Crop Products: Botanical pesticides

HUMA GRO PROUD 3 (bhn-4396)

Botanical pesticides shall be used in conjunction with a biorational pest management program. They shall not be a farm plan's primary method of pest control. The least toxic botanicals shall be used in the least ecologically disruptive way possible. All label restrictions and directions shall be followed, including restrictions concerning crops, livestock, target pests, safety precautions, pre-harvest intervals and worker re-entry. May be used as a pesticide if the requirements of CAN/CGSB-32.310 subclause 5.6.2 are met, which require the use of organic management practices and mechanical techniques.

HUMA GRO PROMAX (bhn-4395)

Botanical pesticides shall be used in conjunction with a biorational pest management program. They shall not be a farm plan's primary method of pest control. The least toxic botanicals shall be used in the least ecologically disruptive way possible. All label restrictions and directions shall be followed, including restrictions concerning crops, livestock, target pests, safety precautions, pre-harvest intervals and worker re-entry. May be used as a pesticide if the requirements of CAN/CGSB-32.310 subclause 5.6.2 are met, which require the use of organic management practices and mechanical techniques.

HUMA GRO TURF PROMAX (bhn-4397)

Botanical pesticides shall be used in conjunction with a biorational pest management program. They shall not be a farm plan's primary method of pest control. The least toxic botanicals shall be used in the least ecologically disruptive way possible. All label restrictions and directions shall be followed, including restrictions concerning crops, livestock, target pests, safety precautions, pre-harvest intervals and worker re-entry. May be used as a pesticide if the requirements of CAN/CGSB-32.310 subclause 5.6.2 are met, which require the use of organic management practices and mechanical techniques.

HUMA GRO® TURF PROUD 3® (bhn-4398)

Botanical pesticides shall be used in conjunction with a biorational pest management program. They shall not be a farm plan's primary method of pest control. The least toxic botanicals shall be used in the least ecologically disruptive way possible. All label restrictions and directions shall be followed, including restrictions concerning crops, livestock, target pests, safety precautions, pre-harvest intervals and worker re-entry. May be used as a pesticide if the requirements of CAN/CGSB-32.310 subclause 5.6.2 are met, which require the use of organic management practices and mechanical techniques.

May be used when organic alfalfa is commercially unavailable. Contains one or more substances with a source or use restriction.

Dr. Earth Acid Lovers Premium Azalea, Camellia, Rhododendron & Maple Fertilizer 3-4-3 (dei-7553)

May be used when organic alfalfa is commercially unavailable. Contains one or more substances with a source or use restriction.

Dr. Earth Flower Girl Premium Bud & Bloom Booster 3-9-4 (dei-7550)

May be used when organic alfalfa is commercially unavailable. Contains one or more substances with a source or use restriction.

Dr. Earth Total Advantage Premium Rose & Flower Fertilizer 4-6-2 (dei-7544)

May be used when organic alfalfa is commercially unavailable. Contains one or more substances with a source or use restriction.

Crop Products: Alfalfa meal and pellets – nonorganic, Potting soil

Dr. Earth Pot of Gold Premium All Purpose Potting Soil (dei-7556)

May be used when organic alfalfa is commercially unavailable. Contains one or more substances with a source or use restriction.

Dr. Earth Exotic Blend Premium Cactus & Succulent Potting Mix (dei-7562)

May be used when organic alfalfa is commercially unavailable. Contains one or more substances with a source or use restriction.

Crop Products: Botanical pesticides

Dr. Earth Final Stop Vegetable Garden Insect Killer Concentrate (dei-7931)

Botanical pesticides shall be used in conjunction with a biorational pest management program. They shall not be a farm plan's primary method of pest control. The least toxic botanicals shall be used in the least ecologically disruptive way possible. All label restrictions and directions shall be followed, including restrictions concerning crops, livestock, target pests, safety precautions, pre-harvest intervals and worker re-entry. May be used as a pesticide if the requirements of CAN/CGSB-32.310 subclause 5.6.2 are met, which require the use of organic management practices and mechanical techniques.

Dr. Earth Final Stop Yard & Garden Insect Killer (dei-7934)

Botanical pesticides shall be used in conjunction with a biorational pest management program. They shall not be a farm plan's primary method of pest control. The least toxic botanicals shall be used in the least ecologically disruptive way possible. All label restrictions and directions shall be followed, including restrictions concerning crops, livestock, target pests, safety precautions, pre-harvest intervals and worker re-entry. May be used as a pesticide if the requirements of CAN/CGSB-32.310 subclause 5.6.2 are met, which require the use of organic management practices and mechanical techniques.

Dr. Earth Final Stop Fruit Tree Insect Killer (dei-7926)

Botanical pesticides shall be used in conjunction with a biorational pest management program. They shall not be a farm plan's primary method of pest control. The least toxic botanicals shall be used in the least ecologically disruptive way possible. All label restrictions and directions shall be followed, including restrictions concerning crops, livestock, target pests, safety precautions, pre-harvest intervals and worker re-entry. May be used as a pesticide if the requirements of CAN/CGSB-32.310 subclause 5.6.2 are met, which require the use of organic management practices and mechanical techniques.

Dr. Earth Final Stop Rose & Flower Insect Killer (dei-7929)

Botanical pesticides shall be used in conjunction with a biorational pest management program. They shall not be a farm plan's primary method of pest control. The least toxic botanicals shall be used in the least ecologically disruptive way possible. All label restrictions and directions shall be followed, including restrictions concerning crops, livestock, target pests, safety precautions, pre-harvest intervals and worker re-entry. May be used as a pesticide if the requirements of CAN/CGSB-32.310 subclause 5.6.2 are met, which require the use of organic management practices and mechanical techniques.

Dr. Earth Final Stop Disease Control Fungicide (dei-7924)

Botanical pesticides shall be used in conjunction with a biorational pest management program. They shall not be a farm plan's primary method of pest control. The least toxic botanicals shall be used in the least ecologically disruptive way possible. All label restrictions and directions shall be followed, including restrictions concerning crops, livestock, target pests, safety precautions, pre-harvest intervals and worker re-entry. May be used as a pesticide if the requirements of CAN/CGSB-32.310 subclause 5.6.2 are met, which require the use of organic management practices and mechanical techniques.

Dr. Earth Final Stop Pest Control Killer Spray (dei-7928)

Botanical pesticides shall be used in conjunction with a biorational pest management program. They shall not be a farm plan's primary method of pest control. The least toxic botanicals shall be used in the least ecologically disruptive way possible. All label restrictions and directions shall be followed, including restrictions concerning crops, livestock, target pests, safety precautions, pre-harvest intervals and worker re-entry. May be used as a pesticide if the requirements of CAN/CGSB-32.310 subclause 5.6.2 are met, which require the use of organic management practices and mechanical techniques.

Dr. Earth Final Stop Yard & Garden Insect Killer Concentrate (dei-7935)

Botanical pesticides shall be used in conjunction with a biorational pest management program. They shall not be a farm plan's primary method of pest control. The least toxic botanicals shall be used in the least ecologically disruptive way possible. All label restrictions and directions shall be followed, including restrictions concerning crops, livestock, target pests, safety precautions, pre-harvest intervals and worker re-entry. May be used as a pesticide if the requirements of CAN/CGSB-32.310 subclause 5.6.2 are met, which require the use of organic management practices and mechanical techniques.

Dr. Earth Final Stop Vegetable Garden Insect Killer (dei-7930)

Botanical pesticides shall be used in conjunction with a biorational pest management program. They shall not be a farm plan's primary method of pest control. The least toxic botanicals shall be used in the least ecologically disruptive way possible. All label restrictions and directions shall be followed, including restrictions concerning crops, livestock, target pests, safety precautions, pre-harvest intervals and worker re-entry. May be used as a pesticide if the requirements of CAN/CGSB-32.310 subclause 5.6.2 are met, which require the use of organic management practices and mechanical techniques.

Dr. Earth Final Stop Fruit Tree Insect Killer Concentrate (dei-7927)

Botanical pesticides shall be used in conjunction with a biorational pest management program. They shall not be a farm plan's primary method of pest control. The least toxic botanicals shall be used in the least ecologically disruptive way possible. All label restrictions and directions shall be followed, including restrictions concerning crops, livestock, target pests, safety precautions, pre-harvest intervals and worker re-entry. May be used as a pesticide if the requirements of CAN/CGSB-32.310 subclause 5.6.2 are met, which require the use of organic management practices and mechanical techniques.

Dr. Earth Final Stop Disease Control Fungicide Concentrate (dei-7925)

Botanical pesticides shall be used in conjunction with a biorational pest management program. They shall not be a farm plan's primary method of pest control. The least toxic botanicals shall be used in the least ecologically disruptive way possible. All label restrictions and directions shall be followed, including restrictions concerning crops, livestock, target pests, safety precautions, pre-harvest intervals and worker re-entry. May be used as a pesticide if the requirements of CAN/CGSB-32.310 subclause 5.6.2 are met, which require the use of organic management practices and mechanical techniques.

EZ-GRO Organic Powder Bloom 6-2-12 (hgi-8021)

Shall only be used to correct a documented deficiency specific to the type of crop. To be used when soil and plant deficiencies are documented by visual symptoms or by testing of soil and/or plant tissue, or when the need for a preventative application can be documented. Shall be used with caution to prevent excessive copper accumulation in the soil. Copper build up in soil may prohibit future use. Visible residue of copper products on harvested crops is prohibited. May be used to correct documented manganese deficiencies. Shall not cause salt buildup in soil through repeated application. May be used to correct a documented zinc deficiency. Contains one or more substances with a source or use restriction. To be used when soil and plant iron deficiencies are documented by visual symptoms or by testing of soil and/or plant tissue, or when the need for a preventative application can be documented. Shall be used to correct a documented magnesium deficiency.

Crop Products: Boron, Copper, Manganese, Zinc, Fertilizers, blended, Iron, Magnesium sulphate

Crop Products: Boron, Copper, Manganese, Potassium chloride (KCl), Zinc, Fertilizers, blended, Iron, Magnesium sulphate

PRO-MIX Organic Fertilizer for Bloom with Mycoactive 6-2-12 (pth-8713) ●

Shall only be used to correct a documented deficiency specific to the type of crop. To be used when soil and plant deficiencies are documented by visual symptoms or by testing of soil and/or plant tissue, or when the need for a preventative application can be documented. Shall be used with caution to prevent excessive copper accumulation in the soil. Copper build up in soil may prohibit future use. Visible residue of copper products on harvested crops is prohibited. May be used to correct documented manganese deficiencies. Shall not cause salt buildup in soil through repeated application. May be used to correct a documented zinc deficiency. Contains one or more substances with a source or use restriction. To be used when soil and plant iron deficiencies are documented by visual symptoms or by testing of soil and/or plant tissue, or when the need for a preventative application can be documented. Shall be used to correct a documented magnesium deficiency.

Crop Products: Boron, Copper, Manganese, Zinc, Fertilizers, blended, Iron, Magnesium sulphate

Crop Products: Botanical pesticides

Timorex Gold A Broad Spectrum Biofungicide Organic Fungicide (stn-7288)

Botanical pesticides shall be used in conjunction with a biorational pest management program. They shall not be a farm plan's primary method of pest control. The least toxic botanicals shall be used in the least ecologically disruptive way possible. All label restrictions and directions shall be followed, including restrictions concerning crops, livestock, target pests, safety precautions, pre-harvest intervals and worker re-entry. May be used as a pesticide if the requirements of CAN/CGSB-32.310 subclause 5.6.2 are met, which require the use of organic management practices and mechanical techniques.
