OMRI Canada Products List
A Directory of Products for Organic Use

Liste des produits de l'OMRI Canada
Un répertoire de produits aux fins d'utilisation biologique

OMRI's Mission is to support the growth and trust of the global organic community through expert, independent and transparent verification of input materials, and through education and technical assistance.

OMRI Board of Directors

Chair: Matt Landi; Vice-Chair: Deirdre Birmingham, Ph.D.; Secretary: Roxeanne Beavers;
Treasurer: Darren MacFarlane
Members: Nicole Denhe, Rick Geise, Chris Grigsby, Emily Newman, Gwendolyn Wyard

OMRI Advisory Council Members

The Advisory Council provides independent, professional expertise to the OMRI Review Program.

Brian Baker, Ph.D.; Will Brinton, Ph.D.; Emily Brown Rosen; Kate Burroughs; Tane Datta;
Jackie DeMinter; John Fagan, Ph.D.; David Gould; Steven Harper; Jacqueline P. Jacob, Ph.D.;
Mary O. Mulry, Ph.D.; William Quarles, Ph.D.; Eric Sideman, Ph.D.; Zea Sonnabend; Rich Theuer, Ph.D.;
Jessica Walden; Ann Wells, DVM

External Review Panel Members

Crops, Livestock, Processing, Canada & Mexico

OMRI External Review Panels, and an Internal Review Panel of experienced staff members, determine whether products are allowed, allowed with restrictions, or prohibited.

Jackie DeMinter; Rochelle Eisen; Javier Fernández-Salvador; Steven Harper, Ph.D.; Andy Hupp;
Guy Jodarski, DVM; Garth Kahl; George Kuepper; Cheryl Laxton; Garry Lean; Luis Lopez;
Kelly Monaghan; Juan Ortega; Sarah Reed; Zea Sonnabend; Rich Theuer, Ph.D.; Tom Tomas, Ph.D.;
Craig Weakley; Ann Wells, DVM

Introduction

OMRI's mission is to support the growth and trust of the global organic community through expert, independent and transparent verification of input materials, and through education and technical assistance.

The Organic Materials Review Institute (OMRI) is an international nonprofit organization founded in 1997 to support the organic community. OMRI is accredited to review input products for organic use under International Organization for Standardization (ISO) 17065. Suppliers of products intended for use in organic agricultural production or food processing and handling may submit applications to OMRI for review.

The OMRI Listed® seal is the organization's registered trademark.

OMRI uses the Canada Organic Regime (COR) standards (CAN/CGSB-32.311 and CAN/CGSB-32.310), and the USDA National Organic Program (NOP) regulations (7 CFR part 205) and the Mexico Organic Products Law (LPO) (including the Regulation of the Organic Products Law and the

Guidelines for the Organic Operation of the Agricultural and Livestock Activities) to verify the compliance of products intended for organic production and processing. OMRI also maintains standards specifically for the consideration of inputs under the organic regulations.

OMRI safeguards public trust in the organic industry through a transparent and consistent decision-making process. Also, OMRI is committed to providing a service that is accurate and professional, in a manner that is efficient and well run. OMRI offers an array of information services for the organic community. These include subscriptions for organic professionals, with current information about standards, materials, and technical issues related to material review. OMRI also provides instructive training to industry groups, contract research work for organic stakeholders, and expert technical assistance with materials decisions for certification bodies.

About the OMRI Canada Products List®

This directory includes all products that OMRI has determined are allowed for use in organic production or processing and handling under Canada Organic Regime standards. Only those products that have passed OMRI's

rigorous review are included in the *OMRI Canada Products List* and can display the OMRI Listed® seals and/or approved wording. This printed *OMRI Canada Products List* is current as of November 11, 2020. OMRI regularly removes and adds products. For the most up-to-date information on OMRI Listed products, visit the online product search or *OMRI Canada Products List* PDF download at OMRI.org.

Because participation in the OMRI Review Program is voluntary, a product's absence from the *OMRI Canada Products List* does not imply its failure to comply with the relevant organic standards.

The *OMRI Canada Standards Manual*® contains information about substances in general, while the *OMRI Canada Products List* contains formulated branded products. Users should be aware that material entries from the *OMRI Canada Standards Manual* are used as categories for products in the *OMRI Canada Products List*. However, formulated products may contain additional ingredients.

Use OMRI Listed products in accordance with the OMRI Listed class and category, and check the Categories section for the full restriction text.

How products are reviewed

As a nonprofit organization, OMRI offers an independent third-party review of products that balances the need for confidentiality in reviewing proprietary formulations with the necessity to ensure that products comply with the standards. OMRI reviews applications from input suppliers for products to be used in crop and livestock production and processing.

To assess compliance with the applicable standards, product applications must contain all required information regarding product ingredients, formulations and manufacturing processes. OMRI operates under a

rigorous confidentiality policy to guard against disclosure of proprietary product information to unauthorized individuals. OMRI staff reviews the application and makes a recommendation to the appropriate OMRI Review Panel to make the final product decision. All products are reviewed according to OMRI's published policies and standards. Products evaluated and found not compliant for use in organic production are designated Prohibited and are not included in the *OMRI Canada Products List*. OMRI provides subscribing certifiers with a list of prohibited products. Organic certification bodies may contact OMRI for more information about the benefits of subscribing.

How to use the *OMRI Canada Products List*

The *OMRI Canada Products List* is divided into three sections that sort product listings by category, company name and product name. Each of these sections is subdivided into Crops, Livestock and Processing. In the Categories section, products are listed on the basis of their principal or active purpose or ingredient (e.g., Manure or Pyrethrum, or Dust Suppressants), and are grouped according to use, such as "Fertilizers and Soil Amendments" or "Pest, Weed, and Disease Controls."

Product use restrictions

Some products included in the *OMRI Canada Products List* are allowed with restrictions. OMRI developed the use restrictions to tell users about important qualifications for applying the product in a certified organic system. All use restrictions are based on the COR standards. In the case where a product has a use restriction, the restriction is given in the Categories section. Further regulatory information specific to the class and category can be found in the *OMRI Canada Standards Manual*[®], or through the OMRI website search.

Additional qualifications concerning the use of some products included in the *OMRI Canada Products List* are found in footnotes at the bottom of each even-numbered page.

The *OMRI Canada Products List* is updated on an ongoing basis, and new products are added monthly.

Be sure to check [OMRI.org/Canada-list](https://www.omri.org/canada-list) for the most current information.

Guide to footnote symbols

OMRI uses footnote symbols to communicate important information about individual products in the *OMRI Canada Products List*. The following list explains the meaning of each footnote, and users can also refer to the legends in the bottom left-hand corner of each page.

- ◆ This product is allowed with restrictions. See the Categories section for use restrictions.

The Categories section includes the applicable restriction(s) for each product.

Caution statements

The COR standards stipulate that producers shall take steps to prevent the contamination of crops, soil and water. OMRI uses caution statements to communicate levels of pathogenic organisms in order to provide users with the appropriate information to address potential contamination of crops, soil and water. The Permitted Substances List also requires that substrates or growth media that are not present in the final product shall be non-genetically engineered if commercially available. OMRI identifies products that were produced using genetically engineered substrate or growth media on the *OMRI Canada Products List* with an applicable footnote.

- 8 The fecal coliform level of this product exceeds 1000 MPN/g. Application to certified organic farms cannot contribute to contamination of crops, soil or water.
- 9 The Salmonella level of this product exceeds 3 MPN/4g. Application to certified organic farms cannot contribute to contamination of crops, soil or water.

- 10 This product was produced using GE substrate or growth media. If commercially available, a non-GE alternative shall be used in accordance with CAN/CGSB 32.311 subclause 4.1.3.b.
- 11 This product was produced using GE substrate or growth media. If commercially available, a non-GE alternative shall be used in accordance with CAN/CGSB 32.311 subclause 5.1.2.b.
- 12 This product was produced using GE substrate or growth media. If commercially available, a non-GE alternative shall be used in accordance with CAN/CGSB 32.311 subclause 6.2.1.b.

How current is the *OMRI Canada Products List*?

OMRI regularly adds and removes products from the *OMRI Canada Products List*. Regular updates to the *OMRI Canada Products List* are made to the online version at OMRI.org. Users may periodically check the online version of the *OMRI Canada Products List* to ensure that they have the most up-to-date information regarding OMRI Listed products. No password or login is needed to access this free service on the website.

Compliant use of OMRI Listed products

CFIA accredited Certification Bodies (CBs) may choose to accept OMRI Canada listing as proof of compliance in accordance with organizational policies. The final decision on the acceptability of a product for a specific use and operation is the responsibility of the CB. Certified organic operators should always check with their CB before using a new product in an organic operation.

OMRI does not provide any guarantee or warranty, expressed or implied, for any products included on the *OMRI*

Canada Products List. It is the user's responsibility to properly use a product according to applicable federal and provincial regulations.

OMRI listing assures the suitability of a product for certified organic production, handling or processing under the following conditions:

- The product must be included in the operator's CB-approved organic plan.
- Products must be used according to the use restriction(s) described in the Categories section.
- Both the product and manufacturer names on the label must match the information printed in the *OMRI Canada Products List*.
- Users must apply the product according to the instructions or purpose on the label that corresponds with the OMRI Listed class and category.

Also, users of OMRI Listed products should follow these practices:

- Guard against the possibility of environmental contamination and negative ecological impacts.
- Handle products with care for the safety of the workers involved. Contact the manufacturer about a product's efficacy, health and environmental effects.
- Contact appropriate governing officials to determine which laws and regulations apply to specific products.

Présentation

L'OMRI a pour mission d'appuyer la croissance et la confiance de la communauté biologique mondiale au moyen d'une vérification indépendante et transparente menée par des experts des matières premières, de l'éducation et de l'aide technique.

Fondée en 1997, l'Organic Materials Review Institute (OMRI) est une organisation internationale à but non lucratif créée afin de soutenir la communauté biologique. L'OMRI est autorisée à examiner des matières premières aux fins d'utilisation biologique conformément à l'Organisation internationale de la normalisation (ISO) 17065. Les fournisseurs de produits destinés à être utilisés dans la production agricole biologique ou dans la transformation et la manutention des aliments peuvent présenter leurs demandes à l'OMRI aux fins d'examen.

Le sceau OMRI Listed® est la marque de commerce enregistrée de notre organisme.

L'OMRI utilise les normes du Régime Bio-Canada (RBC) (CAN/ONGC-32.311 et CAN/ONGC-32.310), le règlement du National Organic Program (NOP) de l'USDA (chapitre 7 du CFR, partie 205) et la Mexican Organic Products Law (LPO) (y compris le Regulation of the Organic Products Law et les Guidelines for the Organic Operation of the Agricultural and Livestock Activities) afin de vérifier la conformité des produits destinés à la production et la transformation biologiques. L'OMRI respecte également les normes précisément destinées à l'examen des matières premières en vertu des règlements sur les produits biologiques.

L'OMRI préserve la confiance du public à l'égard de l'industrie biologique grâce à un processus décisionnel transparent et cohérent. L'OMRI s'engage également à assurer la prestation d'un service exact et professionnel, et ce, de manière efficace et conforme aux principes de saine gestion. L'OMRI offre une gamme de services d'information à la communauté biologique. Ces services comprennent des abonnements à l'intention des professionnels de l'industrie biologique, accompagnés de renseignements à jour sur les normes, les matières et les enjeux techniques liés à l'examen des matières premières. L'OMRI offre également de la formation instructive aux groupes de l'industrie, des contrats de recherche aux intervenants du milieu biologique, et de l'aide technique de la part d'experts aux fins de prise de décisions sur les matières aux organismes de certification.

Utilisez les produits de la liste de l'OMRI conformément à la classe et à la catégorie de celle-ci, et vérifiez la section «Catégories» pour obtenir le texte complet sur les restrictions.

À propos de la *Liste des produits de l'OMRI Canada*®

Le présent répertoire comprend tous les produits dont l'OMRI a permis l'utilisation dans la production ou la transformation et la manutention biologiques conformément aux normes du Régime Bio-Canada. Seuls les produits qui ont réussi l'examen rigoureux de l'OMRI sont inclus dans la Liste des produits de l'OMRI Canada et peuvent afficher le sceau ou le libellé approuvés OMRI Listed®. Cette *Liste des produits de l'OMRI Canada* imprimée est à jour en date du 11 novembre 2020. L'OMRI y ajoute et en retire régulièrement des produits. Pour obtenir les renseignements les plus récents au sujet des produits contenus dans la liste de l'OMRI, utilisez le moteur de recherche de produits en ligne ou téléchargez la *Liste des produits de l'OMRI Canada* en format PDF sur le site OMRI.org.

Puisque la participation au Programme d'examen de l'OMRI est volontaire, l'absence d'un produit dans la *Liste des produits de l'OMRI Canada* n'implique pas sa non-conformité aux normes biologiques pertinentes.

Le *Manuel des normes de l'OMRI Canada*® contient des informations sur les substances en général, tandis que la *Liste des produits de l'OMRI Canada* contient des produits formulés de marque. Les utilisateurs doivent toutefois savoir que les entrées de matières du *Manuel des normes de l'OMRI Canada* sont utilisées sous forme de catégories de produits dans la *Liste des produits de l'OMRI Canada*. Cependant, les produits formulés peuvent contenir des ingrédients additionnels.

Comment les produits sont examinés

À titre d'organisme sans but lucratif, l'OMRI offre un

examen indépendant de tierce partie des produits qui respecte à la fois le besoin d'assurance de la confidentialité dans le cadre de l'examen des formules exclusives et la nécessité de s'assurer que les produits répondent aux normes. L'OMRI examine les demandes des fournisseurs de matières premières concernant les produits destinés à une utilisation dans la production et la transformation des cultures et du bétail.

Pour évaluer la conformité aux normes applicables, les demandes relatives aux produits doivent comprendre tous les renseignements requis en ce qui concerne les ingrédients, les formules et les processus de fabrication. L'OMRI adhère à une politique de confidentialité rigoureuse pour prévenir toute divulgation de renseignements exclusifs sur les produits à des personnes non autorisées. Le personnel de l'OMRI passe la demande en revue et formule sa recommandation au comité d'examen approprié de l'OMRI, qui rend alors sa décision finale relativement au produit. Tous les produits sont examinés conformément aux politiques et aux normes publiées par l'OMRI. Les produits évalués et jugés non conformes à une utilisation dans la production biologique sont déclarés « interdits » et ne sont pas inclus dans la *Liste des produits de l'OMRI Canada*. L'OMRI offre aux organismes de certification inscrits une liste des produits interdits. Les organismes de certification des produits biologiques peuvent communiquer avec l'OMRI pour en savoir plus sur les avantages de l'inscription.

Comment utiliser la *Liste des produits de l'OMRI Canada*

La *Liste des produits de l'OMRI Canada* est divisée en trois sections qui classent les produits par catégorie, entreprise et nom de produit. Chaque section est subdivisée en trois autres parties, soit « Recoltes », « Bétail » et « Traitement et manutention ». La section « Catégories » énumère les produits en fonction de leur ingrédient principal ou actif (par exemple, fumier, pyrèthre ou dépolluant) et les regroupe selon leur utilisation (par exemple, « Amendements du sol et nutrition des cultures » ou « Lutte contre les ravageurs, les mauvaises herbes et les maladies »).

La *Liste des produits de l'OMRI Canada* est constamment mise à jour et de nouveaux produits y sont ajoutés mensuellement. Assurez-vous de consulter le site Web OMRI.org/Canada-list pour connaître les renseignements les plus à jour.

Restrictions relatives à l'utilisation d'un produit

L'utilisation de certains produits figurant dans la *Liste des produits de l'OMRI Canada* est permise, mais assortie de certaines restrictions. L'OMRI a élaboré les restrictions d'utilisation afin d'informer les utilisateurs des conditions importantes à respecter afin de pouvoir utiliser un produit dans un système biologique certifié. Toutes les restrictions d'utilisation sont fondées sur les normes du RBC. Lorsqu'un produit comporte une restriction d'utilisation, celle-ci est fournie dans la section « Catégories ». D'autres renseignements réglementaires propres à la classe et à la catégorie d'un produit sont disponibles dans le *Manuel des normes de l'OMRI Canada*[®] ou dans le site Web de l'OMRI au moyen du moteur de recherche.

Des conditions supplémentaires concernant l'utilisation de certains produits compris dans la *Liste des produits de l'OMRI* figurent dans les notes de bas de page à la fin de chaque page paire.

Guide des symboles dans les notes de bas de page

L'OMRI utilise des symboles dans les notes de bas de page pour communiquer des renseignements importants sur des produits individuels de la *Liste des produits de l'OMRI Canada*. La liste ci-dessous explique la signification de chaque symbole. Les utilisateurs peuvent également consulter la légende située dans le coin inférieur gauche de chaque page.

- ◆ **Ce produit est autorisé, mais est assorti de restrictions. Consultez la section « Catégories » pour connaître les restrictions d'utilisation.**

La section « Catégories » indique la ou les restrictions qui s'appliquent à chaque produit.

Notes d'avertissement

Les normes du RBC stipulent que les producteurs doivent prendre des mesures pour prévenir la contamination des cultures, des sols et de l'eau. L'OMRI utilise les notes d'avertissement pour communiquer les niveaux d'organismes pathogènes afin de donner aux utilisateurs les renseignements appropriés en vue de remédier à la contamination potentielle des cultures, des sols et de l'eau. La Liste des substances permises exige également que les substrats et les milieux de croissance non présents dans le produit final ne soient pas génétiquement modifiés, si de tels produits sont disponibles sur le marché. Dans la *Liste des produits de l'OMRI Canada*, accompagnés d'une note de bas de page applicable, l'OMRI identifie les produits créés à l'aide d'un substrat ou d'un milieu de croissance génétiquement modifié.

- 8 Le niveau de coliformes fécaux de ce produit dépasse les 1 000 NPP/g. Son utilisation dans des fermes biologiques certifiées ne doit pas contribuer à la contamination des cultures, des sols ou de l'eau.
- 9 Le niveau de *Salmonella* dans ce produit dépasse les 3 NPP/4 g. Son application dans des fermes biologiques certifiées ne doit pas contribuer à la contamination des cultures, du sol ou de l'eau.
- 10 Ce produit a été fabriqué en utilisant un substrat ou un milieu de culture génétiquement modifié. Si disponible sur le marché, une version non génétiquement modifiée doit être utilisée conformément au paragraphe 4.1.3.b. de la norme CAN/ONGC 32.311.
- 11 Ce produit a été fabriqué en utilisant un substrat ou un milieu de culture génétiquement modifié. Si disponible sur le marché, une version non génétiquement modifiée doit être utilisée conformément au paragraphe 5.1.2.b. de la norme CAN/ONGC 32.311.
- 12 Ce produit a été fabriqué en utilisant un substrat ou un milieu de culture génétiquement modifié. Si disponible sur le marché, une version non génétiquement modifiée doit être utilisée conformément au paragraphe 6.2.1.b. de la norme CAN/ONGC 32.311.

À quel point la Liste des produits de l'OMRI Canada est-elle à jour?

L'OMRI met régulièrement à jour la Liste des produits de l'OMRI Canada en y ajoutant ou en supprimant des produits. Des mises à jour régulières sont apportées à la *Liste des produits de l'OMRI Canada* en ligne disponible sur le site OMRI.org. Les utilisateurs peuvent consulter périodiquement la version en ligne de la *Liste des produits de l'OMRI Canada* pour s'assurer d'avoir les renseignements les plus à jour concernant les produits répertoriés par l'OMRI. Aucun mot

de passe ni aucune connexion n'est requis pour accéder à ce service gratuit offert sur le site Web.

Utilisation conforme des produits de la liste de l'OMRI

Les organismes de certification (OC) accrédités par l'ACIA peuvent décider d'accepter la liste de l'OMRI Canada comme preuve de conformité en vertu des politiques organisationnelles. La décision finale sur l'acceptabilité d'un produit pour une utilisation et une exploitation précises relève de l'OC. Les exploitants biologiques certifiés devraient toujours se renseigner auprès de leur OC avant d'utiliser un nouveau produit dans le cadre d'une activité biologique.

L'OMRI n'offre aucune promesse ni garantie, explicite ou implicite, quant à tout produit figurant sur la *Liste des produits de l'OMRI Canada*. Il est de la responsabilité de l'utilisateur d'employer correctement un produit en conformité avec les règlements fédéraux et provinciaux applicables.

La liste de l'OMRI assure la convenance d'un produit pour la production, la manutention ou la transformation biologique certifiée conformément aux conditions suivantes:

- Le produit doit être compris dans le plan biologique approuvé par l'OC de l'exploitant.
- Le produit doit être utilisé selon la ou les restrictions d'utilisation décrites dans la section « Catégories ».
- Le nom du produit et le nom de l'entreprise figurant sur l'étiquette doivent tous deux correspondre à ceux indiqués dans la *Liste des produits de l'OMRI Canada*.
- Les utilisateurs doivent employer le produit selon les directives ou son utilisation prévue indiquée sur l'étiquette correspondant à la classe et à la catégorie de la liste de l'OMRI.

Les utilisateurs de produits répertoriés dans la liste de l'OMRI devraient également adopter les pratiques suivantes:

- Se protéger contre la possibilité d'une contamination environnementale et de répercussions écologiques néfastes.
- Manipuler les produits avec précaution pour la sécurité des travailleurs impliqués. Communiquez avec le fabricant pour connaître l'efficacité d'un produit et ses effets sur la santé et l'environnement.
- Communiquer avec les responsables gouvernementaux appropriés pour savoir quels règlements et lois s'appliquent à des produits précis.

La traduction française du présent document n'est mise à votre disposition qu'à titre gracieux. L'OMRI n'est pas responsable de toute erreur relevant de la traduction. La version anglaise de la *Liste des produits de l'OMRI Canada* renferme le contenu vérifié de la présente publication.

Cuivre

À utiliser lorsqu'une carence au niveau du sol ou des végétaux est documentée par des symptômes visibles ou au moyen d'analyses de sol ou de tissus végétaux, ou lorsque le besoin d'une application préventive peut être corroboré par des documents. Doit être utilisé avec précaution afin de prévenir une accumulation de cuivre excessive dans le sol. L'accumulation de cuivre dans le sol pourrait interdire une future utilisation de celui-ci. Des résidus visibles de produits du cuivre sur des récoltes sont interdits.

Activateurs acides pour le dioxyde de chlore

Doivent être utilisés uniquement pour générer du dioxyde de chlore. L'utilisation du dioxyde de chlore qui en découle doit respecter la norme CAN/ONGC-32.311. Ne doivent pas dépasser la limite maximale pour assurer la salubrité de l'eau potable lorsqu'ils sont utilisés en contact direct avec des produits biologiques et des surfaces en contact avec un produit sans d'abord avoir fait l'objet d'une intervention subséquente au préalable, y compris les utilisations suivantes : a) dans l'eau de lavage, en contact direct avec des cultures ou des aliments, et b) dans l'eau provenant du nettoyage des systèmes d'irrigation, de l'équipement et des unités de stockage et de transport et appliquée sur les cultures ou dans les champs. Peuvent être utilisés jusqu'aux concentrations maximales indiquées sur l'étiquette sur les surfaces qui entrent en contact avec des produits biologiques, pourvu qu'une intervention subséquente ait éliminé la substance avant la production biologique.

Peut être utilisé comme pesticide si les exigences de la section 5.6.2 de la norme CAN/ONGC-32.310 sont respectées, ce qui nécessite l'utilisation de pratiques de gestion et de techniques mécaniques biologiques.

MilStop Foliar Fungicide (BioWorks, Inc.) bwk-7391

Cuivre

Pour utilisation comme produit de préservation du bois, comme fongicide pour les fruits et légumes et comme produit de lutte contre les maladies. Doit être utilisé avec prudence pour éviter l'accumulation excessive de cuivre dans le sol. Une telle accumulation pourrait en empêcher l'utilisation ultérieure. Aucun résidu des produits du cuivre ne doit être visible sur les produits récoltés. Peut être utilisé comme pesticide si les exigences de la section 5.6.2 de la norme CAN/CGSB-32.310 sont respectées, ce qui nécessite l'utilisation de pratiques de gestion et de techniques mécaniques biologiques.

10 Ce produit a été fabriqué en utilisant un substrat ou un milieu de culture génétiquement modifié. Si disponible sur le marché, une version non génétiquement modifiée doit être utilisée conformément au paragraphe 4.1.3.b. de la norme CAN/ONGC 32.311.

Pesticides botaniques

Les pesticides botaniques doivent être utilisés dans le cadre d'un programme de lutte antiparasitaire biologique. Ils ne doivent pas constituer la principale méthode de lutte antiparasitaire de l'exploitation. Les végétaux les moins toxiques doivent être utilisés de façon à minimiser les perturbations écologiques. Toutes les restrictions et les instructions sur l'étiquetage doivent être suivies, y compris les restrictions liées aux cultures, aux animaux d'élevage, aux organismes nuisibles ciblés, aux mesures de sécurité, aux délais d'application préalables à la récolte et au retour au champ des travailleurs. Peuvent être utilisés comme pesticides si les exigences de la section 5.6.2 de la norme CAN/ONGC 32.310 sont respectées, ce qui nécessite l'utilisation de pratiques de gestion et de techniques mécaniques biologiques.

Outils de gestion des animaux d'élevage et auxiliaires utilisés pour la production

Activateurs acides pour le dioxyde de chlore

Pour générer du dioxyde de chlore.

L'utilisation du dioxyde de chlore qui en découle doit respecter la norme CAN/CGSB-32.311. Ne doivent pas dépasser la limite maximale pour assurer la salubrité de l'eau potable lorsqu'ils sont utilisés en contact direct avec des produits biologiques et des surfaces qui peuvent entrer en contact avec un produit, sans d'abord avoir fait l'objet d'une intervention subséquente au préalable, y compris les utilisations suivantes : a) dans l'eau de lavage, en contact direct avec des cultures ou des aliments; et b) dans de l'eau provenant du nettoyage des systèmes d'irrigation, de l'équipement et des unités de stockage et de transport et utilisée sur les cultures ou dans les champs. Peuvent être utilisés jusqu'aux concentrations maximales indiquées sur l'étiquette sur les surfaces pouvant entrer en contact avec des produits biologiques, pourvu qu'une intervention subséquente ait éliminé la substance avant la production biologique.
