (sbm-10099) ◆
May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

BioAdvanced® Science-Based Solutions Organics Brand Neem Oil Ready-To-Use (sbm-16267) ◆
May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Crop Products: Soap

Natria Insecticidal Soap Ready-To-Use (sbm-10097) ◆
For use as an algicide/demosser, herbicide or insecticide. When used as an herbicide may only be used for farmstead maintenance (roadways, ditches, right of ways, building perimeters) and ornamental crops. May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Bioadvanced® Science Based-Solutions Organics Brand Tomato Vegetable & Fruit Insect Control Ready-To-Use (sbm-16289) ◆
For use as an algicide/demosser, herbicide or insecticide. When used as an herbicide may only be used for farmstead maintenance (roadways, ditches, right of ways, building perimeters) and ornamental crops. May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

BIOADVANCED® SCIENCE-BASED SOLUTIONS ORGANICS BRAND WEED & GRASS KILLER READY-TO-USE (sbm-16327) ◆
For use as an algicide/demosser, herbicide or insecticide. When used as an herbicide may only be used for farmstead maintenance (roadways, ditches, right of ways, building perimeters) and ornamental crops. May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

BIOADVANCED® SCIENCE-BASED SOLUTIONS ORGANICS BRAND INSECTICIDAL SOAP READY-TO-USE (sbm-16328) ◆
For use as an algicide/demosser, herbicide or insecticide. When used as an herbicide may only be used for farmstead maintenance (roadways, ditches, right of ways, building perimeters) and ornamental crops. May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Bioadvanced Science Based-Solutions Organics Brand Houseplant Insect Killer Ready-To-Use (sbm-16500) ◆
For use as an algicide/demosser, herbicide or insecticide. When used as an herbicide may only be used for farmstead maintenance (roadways, ditches, right of ways, building perimeters) and ornamental crops. May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Natria Houseplant Insect Killer Ready-To-Use (sbm-17468) ◆
For use as an algicide/demosser, herbicide or insecticide. When used as an herbicide may only be used for farmstead maintenance (roadways, ditches, right of ways, building perimeters) and ornamental crops. May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Natria Tomato, Vegetable & Fruit Insect Control Ready-To-Use (sbm-17469) ◆
For use as an algicide/demosser, herbicide or insecticide. When used as an herbicide may only be used for farmstead maintenance (roadways, ditches, right of ways, building perimeters) and ornamental crops. May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Natria Grass & Weed Control Ready-To-Use (sbm-18813) ◆
For use as an algicide/demosser, herbicide or insecticide. When used as an herbicide may only be used for farmstead maintenance (roadways, ditches, right of ways, building perimeters) and ornamental crops. May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Crop Products: Spinosad

Natria Ant Barrier Ready-to-Use (sbm-13512) ◆
May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Crop Products: Chlorine Dioxide

Selectrocide® 12G Disinfectant/Sanitizer/Tuberculocide/Virucide */Fungicide/Algaecide/Slimicide/Deodorizer (smt-6719) ◆
Residual chlorine levels in the water in direct crop contact (when used pre-harvest) or as water from cleaning irrigation systems applied to the soil should not exceed the maximum residual disinfectant level under the Safe Drinking Water Act (4 mg/L (4ppm) expressed as chlorine, 0.8 mg/L (0.8 ppm) expressed as chlorine dioxide), except that chlorine products may be used in edible sprout production according to EPA label directions. May be used up to maximum labeled rates for disinfecting and sanitizing equipment or tools. No intervening event is necessary before equipment is used in contact with organic crops.

Selectrocide® 2L500 Disinfectant/Sanitizer/Virucide*/Fungicide/Algaecide/Slimicide/Deodorizer (smt-6720) ◆
Residual chlorine levels in the water in direct crop contact (when used pre-harvest) or as water from cleaning irrigation systems applied to the soil should not exceed the maximum residual disinfectant level under the Safe Drinking Water Act (4 mg/L (4ppm) expressed as chlorine, 0.8 mg/L (0.8 ppm) expressed as chlorine dioxide), except that chlorine products may be used in edible sprout production according to EPA label directions. May be used up to maximum labeled rates for disinfecting and sanitizing equipment or tools. No intervening event is necessary before equipment is used in contact with organic crops.

Selectrocide 1G Disinfectant/Sanitizer/Tuburculocide/Virucide */Fungicide/Algaecide/Slimicide/Deodorizer (smt-17526) ◆
Residual chlorine levels in the water in direct crop contact (when used pre-harvest) or as water from cleaning irrigation systems applied to the soil should not exceed the maximum residual disinfectant level under the Safe Drinking Water Act (4 mg/L (4ppm) expressed as chlorine, 0.8 mg/L (0.8 ppm) expressed as chlorine dioxide), except that chlorine products may be used in edible sprout production according to EPA label directions. May be used up to maximum labeled rates for disinfecting and sanitizing equipment or tools. No intervening event is necessary before equipment is used in contact with organic crops.

Processing Products: Acidified Sodium Chlorite, Chlorine Dioxide

ClO2bber 100 Abridged Disinfectant/Sanitizer/Virucide/Fungicide/Algaecide/Slimicide/Deodorizer (smt-5288) ◆
For secondary direct antimicrobial food treatment and indirect food contact surface sanitizing. Acidified with citric acid only. May be used in direct contact with post-harvest crop or food at levels approved by the FDA or the EPA for such a purpose. Such use must include a final rinse and residual chlorine levels in final rinse water shall not exceed the Maximum Residual Disinfectant Limit under the Safe Drinking Water Act, except that a final rinse is not required for use in FSIS inspected egg breaking facilities. When used as disinfectants and sanitizers for food contact surfaces, may be used up to maximum labeled rates and rinsing is not required unless mandated by the label use directions. May be used up to maximum labeled rates for disinfecting and sanitizing equipment or tools. No intervening event is necessary before equipment is used in organic production.

Selectrocide A12 (smt-6541) ◆
For secondary direct antimicrobial food treatment and indirect food contact surface sanitizing. Acidified with citric acid only. May be used in direct contact with post-harvest crop or food at levels approved by the FDA or the EPA for such a purpose. Such use must include a final rinse and residual chlorine levels in final rinse water shall not exceed the Maximum Residual Disinfectant Limit under the Safe Drinking Water Act, except that a final rinse is not required for use in FSIS inspected egg breaking facilities. When used as disinfectants and sanitizers for food contact surfaces, may be used up to maximum labeled rates and rinsing is not required unless mandated by the label use directions. May be used up to maximum labeled rates for disinfecting and sanitizing equipment or tools. No intervening event is necessary before equipment is used in organic production.

Selectrocide® A5 (smt-7602) ◆
For secondary direct antimicrobial food treatment and indirect food contact surface sanitizing. Acidified with citric acid only. May be used in direct contact with post-harvest crop or food at levels approved by the FDA or the EPA for such a purpose. Such use must include a final rinse and residual chlorine levels in final rinse water shall not exceed the Maximum Residual Disinfectant Limit under the Safe Drinking Water Act, except that a final rinse is not required for use in FSIS inspected egg breaking facilities. When used as disinfectants and sanitizers for food contact surfaces, may be used up to maximum labeled rates and rinsing is not required unless mandated by the label use directions. Crop Products: Copper Sulfate

SePRO Blue-Stone Crystals (sep-10555) ◆
For plant disease control, must be used in a manner that minimizes accumulation of copper in the soil. For use as an algicide in aquatic rice systems and for tadpole shrimp control in aquatic rice systems, must not exceed one application per field during any 24-month period. Application rates are limited to those which do not increase baseline soil test values for copper over a time frame agreed upon by the producer and accredited certifying agent. May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Crop Products: Coppers, fixed

SePRO Camelot O Fungicide/Bactericide Flowable Liquid Copper Fungicide (sep-2327) ◆
For plant disease control. Must be used in a manner that minimizes copper accumulation in the soil and shall not be used as herbicides. May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

SePRO CuPRO 5000 Fungicide/Bactericide Dry Flowable (sep-8711) ◆
For plant disease control. Must be used in a manner that minimizes copper accumulation in the soil and shall not be used as herbicides. May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Crop Products: Microbial Pesticides

SePRO Zio Fungicide (sep-7681) ◆
May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Crop Products: Sodium Carbonate Peroxyhydrate

SePRO PAK 27 Algaecide (sep-5158) ◆
For use as an algicide. Federal law restricts the use of this substance in food crop production to approved food uses identified on the product label. May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Crop Products: Trichoderma spp.

Obtego Fungicide and Plant Symbiont (sep-12038) ◆
May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

HEPTAXION Control de Patógenos Nematicida/ Fungicida (smr-14799) ◆
May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Crop Products: Copper Sulfate

CuProtective Fungicida Bactericida (smr-11041) ◆
For plant disease control, must be used in a manner that minimizes accumulation of copper in the soil. For use as an algicide in aquatic rice systems and for tadpole shrimp control in aquatic rice systems, must not exceed one application per field during any 24-month period. Application rates are limited to those which do not increase baseline soil test values for copper over a time frame agreed upon by the producer and accredited certifying agent. May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

FungiMixTOS Bio Fungicida Foliar Fungicida/ Bactericida (smr-14800) ◆

Processing Products: Chlorine Materials, Egg Wash – Allowed With Restrictions, Fruit and Vegetable Wash, post-harvest

Spartan SparCHLOR Chlorinated Sanitizer (spt-8905) ◆
May be used in direct contact with post-harvest crop or food at levels approved by the FDA or the EPA for such a purpose. Such use must include a final rinse and residual chlorine levels in final rinse water shall not exceed the Maximum Residual Disinfectant Limit under the Safe Drinking Water Act, except that a final rinse is not required for use in FSIS inspected egg breaking facilities. When used as disinfectants and sanitizers for food contact surfaces, may be used up to maximum labeled rates and rinsing is not required unless mandated by the label use directions. May be used up to maximum labeled rates for disinfecting and sanitizing equipment or tools. No intervening event is necessary before equipment is used in organic production. Refer to specific ingredient categories for applicable use restrictions. For use in post-harvest handling of raw agricultural commodities.

Processing Products: Peracetic Acid/Peroxyacetic Acid

Spartan PAA Sanitizer (spt-11413) ◆
May be used as a sanitizer on food contact surfaces. Use in wash and/or rinse water must comply with FDA limitations.

Spartan Pro-Vention FP Pro Antimicrobial Solution For Meat, Poultry and Seafood (spt-20245) ◆
May be used as a sanitizer on food contact surfaces. Use in wash and/or rinse water must comply with FDA limitations.

Processing Products: Sodium Hydroxide

Spartan Eggs So Clean pH Booster (spt-8692) ◆
Must not be used in lye peeling of fruits and vegetables.

Crop Products: Fertilizers, Blended with micronutrients, Fertilizers, Blended with synthetic magnesium sulfate, Iron Products

Micronized Symbys Organics 1-11-0 BLOOM Bud & Bloom Fertilizer (syb-12939) ◆
May be used as a plant or soil amendment if soil deficiency of magnesium is documented by testing. Refer to specific ingredient categories for applicable use restrictions. Micronutrient deficiency must be documented by soil or tissue testing or other documented and verifiable method as approved by a certifying agent. Must not be used as an herbicide, defoliant or desiccant.

Crop Products: Fertilizers, Blended with micronutrients, Iron Products

Micronized Symbys Organics 6-1-1 GROW Concentrated Plant Nutrients (syb-12938) ◆
Refer to specific ingredient categories for applicable use restrictions. Micronutrient deficiency must be documented by soil or tissue testing or other documented and verifiable method as approved by a certifying agent. Must not be used as an herbicide, defoliant or desiccant.

Crop Products: Fertilizers, Blended with synthetic magnesium sulfate

Micronized Symbys Organics 0.7-0-0.8 CAL MAG (syb-12940) ◆
May be used as a plant or soil amendment if soil deficiency of magnesium is documented by testing.

Micronized Symbys Organics 1.5-1.5-1.5 TEA Compost Tea Formula (syb-12942) ◆
May be used as a plant or soil amendment if soil deficiency of magnesium is documented by testing.

Crop Products: Fertilizers, Blended with synthetic magnesium sulfate, Iron Products

Micronized Symbys Organics 1.5-1.5-1.5 TRANSITION (syb-12941) ◆
May be used as a plant or soil amendment if soil deficiency of magnesium is documented by testing. Micronutrient deficiency must be documented by soil or tissue testing or other documented and verifiable method as approved by a certifying agent. Must not be used as an herbicide, defoliant or desiccant.

Livestock Products: Chlorine Dioxide

Pure 3000 (plg-19526) ◆
Chlorine products may be used up to maximum labeled rates for disinfecting and sanitizing equipment or tools (including dairy pipelines and tanks). Residual chlorine levels in the water in direct contact with food products or animals shall not exceed the maximum residual disinfectant limit under the Safe Drinking Water Act (4 mg/L (4ppm) expressed as chlorine, 0.8 mg/L (0.8 ppm) expressed as chlorine dioxide). May be used up to maximum labeled rates for sanitizing equipment or tools. Label instructions should be followed regarding requirements for rinsing or not rinsing prior to the equipment's next use.

Processing Products: Chlorine Dioxide

Pure 100 Spray Disinfectant (plg-15433) ◆
May be used in direct contact with post-harvest crop or food at levels approved by the FDA or the EPA for such a purpose. Such use must include a final rinse and residual chlorine levels in final rinse water shall not exceed the Maximum Residual Disinfectant Limit under the Safe Drinking Water Act, except that a final rinse is not required for use in FSIS inspected egg breaking facilities. When used as disinfectants and sanitizers for food contact surfaces, may be used up to maximum labeled rates and rinsing is not required unless mandated by the label use directions. May be used up to maximum labeled rates for disinfecting and sanitizing equipment or tools. No intervening event is necessary before equipment is used in organic production.

Pure 3000 (plg-19525) ◆
May be used in direct contact with post-harvest crop or food at levels approved by the FDA or the EPA for such a purpose. Such use must include a final rinse and residual chlorine levels in final rinse water shall not exceed the Maximum Residual Disinfectant Limit under the Safe Drinking Water Act, except that a final rinse is not required for use in FSIS inspected egg breaking facilities. When used as disinfectants and sanitizers for food contact surfaces, may be used up to maximum labeled rates and rinsing is not required unless mandated by the label use directions. May be used up to maximum labeled rates for disinfecting and sanitizing equipment or tools. No intervening event is necessary before equipment is used in organic production.

PureOxi (plg-19778) ◆
May be used in direct contact with post-harvest crop or food at levels approved by the FDA or the EPA for such a purpose. Such use must include a final rinse and residual chlorine levels in final rinse water shall not exceed the Maximum Residual Disinfectant Limit under the Safe Drinking Water Act, except that a final rinse is not required for use in FSIS inspected egg breaking facilities. Crop Products: Aquatic Plant Products

PRO-ACTIV+ BIOESTIMULANTE ORGÁNICO LÍQUIDO (taa-19995)

Crop Products: Botanical Pesticides

PIPER EC INSECTICIDA-ACARICIDA (taa-16650) ◆
May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

ARA 3 SC INSECTICIDA BOTÁNICO (taa-17429) ◆
May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Crop Products: Copper Sulfate

Kupfer/AP Sulfato De Cobre Al 21% Fungicida y Batericida Solución Acuosa (taa-13754) ◆
For plant disease control, must be used in a manner that minimizes accumulation of copper in the soil. For use as an algicide in aquatic rice systems and for tadpole shrimp control in aquatic rice systems, must not exceed one application per field during any 24-month period. Application rates are limited to those which do not increase baseline soil test values for copper over a time frame agreed upon by the producer and accredited certifying agent. May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

CUPROAN PRO+ Fungicida - Bactericida (taa-17435) ◆
For plant disease control, must be used in a manner that minimizes accumulation of copper in the soil. For use as an algicide in aquatic rice systems and for tadpole shrimp control in aquatic rice systems, must not exceed one application per field during any 24-month period. Application rates are limited to those which do not increase baseline soil test values for copper over a time frame agreed upon by the producer and accredited certifying agent. Processing Products: Acid Activators for Chlorine Dioxide

TwinOxide 0.3% ClO2 Solution Component B Sodium Bisulfate Powder Composition (gct-10872) ◆
Must only be used for the generation of chlorine dioxide. Use of resulting chlorine dioxide must comply with 205.605(b).

Processing Products: Chlorine Dioxide

TwinOxide 0.3% ClO2 Solution Component A Sodium Chlorite Powder Composition (gct-10801) ◆
May be used in direct contact with post-harvest crop or food at levels approved by the FDA or the EPA for such a purpose. Such use must include a final rinse and residual chlorine levels in final rinse water shall not exceed the Maximum Residual Disinfectant Limit under the Safe Drinking Water Act, except that a final rinse is not required for use in FSIS inspected egg breaking facilities. When used as disinfectants and sanitizers for food contact surfaces, may be used up to maximum labeled rates and rinsing is not required unless mandated by the label use directions. May be used up to maximum labeled rates for disinfecting and sanitizing equipment or tools. No intervening event is necessary before equipment is used in organic production.

CYR® Omega extracto de chicalote (Argemone mexicana) INSECTICIDA y ACARICIDA BOTANICO / CONCENTRADO EMULSIONABLE (uqa-8772) ◆
May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

CYR® Piretrinas extracto de tagetes (Tagetes spp.) INSECTICIDA BOTANICO / CONCENTRADO EMULSIONABLE (uqa-8773) ◆
May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Progranic® LarreaT® extracto de gobernadora (Larrea tridentata) FUNGICIDA y/o BACTERICIDA BOTANICO / LIQUIDO SOLUBLE (uqa-8774) ◆
May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Progranic® Tagetes® extracto de tagetes (Tagetes spp.) INSECTICIDA BOTANICO / CONCENTRADO EMULSIONABLE (uqa-8776) ◆
May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Progreen Acar extracto de canela INSECTICIDA y/o ACARICIDA / EMULSION ACEITE EN AGUA (uqa-11775) ◆
May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

ULTRACHEM® Mega extracto de gobernadora (Larrea tridentata) FUNGICIDA Y/O BACTERICIDA BOTANICO / LIQUIDO SOLUBLE (uqa-12970) ◆
May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

DISAGRO SUPRALID INSECTICIDA BIOQUÍMICO – Alcaloide, Alquilsulfato Argemonina, Berberina, Ricinina, α-Terthienil (uqa-14006) ◆
May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

BioProtector argemonina, berberina, ricinina y α-terthienil INSECTICIDA y/o ACARICIDA BOTANICO / EXTRACTO ACUOSO (uqa-14143) ◆
May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Caneema 70 EC Insecticida - Acaricida - Botánico Extracto de Neem + Extracto de Canela (uqa-15447) ◆
May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Extragober 95 SL Fungicida - Bactericida - Botánico Extracto de Gobernadora (uqa-15448) ◆
May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Piretage 90 EC Insecticida-Botánico Extracto de Tagetes (uqa-15449) ◆
May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Progranic® alfa extracto de ajo Insecticida Botanico / Concentrado Soluble (uqa-15972) ◆
May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

NATURICIDE PIRETRO extracto de tagetes (Tagetes spp.) Insecticida Botanico/Concentrado Emulsionable (uqa-15986) ◆
May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

STAR argemonina, berberina, ricina y α-terthienyl Insecticida y/o Acaricida Botanico / Extracto Acuoso (uqa-16059) ◆
May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

CinnAcar Cinnamon Oil INSECTICIDE & MITICIDE / OIL IN WATER EMULSION (uqa-16761) ◆
May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

PROGRANIC Garlic LS extracto de ajo INSECTICIDA BOTANICO / CONCENTRADO SOLUBLE (uqa-17306) ◆
May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

PROGRANIC Gamma extracto de ajo + extracto de chile picante + extracto de canela INSECTICIDA y/o ACARICIDA / LIQUIDO SOLUBLE (uqa-17919) ◆
May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

CHICANO 60 SL INSECTICIDA - BOTÁNICO EXTRACTO DE AJO + EXTRACTO DE CHILE PICANTE + EXTRACTO DE CANELA (uqa-19107) ◆
May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

PROGRANIC GAMMA 60,43 SL INSECTICIDA - BOTÁNICO EXTRACTO DE AJO (Allium sativum), EXTRACTO DE CHILE PICANTE (Capsicum frutescens), EXTRACTO DE CANELA (Cinnamomum zeylanicum) (uqa-19108) ◆
May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

PROGRANIC GAMMA 60.43 SL INSECTICIDA - BOTÁNICO (uqa-19109) ◆
May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

PROGRANIC MEGA 76,85 SL FUNGICIDA, BACTERICIDA - BOTÁNICO EXTRACTO DE GOBERNADORA (Larrea tridentata) (uqa-19110) ◆
May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

PROGRANIC MEGA 76.85 SL FUNGICIDA, BACTERICIDA - BOTÁNICO (uqa-19111) ◆
May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Prontius ACHC EXTRACTO VEGETAL CONCENTRADO SOLUBLE – SL Insecticida Para El Control De Trips De La Mancha Roja En El Cultivo De Banano (uqa-19112) ◆
May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

PROGRANIC Cinnacar 15,18 EW INSECTICIDA, ACARICIDA - BOTÁNICO EXTRACTO DE CANELA (Cinnamomum zeylanicum) (uqa-19113) ◆
May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

PROGRANIC NeemAcar 65,44 EC INSECTICIDA, ACARICIDA - BOTÁNICO EXTRACTO DE NEEM (Azadirachta indica) EXTRACTO DE CANELA (Cinnamomum zeylanicum) (uqa-19114) ◆
May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

PROGRANIC NEEMACAR 65 EC INSECTICIDA, ACARICIDA - BOTÁNICO (uqa-19115) ◆
May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

PROGRANIC Omega 83,16 EC INSECTICIDA, ACARICIDA - BOTÁNICO EXTRACTO DE CHICALOTE (Argemone mexicana) (uqa-19116) ◆
May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

BioShot Garlic Oil + Cinnamon Oil + Clove Oil + Thyme Oil INSECT REPELLANT / INSECTICIDE & MITICIDE OIL IN WATER EMULSION (uqa-19716) ◆
May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

UltraChem Neemacar CE extracto de neem + extracto de canela INSECTICIDA y/o ACARICIDA BOTANICO / CONCENTRADO EMULSIONABLE (uqa-20220) ◆
May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Crop Products: Neem and Neem Derivatives

PROGRANIC® Nimicide 80 extracto de aceite de neem INSECTICIDA Y ACARICIDA / CONCENTRADO EMULSIONABLE (uqa-2975) ◆
May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

CYR Neem CE 80 extracto de aceite de neem INSECTICIDA y ACARICIDA / CONCENTRADO EMULSIONABLE (uqa-3465) ◆
May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Naturacide Neem CE 80 extracto de aceite de neem Insecticida Y Acaricida / Concentrado Emulsionable (uqa-3466) ◆
May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Crop Products: Potassium Bicarbonate

PROGRANIC Mix-Top Bicarbonato de potasio FUNGICIDA / POLVO SOLUBLE (uqa-16762) ◆
For plant disease control. May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Crop Products: Soap

Ultralux S sales potásicas de ácidos grasos Insecticida y Acaricida/Concentrado Soluble (uqa-7617) ◆
For use as an algicide/demosser, herbicide or insecticide. When used as an herbicide may only be used for farmstead maintenance (roadways, ditches, right of ways, building perimeters) and ornamental crops. May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

CYR® PotasyMax sales potásicas de ácidos grasos INSECTICIDA y ACARICIDA / CONCENTRADO SOLUBLE (uqa-10485) ◆
For use as an algicide/demosser, herbicide or insecticide. When used as an herbicide may only be used for farmstead maintenance (roadways, ditches, right of ways, building perimeters) and ornamental crops. May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

DIE SOAP K Sales potásicas de ácidos grasos INSECTICIDA y ACARICIDA / CONCENTRADO SOLUBLE (uqa-11776) ◆
For use as an algicide/demosser, herbicide or insecticide. When used as an herbicide may only be used for farmstead maintenance (roadways, ditches, right of ways, building perimeters) and ornamental crops. May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Processing Products: Botanical Pesticides

EcoUrban argemonina + berberina + ricinina + α-terthienil Insecticida / Extracto Acuoso (uqa-13220) ◆
For use as a pesticide only in conjunction with the facility pest management practices provided for in paragraphs 205.271(a) and (b) and only if those practices are not effective to prevent or control pests alone. For use in post-harvest handling of raw agricultural commodities.

Green Shot argemonina + berberina + ricina + α-terthienil INSECTICIDA / EXTRACTO ACUOSOS (uqa-17837) ◆
For use as a pesticide only in conjunction with the facility pest management practices provided for in paragraphs 205.271(a) and (b) and only if those practices are not effective to prevent or control pests alone. For use in post-harvest handling of raw agricultural commodities.

Blue Cure (una-13189) ◆
For use as plant disease control, or as an insecticide (including acaricide or mite control). May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices. For plant disease control, must be used in a manner that minimizes accumulation of copper in the soil. For use as an algicide in aquatic rice systems and for tadpole shrimp control in aquatic rice systems, must not exceed one application per field during any 24-month period. Application rates are limited to those which do not increase baseline soil test values for copper over a time frame agreed upon by the producer and accredited certifying agent. For plant disease control.

May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Bactur 2X Insecticida Larvicida Para El Control De Lepidopteros (abb-2670) ◆
May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Bazthu • 32 Insecticida larvicida para el control de lepidópteros. Polvo mojable (WP) (abb-2679) ◆
May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

BioBit 32 Insecticida Granulado Dispersable en Agua (WG) (abb-2680) ◆
May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Geoda Insecticida Larvicida Para El Control De Lepidópteros Polvo Mojable (WP) (abb-2681) ◆
May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

FlorBac® WG Bioinsecticida Granulado Dispersable en Agua (abb-2706) ◆
May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Aztron WDG Biological Insecticide (abb-2707) ◆
May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Dipel 6.4 WG Bioinsecticide (abb-3417) ◆
May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

DiPel 10G Biological Insecticide Granule (abb-3723) ◆
May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

DiPel 54WG Agente de Control Biológico Microbiano Insecticida Agricola Gránulo dispersable en agua (WG) (abb-3755) ◆
May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

VectoBac GR Biological Larvicide Granules (abb-8250) ◆
May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Bactimos WG Bacterial Larvicide (abb-11512) ◆
May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

DiPel WG Insecticida - Granulado Dispersable (WG) (abb-11955) ◆
May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

DiPel DF Insecticida Microbiano / Floable Seco (abb-13306) ◆
May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

DiPel 2X Insecticida Biológico Polvo Mojable (P.M.) (abb-13366) ◆
May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

XenTari DF Insecticida Biologico/Floable Seco (abb-13537) ◆
May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

XenTari Microbial Pesticide (abb-13917) ◆
May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

VectoBac WG Biological Larvicide Water Dispersible Granule (abb-13979) ◆
May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

DiPel DF Biological Insecticide Water Dispersible Granule (abb-15778) ◆
May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Florbac WG Biological Insecticide Water Dispersible Granule (abb-15779) ◆
May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

VectoBac FG+ Biological Larvicide Fine Granule (abb-17386) ◆
May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

XenTari GD Bioinsecticida Granulado Dispersable en Agua (WG) (abb-17696) ◆
May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

DiPel DF Bioinsecticida Granulado Dispersable en Agua (WG) (abb-17698) ◆
May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Crop Products: Biopesticides

DiTera® DF Biological Nematicide Dry Flowable (abb-3077) ◆
May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

VectoMax FG Biological Larvicide Fine Granule (abb-8251) ◆
May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

DiTera DF Nematicida Biologico / Floable Seco (abb-13307) ◆
May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Zorda WG Biological Fungicide (abb-17553) ◆
May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Magic Gardener Biological Disease Control (abb-18834) ◆
May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

AmyloShield Biological Fungicide (abb-18845) ◆
May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Crop Products: Gibberellic Acid

ProVide® 10 SG Plant Growth Regulator Soluble Granule (abb-5058) ◆
May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Valent BioSciences ProGibb® Gibberellic Acid Water Soluble Powder Plant Growth Regulator (abb-0315) ◆
May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

ProGibb® 40% Plant Growth Regulator Water Soluble Granule (abb-9526) ◆
May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

RyzUp Regulador de Crecimiento de Plantas de Uso Agricola Concentrado Soluble (SL) (abb-9871) ◆
May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Release® LC Plant Growth Regulator Solution (abb-3139) ◆
May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Release® Plant Growth Regulator Soluble Powder (abb-3140) ◆
May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Sumitomo Chemical RYZUP 40 SG Regulador De Crecimiento Granulos Solubles - SG (abb-0649) ◆
May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Valent BioSciences Activol® 40% GS Regulador De Crecimiento Vegetal (Tipo 1) Granulado soluble (abb-2540) ◆
May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

ProGibb 10SP Plant Growth Regulator Soluble Powder (abb-11552) ◆
May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

ProGibb 40% GS Regulador De Crecimiento Vegetal (Tipo 1) Granulo Soluble (abb-13308) ◆
May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

ProVide 10SG Regulador De Crecimiento (Tipo 1) Granulos (abb-13356) ◆
May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Ryzup 40 Regulador de Crecimiento de Origen Natural (abb-17558) ◆
May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Proliant Plant Growth Regulator Water Soluble Granule (abb-18043) ◆
May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Valent BioSciences ProGibb Easy Gibberellic Acid 40% WSG (Plant Growth Regulator) (abb-18227) ◆
May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Crop Products: Growth Regulators for Plants

RyzUp SmartGrass® Plant Growth Regulator Water Soluble Granule (abb-1880) ◆
May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

ProTone® SG Plant Growth Regulator Soluble Granule (abb-2103) ◆
May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

ProGibb LV PLUS Plant Growth Regulator Liquid (abb-5392) ◆
May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

ConTego SL Plant Growth Regulator Soluble Liquid (abb-5520) ◆
May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Gibberellic Acid (GA3) Technical Powder Plant Growth Regulator (abb-5906) ◆
May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

VBC-30396 Plant Growth Regulator Water Soluble Granule (abb-6114) ◆
May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Aviglycine Technical Concentrate Plant Growth Regulator (abb-7320) ◆
May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

ExCelero Regulador de Crecimiento de Plantas de Uso Agrícola Granulos Solubles (SG) (abb-8605) ◆
May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

ReTain OL Plant Growth Regulator Liquid Concentrate (abb-11800) ◆
May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

ProTone SG Regulador De Crecimiento Vegetal (Tipo 1) Solido (abb-13309) ◆
May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

ProGibb LV PLUS T&O Plant Growth Regulator Solution (abb-14410) ◆
May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

ConShape SL Plant Growth Regulator Soluble Liquid For Use On Christmas Trees (abb-15539) ◆
May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Excelero SL Plant Growth Regulator Liquid Concentrate (abb-17523) ◆
May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Valent BioSciences ProGibb Gibberellic Acid Technical Plant Growth Regulator (abb-18226) ◆
May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Sumitomo Chemical InGrain Regulador de Crecimiento de Plantas de Uso Agrícola Granulos Solubles (SG) (abb-19226) ◆
May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Sumitomo Chemical InGrain Regulador de Crecimiento de Origen Natural Aplicación Foliar (abb-19238) ◆
May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Valent BioSciences InGrain 20 SG Regulador Fisiológico-Acido S-Abscísico (abb-19309) ◆
May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Valent BioSciences InGrain 20 SG Sustancia Afín-Sesquiterpenoide Ácido S-Abscísico (S-ABA) (abb-19311) ◆
May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Valent BioSciences InGrain 20 SG Fitohormona-Orgánico Acido S-Abscisico (abb-19312) ◆
May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Crop Products: Microbial Products

DiPel® 2X DF Biological Insecticide Dry Flowable (abb-1490) ◆
May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Crop Products: Coppers, fixed

Valterra + Burah Fungicida Orgánico (vfs-16874) ◆
For plant disease control. Must be used in a manner that minimizes copper accumulation in the soil and shall not be used as herbicides. May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Crop Products: Pyrethrum, Soap

Valterra + Rhino Insecticida Orgánico (vfs-16875) ◆
For use as an algicide/demosser, herbicide or insecticide. When used as an herbicide may only be used for farmstead maintenance (roadways, ditches, right of ways, building perimeters) and ornamental crops. May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Crop Products: Calcium Chloride

Cal-Plex 12 A Liquid Calcium Concentrate (vls-4992) ◆
For use as a foliar spray to treat a physiological disorder associated with calcium uptake.

Verdesian Polyamine Calcium Organic (vls-4996) ◆
For use as a foliar spray to treat a physiological disorder associated with calcium uptake.

Crop Products: Copper Products

Verdesian Polyamine Copper Organic (vls-4997) ◆
Micronutrient deficiency must be documented by soil or tissue testing or other documented and verifiable method as approved by a certifying agent. Must not be used as an herbicide, defoliant or desiccant.

Crop Products: Copper Products, Fertilizers, Blended with micronutrients, Fertilizers, Blended with synthetic magnesium sulfate, Iron Products, Manganese Products, Zinc Products

Verdesian Intracept-O (vls-4994) ◆
May be used as a plant or soil amendment if soil deficiency of magnesium is documented by testing. Refer to specific ingredient categories for applicable use restrictions. Micronutrient deficiency must be documented by soil or tissue testing or other documented and verifiable method as approved by a certifying agent. Must not be used as an herbicide, defoliant or desiccant.

Crop Products: Copper Products, Iron Products, Magnesium Sulfate – Allowed With Restrictions, Manganese Products, Zinc Products

Polyamine Micro-Pak Organic (vls-5047) ◆
May be used as a plant or soil amendment if soil deficiency of magnesium is documented by testing. Micronutrient deficiency must be documented by soil or tissue testing or other documented and verifiable method as approved by a certifying agent. Must not be used as an herbicide, defoliant or desiccant.

Crop Products: Iron Products

Verdesian Polyamine Iron Organic (vls-4998) ◆
Micronutrient deficiency must be documented by soil or tissue testing or other documented and verifiable method as approved by a certifying agent. Must not be used as an herbicide, defoliant or desiccant.

QC Diamond Brand Coarse Granular Ferrous Sulfate Monohydrate (vls-9694) ◆
Micronutrient deficiency must be documented by soil or tissue testing or other documented and verifiable method as approved by a certifying agent. Must not be used as an herbicide, defoliant or desiccant.

QC Diamond Brand Ferrous Sulfate Heptahydrate (No Anti-Caking) (vls-9695) ◆
Micronutrient deficiency must be documented by soil or tissue testing or other documented and verifiable method as approved by a certifying agent. Must not be used as an herbicide, defoliant or desiccant.

QC Diamond Brand Ferrous Sulfate Heptahydrate (With Anti-Caking) (vls-9697) ◆
Micronutrient deficiency must be documented by soil or tissue testing or other documented and verifiable method as approved by a certifying agent. Must not be used as an herbicide, defoliant or desiccant.

QC Diamond Brand Ferrous Sulfate Heptahydrate Solu-Grade (Without Anti-Caking) (vls-9698) ◆
Micronutrient deficiency must be documented by soil or tissue testing or other documented and verifiable method as approved by a certifying agent. Must not be used as an herbicide, defoliant or desiccant.

QC Diamond Brand Fine Granular Ferrous Sulfate Monohydrate (vls-9699) ◆
Micronutrient deficiency must be documented by soil or tissue testing or other documented and verifiable method as approved by a certifying agent. Must not be used as an herbicide, defoliant or desiccant.

QC Diamond Brand Standard Ferrous Sulfate Monohydrate (vls-9700) ◆
Micronutrient deficiency must be documented by soil or tissue testing or other documented and verifiable method as approved by a certifying agent. Must not be used as an herbicide, defoliant or desiccant.

Verdesian Diamond Brand Ferrous Sulfate Coarse Granular Monohydrate (Fe-30%) (vls-18366) ◆
Micronutrient deficiency must be documented by soil or tissue testing or other documented and verifiable method as approved by a certifying agent. Must not be used as an herbicide, defoliant or desiccant.

Verdesian Diamond Brand Ferrous Sulfate Dried Heptahydrate (Fe-20%) (vls-18367) ◆
Micronutrient deficiency must be documented by soil or tissue testing or other documented and verifiable method as approved by a certifying agent. Must not be used as an herbicide, defoliant or desiccant.

Verdesian Diamond Brand Ferrous Sulfate Dried Heptahydrate (Fe-20%) With Anti-Cake (vls-18369) ◆
Micronutrient deficiency must be documented by soil or tissue testing or other documented and verifiable method as approved by a certifying agent. Must not be used as an herbicide, defoliant or desiccant.

Verdesian Diamond Brand Ferrous Sulfate Dried Heptahydrate (Fe-20%) Solu-Grade (vls-18370) ◆
Micronutrient deficiency must be documented by soil or tissue testing or other documented and verifiable method as approved by a certifying agent. Must not be used as an herbicide, defoliant or desiccant.

Verdesian Diamond Brand Ferrous Sulfate Standard Monohydrate (Fe-30%) (vls-18371) ◆
Micronutrient deficiency must be documented by soil or tissue testing or other documented and verifiable method as approved by a certifying agent. Must not be used as an herbicide, defoliant or desiccant.

Verdesian Diamond Brand Ferrous Sulfate Fine Granular Monohydrate (Fe-30%) (vls-18373) ◆
Micronutrient deficiency must be documented by soil or tissue testing or other documented and verifiable method as approved by a certifying agent. Must not be used as an herbicide, defoliant or desiccant.

Crop Products: Magnesium Sulfate – Allowed With Restrictions

Verdesian Polyamine Magnesium Organic (vls-4999) ◆
May be used as a plant or soil amendment if soil deficiency of magnesium is documented by testing.

Crop Products: Manganese Products

Verdesian Polyamine Manganese Organic (vls-5000) ◆
Micronutrient deficiency must be documented by soil or tissue testing or other documented and verifiable method as approved by a certifying agent. Must not be used as an herbicide, defoliant or desiccant.

ferti•lome Copper Fungicide (vpg-18177) ◆
For plant disease control. Must be used in a manner that minimizes copper accumulation in the soil and shall not be used as herbicides. May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

ferti•lome Copper Fungicide Ready to Use (vpg-18178) ◆
For plant disease control. Must be used in a manner that minimizes copper accumulation in the soil and shall not be used as herbicides. May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Ferti-lome Copper Fungicide Flowable Liquid Copper Fungicide Ready to Spray (vpg-18211) ◆
For plant disease control. Must be used in a manner that minimizes copper accumulation in the soil and shall not be used as herbicides. May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Crop Products: Ferric Phosphate

Natural Guard Brand by ferti•lome Bug, Slug & Snail Bait (vpg-8910) ◆
For use as slug and snail bait. May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Natural Guard Brand by ferti•lome Slug & Snail Bait (vpg-8913) ◆
For use as slug and snail bait. May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

ferti•lome Come and Get It Spinosad Plus (vpg-17941) ◆
For use as slug and snail bait. May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

ferti•lome Come and Get It Slug & Snail Bait (vpg-17942) ◆
For use as slug and snail bait. May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Crop Products: Microbial Pesticides

Ferti-lome Fungicide 5 (vpg-17937) ◆
May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Ferti-lome Fungicide 5 Ready to Spray (vpg-17938) ◆
May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Crop Products: Neem and Neem Derivatives

ferti•lome Triple Action Insecticide•Fungicide•Miticide (vpg-8387) ◆
May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Ferti-lome Neem Fungicide / Miticide / Insecticide (vpg-17940) ◆
May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

ferti•lome Neem Ready-to-Use (vpg-18174) ◆
May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Crop Products: Oils

ferti•lome Horticultural Oil Ready to Spray (vpg-17936) ◆
May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Crop Products: Soap

Natural Guard Brand by ferti•lome Spinosad Soap Ready to Use (vpg-8914) ◆
For use as an algicide/demosser, herbicide or insecticide. When used as an herbicide may only be used for farmstead maintenance (roadways, ditches, right of ways, building perimeters) and ornamental crops. May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

ferti•lome Spinosad Soap (vpg-17943) ◆
For use as an algicide/demosser, herbicide or insecticide. When used as an herbicide may only be used for farmstead maintenance (roadways, ditches, right of ways, building perimeters) and ornamental crops. May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

ferti•lome Spinosad Soap Ready-to-Use (vpg-18173) ◆
For use as an algicide/demosser, herbicide or insecticide. When used as an herbicide may only be used for farmstead maintenance (roadways, ditches, right of ways, building perimeters) and ornamental crops. May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

ferti•lome Grass & Weed Killer (vpg-18175) ◆
For use as an algicide/demosser, herbicide or insecticide. When used as an herbicide may only be used for farmstead maintenance (roadways, ditches, right of ways, building perimeters) and ornamental crops. May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

ferti•lome Grass & Weed Killer Ready to Use (vpg-18176) ◆
For use as an algicide/demosser, herbicide or insecticide. When used as an herbicide may only be used for farmstead maintenance (roadways, ditches, right of ways, building perimeters) and ornamental crops. May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Ferti-lome Spinosad Soap Ready to Spray Insecticide/Miticide (vpg-18209) ◆
For use as an algicide/demosser, herbicide or insecticide. When used as an herbicide may only be used for farmstead maintenance (roadways, ditches, right of ways, building perimeters) and ornamental crops. May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Crop Products: Spinosad

Natural Guard Brand by Ferti•lome Spinosad Bagworm, Tent Caterpillar and Chewing Insect Control (vpg-7256) ◆
May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Natural Guard Brand by ferti•lome Spinosad Ready to Spray (vpg-8915) ◆
May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Ferti-lome Spinosad (vpg-17939) ◆
May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

ferti•lome Spinosad Ready to Spray (vpg-18172) ◆
May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Ferti-lome Spinosad Ready to Spray (vpg-18210) ◆
May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Crop Products: Coppers, fixed

Cueva Fungicide Ready-To-Use Flowable Liquid Copper Fungicide (neu-3101) ◆
For plant disease control. Must be used in a manner that minimizes copper accumulation in the soil and shall not be used as herbicides. May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Cueva 2.4 Copper Soap Flowable Liquid Copper Fungicide (neu-3989) ◆
For plant disease control. Must be used in a manner that minimizes copper accumulation in the soil and shall not be used as herbicides. May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Cueva Fungicide Concentrate Flowable Liquid Copper Fungicide (neu-11228) ◆
For plant disease control. Must be used in a manner that minimizes copper accumulation in the soil and shall not be used as herbicides. May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Crop Products: Ferric Phosphate

Sluggo® Slug & Snail Bait (neu-0583) ◆
For use as slug and snail bait. May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Bug-N-Sluggo Insect, Slug and Snail Bait (neu-2578) ◆
For use as slug and snail bait. May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Sluggo Maxx Brand (neu-10015) ◆
For use as slug and snail bait. May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Antixx Plus (neu-10677) ◆
For use as slug and snail bait. May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Crop Products: Herbicides

HomePlate Non-Selective Herbicide (neu-6439) ◆
May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Homeplate RTU (neu-12678) ◆
May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Neudorff Homeplate 50 (neu-20124) ◆
May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Crop Products: Oils

Vegol Insecticidal Oil (neu-3007) ◆
May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Crop Products: Pyrethrum

Pyrol-O RTU (neu-3589) ◆
May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Pyrol-O (neu-3590) ◆
May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Pyrol-O Insecticide/Miticide (neu-10817) ◆
May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Aerosol Pyrol-O RTU (neu-15979) ◆
May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Crop Products: Soap

Neudorff's Insecticidal Soap Concentrate (neu-4182) ◆
For use as an algicide/demosser, herbicide or insecticide. When used as an herbicide may only be used for farmstead maintenance (roadways, ditches, right of ways, building perimeters) and ornamental crops. May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Neudorff's Insecticidal Soap RTU (neu-0074) ◆
For use as an algicide/demosser, herbicide or insecticide. When used as an herbicide may only be used for farmstead maintenance (roadways, ditches, right of ways, building perimeters) and ornamental crops. May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

KOPA Insecticidal Soap (neu-0806) ◆
For use as an algicide/demosser, herbicide or insecticide. When used as an herbicide may only be used for farmstead maintenance (roadways, ditches, right of ways, building perimeters) and ornamental crops. May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Neudorff Neudosan Insecticidal Soap Ready-to-Use (neu-0807) ◆
For use as an algicide/demosser, herbicide or insecticide. When used as an herbicide may only be used for farmstead maintenance (roadways, ditches, right of ways, building perimeters) and ornamental crops. May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Neudorff H01 Concentrate Herbicidal Soap (neu-2487) ◆
For use as an algicide/demosser, herbicide or insecticide. When used as an herbicide may only be used for farmstead maintenance (roadways, ditches, right of ways, building perimeters) and ornamental crops. May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Finalsan Ready-to-Use Herbicidal Soap (neu-2488) ◆
For use as an algicide/demosser, herbicide or insecticide. When used as an herbicide may only be used for farmstead maintenance (roadways, ditches, right of ways, building perimeters) and ornamental crops. May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Finalsan Concentrate Grass and Weed Killer (neu-2489) ◆
For use as an algicide/demosser, herbicide or insecticide. When used as an herbicide may only be used for farmstead maintenance (roadways, ditches, right of ways, building perimeters) and ornamental crops. May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Moss-Aside Moss Killer (neu-2602) ◆
For use as an algicide/demosser, herbicide or insecticide. When used as an herbicide may only be used for farmstead maintenance (roadways, ditches, right of ways, building perimeters) and ornamental crops. May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

NEU1138I Concentrate (neu-5281) ◆
For use as an algicide/demosser, herbicide or insecticide. When used as an herbicide may only be used for farmstead maintenance (roadways, ditches, right of ways, building perimeters) and ornamental crops. May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

NEU1138I Ready-to-Use (neu-5282) ◆
For use as an algicide/demosser, herbicide or insecticide. When used as an herbicide may only be used for farmstead maintenance (roadways, ditches, right of ways, building perimeters) and ornamental crops. May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Crop Products: Spinosad

Neudorff Bug Bait (neu-1123) ◆
May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Neudorff Bug Bait Residential (neu-13266) ◆
May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Crop Products: Calcium Chloride

ORGANO MIX FIRM-UP (wnc-17061) ◆
For use as a foliar spray to treat a physiological disorder associated with calcium uptake.

ORGANO MIX CALCIUM 6% (wnc-17325) ■◆
For use as a foliar spray to treat a physiological disorder associated with calcium uptake.

Crop Products: Copper Products

ORGANO MIX COPPER 0.30% 1-0-0 (wnc-17212) ◆
Micronutrient deficiency must be documented by soil or tissue testing or other documented and verifiable method as approved by a certifying agent. Must not be used as an herbicide, defoliant or desiccant.

Crop Products: Fertilizers and Soil Amendments, Blended

ORGANO MIX NITROGEN 8.5-0-0 (wnc-17334) ■

Crop Products: Fertilizers, Blended with synthetic magnesium sulfate

ORGANO MIX MAGNESIUM 1.5% 1-0-0 (wnc-17452) ◆
May be used as a plant or soil amendment if soil deficiency of magnesium is documented by testing.

Crop Products: Humic Acids – alkali extracted

ENHANCE® THA 12% ORGANIC HUMIC ACIDS Liquid Concentrate (wnc-8040)

ENHANCE® THA 6% ORGANIC HUMIC ACIDS Liquid Concentrate (wnc-9611)

Crop Products: Iron Products

Nutraplex® Iron 5% Complexed Micronutrients (wnc-3222) ◆
Micronutrient deficiency must be documented by soil or tissue testing or other documented and verifiable method as approved by a certifying agent. Must not be used as an herbicide, defoliant or desiccant.

ORGANO MIX IRON 5% 3-0-0 (wnc-16840) ■◆
Micronutrient deficiency must be documented by soil or tissue testing or other documented and verifiable method as approved by a certifying agent. Must not be used as an herbicide, defoliant or desiccant.

Crop Products: Magnesium Sulfate – Allowed With Restrictions

Nutraplex® 4% Magnesium (wnc-3223) ◆
May be used as a plant or soil amendment if soil deficiency of magnesium is documented by testing.

Crop Products: Manganese Products

Nutraplex® 5% Manganese with Sulfur Complexed Micronutrients (wnc-3251) ◆
Micronutrient deficiency must be documented by soil or tissue testing or other documented and verifiable method as approved by a certifying agent. Must not be used as an herbicide, defoliant or desiccant.

ORGANO MIX MN 2% .8-0-0 (wnc-17211) ◆
Micronutrient deficiency must be documented by soil or tissue testing or other documented and verifiable method as approved by a certifying agent. Must not be used as an herbicide, defoliant or desiccant.

Crop Products: Potassium Sulfate

ORGANO MIX POTASSIUM 0-0-5 (wnc-17518)

Crop Products: Zinc Products

Nutraplex® 10% Zinc with Sulfur Complexed Micronutrients (wnc-6008) ◆
Micronutrient deficiency must be documented by soil or tissue testing or other documented and verifiable method as approved by a certifying agent. Must not be used as an herbicide, defoliant or desiccant.

ORGANO MIX ZINC 7.5% 2.5-0-0 (wnc-16844) ◆
Micronutrient deficiency must be documented by soil or tissue testing or other documented and verifiable method as approved by a certifying agent. Must not be used as an herbicide, defoliant or desiccant.

Crop Products: Calcium Chloride

Wilbur-Ellis Mora-Leaf Calcium (wec-9517) ◆
For use as a foliar spray to treat a physiological disorder associated with calcium uptake.

BenVireo Calcium (wec-12057) ◆
For use as a foliar spray to treat a physiological disorder associated with calcium uptake.

Crop Products: Calcium Chloride, Fertilizers and Soil Amendments, Blended – Allowed With Restrictions

Wilbur-Ellis ProNatural Calcium Plus 1-0-0 (wec-7969) ◆
For use as a foliar spray to treat a physiological disorder associated with calcium uptake. Refer to specific ingredient categories for applicable use restrictions.

Crop Products: Compost Tea, from composted manure feedstock

Fluid Compost Natural Soil Amendment (wec-7967) ◆
Must be used in a manner that does not contribute to contamination of crops, soil, or water by pathogenic organisms in accordance with §205.203(c).

Crop Products: Coppers, fixed, Elemental Sulfur

Wilbur-Ellis Fungicide Wil-Dry (wec-8819) ◆
For plant disease control. Must be used in a manner that minimizes copper accumulation in the soil and shall not be used as herbicides. May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices. For use as plant disease control, or as an insecticide (including acaricide or mite control). For use as slug and snail bait.

Crop Products: Crab/Crustacean Meal

Wilbur-Ellis Lighthouse Crab Shell Soil Amendment (wec-12209)

Crop Products: Elemental Sulfur

Wilbur-Ellis Special Electric Refined Super-Adhesive Dusting Sulfur Insecticide and Fungicide (wec-1478) ◆
For use as plant disease control, or as an insecticide (including acaricide or mite control). For use as slug and snail bait. May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Wilbur-Ellis Dusting Sulfur Fungicide (wec-1479) ◆
For use as plant disease control, or as an insecticide (including acaricide or mite control). For use as slug and snail bait. May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Golden Micronized Sulfur (FUNGICIDE AND INSECTICIDE) (wec-2773) ◆
For use as plant disease control, or as an insecticide (including acaricide or mite control). For use as slug and snail bait. May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Sulfur Dry Flowable Fungicide - Miticide (wec-11466) ◆
For use as plant disease control, or as an insecticide (including acaricide or mite control). For use as slug and snail bait. May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Auron 80 DF Fungicide (wec-19996) ◆
For use as plant disease control, or as an insecticide (including acaricide or mite control). For use as slug and snail bait. May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Safer® Brand Garden Fungicide II (wsc-3155) ◆
For use as plant disease control, or as an insecticide (including acaricide or mite control). For use as slug and snail bait. May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Safer Brand Garden Garden Fungicide (wsc-17791) ◆
For use as plant disease control, or as an insecticide (including acaricide or mite control). For use as slug and snail bait. May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Crop Products: Elemental Sulfur, Soap

Safer® Brand 3-in-1 Concentrate II (wsc-4180) ◆
For use as an algicide/demosser, herbicide or insecticide. When used as an herbicide may only be used for farmstead maintenance (roadways, ditches, right of ways, building perimeters) and ornamental crops. May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices. For use as plant disease control, or as an insecticide (including acaricide or mite control). For use as slug and snail bait.

Safer® Brand 3-in-1 Garden Spray II (wsc-4181) ◆
For use as an algicide/demosser, herbicide or insecticide. When used as an herbicide may only be used for farmstead maintenance (roadways, ditches, right of ways, building perimeters) and ornamental crops. May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices. For use as plant disease control, or as an insecticide (including acaricide or mite control). For use as slug and snail bait.

Safer Brand Rose & Flower 3-in-1 Garden Spray II (wsc-11286) ◆
For use as an algicide/demosser, herbicide or insecticide. When used as an herbicide may only be used for farmstead maintenance (roadways, ditches, right of ways, building perimeters) and ornamental crops. May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices. For use as plant disease control, or as an insecticide (including acaricide or mite control). For use as slug and snail bait.

Safer Brand Tomato & Vegetable 3-in-1 Garden Spray (wsc-11287) ◆
For use as an algicide/demosser, herbicide or insecticide. When used as an herbicide may only be used for farmstead maintenance (roadways, ditches, right of ways, building perimeters) and ornamental crops. May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices. For use as plant disease control, or as an insecticide (including acaricide or mite control). For use as slug and snail bait.

Safer Brand Garden 3-In-1 Garden Spray (wsc-17790) ◆
For use as an algicide/demosser, herbicide or insecticide. When used as an herbicide may only be used for farmstead maintenance (roadways, ditches, right of ways, building perimeters) and ornamental crops. May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices. For use as plant disease control, or as an insecticide (including acaricide or mite control). For use as slug and snail bait.

Crop Products: Fertilizers and Soil Amendments, Blended

Safer Brand Azalea & Holly Restore 4-3-3 (wsc-13023)

Safer Brand Garden Restore All Purpose Granular Garden Fertilizer 5-3-3 (wsc-13024)

Safer Brand Rose & Flower Restore 3-4-3 (wsc-13025)

Safer Brand Tomato & Vegetable Restore 3-4-4 (wsc-13026)

Crop Products: Neem and Neem Derivatives

Safer Brand Neem Oil RTU Fungicide / Miticide / Insecticide (wsc-8420) ◆
May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Safer Brand Garden Neem Oil Fungicide/Miticide/Insecticide (wsc-17690) ◆
May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Crop Products: Oils, Horticultural

Safer Brand Horticultural & Dormant Spray Oil (wsc-9669) ◆
For use as an insecticide (including acaricide or mite control) and for plant disease control as dormant, suffocating, and stylet (summer) sprays. May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Crop Products: Pyrethrum, Soap

Safer® Brand Tomato & Vegetable Insect Killer II (wsc-4089) ◆
For use as an algicide/demosser, herbicide or insecticide. When used as an herbicide may only be used for farmstead maintenance (roadways, ditches, right of ways, building perimeters) and ornamental crops. May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Crop Products: Repellents

Safer Brand Garden Deer & Rabbit Repellent Deer Off Ready-To-Use Stations & Stakes (wsc-19983)

Crop Products: Repellents – Allowed With Restrictions

Havahart® Critter Ridder® (wsc-4215) ◆
May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Havahart® Critter Ridder® Ready-To-Use (wsc-0279) ◆
May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Safer Brand Critter Ridder Animal Repellent (wsc-12345) ◆
May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Safer Brand Critter Ridder Deer & Rabbit Repellent Ready-To-Use (wsc-12346) ◆
May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Safer Brand Critter Ridder Animal Repellent Ready-To-Use (wsc-12400) ◆
May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Safer Brand Garden Animal Repellent Critter Ridder (wsc-19349) ◆
May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Safer Brand Garden Deer & Rabbit Repellent Deer Off Ready-to-Use (wsc-19715) ◆
May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Crop Products: Soap

Safer® Brand Insect Killing Soap with Seaweed Extract II (wsc-9909) ◆
For use as an algicide/demosser, herbicide or insecticide. When used as an herbicide may only be used for farmstead maintenance (roadways, ditches, right of ways, building perimeters) and ornamental crops. May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Safer® Brand Insect Killing Soap Concentrate II (wsc-9786) ◆
For use as an algicide/demosser, herbicide or insecticide. When used as an herbicide may only be used for farmstead maintenance (roadways, ditches, right of ways, building perimeters) and ornamental crops. May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Safer® Brand Moss & Algae Killer & Surface Cleaner Ready-To-Spray II (wsc-9789) ◆
For use as an algicide/demosser, herbicide or insecticide. When used as an herbicide may only be used for farmstead maintenance (roadways, ditches, right of ways, building perimeters) and ornamental crops. May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Safer® Brand Moss & Algae Killer & Surface Cleaner Ready-To-Use II (wsc-9790) ◆
For use as an algicide/demosser, herbicide or insecticide. When used as an herbicide may only be used for farmstead maintenance (roadways, ditches, right of ways, building perimeters) and ornamental crops. May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Safer® Brand End All® Insect Killer (wsc-1484) ◆
For use as an algicide/demosser, herbicide or insecticide. When used as an herbicide may only be used for farmstead maintenance (roadways, ditches, right of ways, building perimeters) and ornamental crops. May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Safer® Brand #567 Pyrethrin & Insecticidal Soap Concentrate II (wsc-1899) ◆
For use as an algicide/demosser, herbicide or insecticide. When used as an herbicide may only be used for farmstead maintenance (roadways, ditches, right of ways, building perimeters) and ornamental crops. May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Livestock Products: Diatomaceous Earth

Safer® Brand Food Grade Diatomaceous Earth (wsc-12126)

Processing Products: Diatomaceous Earth

Safer Brand Ant & Crawling Insect Killer Made From Diatomaceous Earth (wsc-5552) ◆
For use as a pesticide only in conjunction with the facility pest management practices provided for in paragraphs 205.271(a) and (b) and only if those practices are not effective to prevent or control pests alone. For use in post-harvest handling of raw agricultural commodities.

Safer Brand Home Ant & Crawling Insect Killer Made From Diatomaceous Earth (wsc-16275) ◆
For use as a pesticide only in conjunction with the facility pest management practices provided for in paragraphs 205.271(a) and (b) and only if those practices are not effective to prevent or control pests alone. For use in post-harvest handling of raw agricultural commodities.

Safer Brand Home Diatomaceous Earth Ant & Crawling Insect Killer (wsc-18344) ◆
For use as a pesticide only in conjunction with the facility pest management practices provided for in paragraphs 205.271(a) and (b) and only if those practices are not effective to prevent or control pests alone. For use in post-harvest handling of raw agricultural commodities.

Crop Products: Copper Sulfate

- ZINSA Copper Sulphate (zia-18067) ◆
  For plant disease control, must be used in a manner that minimizes accumulation of copper in the soil. For use as an algicide in aquatic rice systems and for tadpole shrimp control in aquatic rice systems, must not exceed one application per field during any 24-month period. Application rates are limited to those which do not increase baseline soil test values for copper over a time frame agreed upon by the producer and accredited certifying agent. May only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices.

Crop Products: Hypochlorous Acid

Agvibac-500 Desinfectante (zur-16389) ◆
Residual chlorine levels in the water in direct crop contact (when used pre-harvest) or as water from cleaning irrigation systems applied to the soil should not exceed the maximum residual disinfectant level under the Safe Drinking Water Act (4 mg/L (4ppm) expressed as chlorine, 0.8 mg/L (0.8 ppm) expressed as chlorine dioxide), except that chlorine products may be used in edible sprout production according to EPA label directions. May be used up to maximum labeled rates for disinfecting and sanitizing equipment or tools. No intervening event is necessary before equipment is used in contact with organic crops.

Processing Products: Hypochlorous Acid

ZurichVet Saludy (zur-14317) ◆
May be used in direct contact with post-harvest crop or food at levels approved by the FDA or the EPA for such a purpose. Such use must include a final rinse and residual chlorine levels in final rinse water shall not exceed the Maximum Residual Disinfectant Limit under the Safe Drinking Water Act, except that a final rinse is not required for use in FSIS inspected egg breaking facilities. When used as disinfectants and sanitizers for food contact surfaces, may be used up to maximum labeled rates and rinsing is not required unless mandated by the label use directions. May be used up to maximum labeled rates for disinfecting and sanitizing equipment or tools. No intervening event is necessary before equipment is used in organic production.
