OMRI Canada Products List

Crop Products: Boron, Copper (Plant Nutrition), Fertilizers and Soil Amendments, Blended – Allowed With Restrictions, Iron, Magnesium Sulphate, Manganese, Molybdenum, Zinc

Pür/Combo 0-0-0 + 2.5% S + micros Liquid Nutrient (aiv-19487) ◆
Refer to specific ingredient categories for applicable use restrictions. May only be used when soil and plant deficiencies are documented by visual symptoms or by testing of soil or plant tissue, or when the need for a preventative application can be documented. For use when soil and plant deficiencies are documented by visual symptoms or by testing of soil and/or plant tissue, or when the need for a preventative application can be documented. Shall be used with caution to prevent excessive copper accumulation in the soil. Copper build up in soil may prohibit future use. Visible residue of copper products on harvested crops is prohibited. May be used to correct documented micronutrient deficiencies.

Crop Products: Boron, Fertilizers and Soil Amendments, Blended – Allowed With Restrictions, Iron, Manganese, Zinc

Pür/Soya 0-0-0 + 3% S + micros Liquid Nutrient with micronutrients (aiv-19174) ◆
Refer to specific ingredient categories for applicable use restrictions. May only be used when soil and plant deficiencies are documented by visual symptoms or by testing of soil or plant tissue, or when the need for a preventative application can be documented. For use when soil and plant deficiencies are documented by visual symptoms or by testing of soil and/or plant tissue, or when the need for a preventative application can be documented. May be used to correct documented micronutrient deficiencies.

Crop Products: Copper (Plant Nutrition), Fertilizers and Soil Amendments, Blended – Allowed With Restrictions

Pür/Cu 0-0-0 + 2.5% S + 5% Cu Liquid Nutrient (aiv-19183) ◆
Refer to specific ingredient categories for applicable use restrictions. For use when soil and plant deficiencies are documented by visual symptoms or by testing of soil and/or plant tissue, or when the need for a preventative application can be documented. Shall be used with caution to prevent excessive copper accumulation in the soil. Copper build up in soil may prohibit future use. Visible residue of copper products on harvested crops is prohibited.

Crop Products: Fertilizers and Soil Amendments, Blended

Pür/Cal 0-0-0 + 12% Ca Liquid Nutrient (aiv-19186)

Crop Products: Fertilizers and Soil Amendments, Blended – Allowed With Restrictions, Iron, Manganese

Pür/Mn 0-0-0 + 6% Mn + 0.5% Fe + 3.5% S Liquid Nutrient (aiv-19177) ◆
Refer to specific ingredient categories for applicable use restrictions. For use when soil and plant deficiencies are documented by visual symptoms or by testing of soil and/or plant tissue, or when the need for a preventative application can be documented. May be used to correct documented micronutrient deficiencies.

Crop Products: Fertilizers and Soil Amendments, Blended – Allowed With Restrictions, Zinc

Pür/Zn 0-0-0 + 4.5% S + 9% Zn Liquid Nutrient (aiv-19180) ◆
Refer to specific ingredient categories for applicable use restrictions. May only be used when soil and plant deficiencies are documented by visual symptoms or by testing of soil or plant tissue, or when the need for a preventative application can be documented.

Crop Products: Botanical Pesticides

CINNAMON BARK OIL (avt-14388) ◆
For use in conjunction with a biorational pest management program. Shall not be the primary method of pest control. The least toxic botanicals shall be used in the least ecologically disruptive way possible. All label restrictions and directions shall be followed, including restrictions concerning crops, livestock, target pests, safety precautions, pre-harvest intervals and worker re-entry. May only be used if the requirements of CAN/CGSB-32.310 subclause 5.6.2 are met, which require the use of organic management practices and mechanical techniques.

CLOVE LEAF ESSENTIAL OIL (avt-14390) ◆

For use in conjunction with a biorational pest management program. Shall not be the primary method of pest control. The least toxic botanicals shall be used in the least ecologically disruptive way possible. All label restrictions and directions shall be followed, including restrictions concerning crops, livestock, target pests, safety precautions, pre-harvest intervals and worker re-entry. May only be used if the requirements of CAN/CGSB-32.310 subclause 5.6.2 are met, which require the use of organic management practices and mechanical techniques.

GARLIC OIL (avt-14392) ◆

For use in conjunction with a biorational pest management program. Shall not be the primary method of pest control. The least toxic botanicals shall be used in the least ecologically disruptive way possible. All label restrictions and directions shall be followed, including restrictions concerning crops, livestock, target pests, safety precautions, pre-harvest intervals and worker re-entry. May only be used if the requirements of CAN/CGSB-32.310 subclause 5.6.2 are met, which require the use of organic management practices and mechanical techniques.

LEMON GRASS OIL (avt-14394) ◆

For use in conjunction with a biorational pest management program. Shall not be the primary method of pest control. The least toxic botanicals shall be used in the least ecologically disruptive way possible. All label restrictions and directions shall be followed, including restrictions concerning crops, livestock, target pests, safety precautions, pre-harvest intervals and worker re-entry. May only be used if the requirements of CAN/CGSB-32.310 subclause 5.6.2 are met, which require the use of organic management practices and mechanical techniques.

PEPPERMINT ESSENTIAL OIL (avt-14398) ◆

For use in conjunction with a biorational pest management program. Shall not be the primary method of pest control. The least toxic botanicals shall be used in the least ecologically disruptive way possible. All label restrictions and directions shall be followed, including restrictions concerning crops, livestock, target pests, safety precautions, pre-harvest intervals and worker re-entry. May only be used if the requirements of CAN/CGSB-32.310 subclause 5.6.2 are met, which require the use of organic management practices and mechanical techniques.

ROSEMARY OIL (avt-14400) ◆

For use in conjunction with a biorational pest management program. Shall not be the primary method of pest control. The least toxic botanicals shall be used in the least ecologically disruptive way possible. All label restrictions and directions shall be followed, including restrictions concerning crops, livestock, target pests, safety precautions, pre-harvest intervals and worker re-entry. May only be used if the requirements of CAN/CGSB-32.310 subclause 5.6.2 are met, which require the use of organic management practices and mechanical techniques.

THYME OIL (avt-14402) ◆

For use in conjunction with a biorational pest management program. Shall not be the primary method of pest control. The least toxic botanicals shall be used in the least ecologically disruptive way possible. All label restrictions and directions shall be followed, including restrictions concerning crops, livestock, target pests, safety precautions, pre-harvest intervals and worker re-entry. May only be used if the requirements of CAN/CGSB-32.310 subclause 5.6.2 are met, which require the use of organic management practices and mechanical techniques.

Crop Products: Amino Acids

Suboneyo BioLife S80 -Organic Nitrogen Fertilizer Based on Hydrolyzed Proteins, Amino Acids (scp-4660)
BioLife SN16 Water Soluble Organic Nitrogen Fertilizer 16-0-0 (scp-7853)

Crop Products: Boron, Fertilizers and Soil Amendments, Blended – Allowed With Restrictions, Iron, Manganese, Zinc

Suboneyo ProVitaMins MX 5-0-0 + TM Hydrolyzed Proteins, Amino Acids, Vitamin based organic fertilizer input with multi trace minerals (scp-8858) ◆
For use when soil and plant deficiencies are documented by visual symptoms or by testing of soil and/or plant tissue, or when the need for a preventative application can be documented. Refer to specific ingredient categories for applicable use restrictions. May be used to correct documented micronutrient deficiencies. May only be used when soil and plant deficiencies are documented by visual symptoms or by testing of soil or plant tissue, or when the need for a preventative application can be documented.

Crop Products: Copper (Plant Nutrition)

Suboneyo ProVitaMins Cu 5-0-0 + 12 CU - Hydrolyzed Proteins, Amino Acids, Vitamin Based Organic Fertilizer With Copper (scp-7670) ◆ ●
For use when soil and plant deficiencies are documented by visual symptoms or by testing of soil and/or plant tissue, or when the need for a preventative application can be documented. Shall be used with caution to prevent excessive copper accumulation in the soil. Copper build up in soil may prohibit future use. Visible residue of copper products on harvested crops is prohibited.

Crop Products: Iron

Suboneyo ProVitaMins Fe 5-0-0 + 12 Fe - Hydrolyzed Proteins, Amino Acids, Vitamin Based Organic Fertilizer With Iron (scp-7672) ◆ ●
For use when soil and plant deficiencies are documented by visual symptoms or by testing of soil and/or plant tissue, or when the need for a preventative application can be documented.

Crop Products: Magnesium Sulphate

Suboneyo ProVitaMins Mg 3.5-0-0 + 8Mg - Hydrolyzed Proteins, Amino Acids, Vitamin Based Organic Fertilizer With Magnesium (scp-7674) ◆ ●
May only be used when soil and plant deficiencies are documented by visual symptoms or by testing of soil or plant tissue, or when the need for a preventative application can be documented.

Crop Products: Manganese

Suboneyo ProVitaMins Mn:- 5-0-0 + 12Mn Hydrolyzed Proteins, Amino Acids, Vitamin Based Organic Fertilizer with Manganese (scp-7676) ◆●
May be used to correct documented micronutrient deficiencies.

Crop Products: Zinc

Suboneyo ProVitaMins Zn:- 5-0-0 + 12Zn Hydrolyzed Proteins, Amino Acids, Vitamin Based Organic Fertilizer with Zinc (scp-7678) ◆●
May only be used when soil and plant deficiencies are documented by visual symptoms or by testing of soil or plant tissue, or when the need for a preventative application can be documented.
