Crop Products: Fermentation Products

Smartfoil Formulation: Liquid concentrate (1-0-8) (afr-19820)

Biosmart Liquid concentrate (1-0-8) (afr-20071)

Crop Products: Fungicides

Nexy (afr-19824) ◆

When used pre-harvest, may only be used if the requirements of 205.206(e) are met, which require the use of preventive, mechanical, physical, and other pest, weed, and disease management practices. When used in post-harvest handling of raw agricultural commodities, not subject to the requirements of 205.206(e).

Crop Products: Microbial Inoculants

SabrEx2 Root Inoculant for Soybeans and Legumes LQ (afr-19822)

SabrEx2 Root Inoculant for Soybeans and Legumes In Furrow (afr-19826)

SabrEx Root Inoculant for Corn LQ (afr-19821)

◆ This product is allowed with restrictions. See the Categories section for use restrictions.

■ This liquid fertilizer has been inspected and approved for use in NOP organic production by OMRI.

1 The arsenic level of this product exceeds 10ppm. Application to certified organic farms must not contribute to contamination of crops, soil, or water.

2 The arsenic level of this product exceeds 20ppm. Application to certified organic farms must not contribute to contamination of crops, soil, or water.

4 The lead level of this product exceeds 90ppm. Application to certified organic farms must not contribute to contamination of crops, soil, or water.

5 The lead level of this product exceeds 180ppm. Application to certified organic farms must not contribute to contamination of crops, soil, or water.

6 The cadmium level of this product exceeds 20ppm. Application to certified organic farms must not contribute to contamination of crops, soil, or water.

7 The cadmium level of this product exceeds 40ppm. Application to certified organic farms must not contribute to contamination of crops, soil, or water.

8 This product contains more than 1,000 MPN/g fecal coliform. Application of this product on certified organic farms poses a significant risk of contributing to contamination of crops, soil, or water. Pathogen mitigation measures, such as a 120/90 day pre-harvest application period or composting as described at §205.203 of the National Organic Program Regulations, must be part of an organic system plan to reduce the contamination risk of this product.

9 This product contains more than 3 MPN/4g Salmonella. Application of this product on certified organic farms poses a significant risk of contributing to contamination of crops, soil, or water. Pathogen mitigation measures, such as a 120/90 day pre-harvest application period or composting as described at §205.203 of the National Organic Program Regulations, must be part of an organic system plan to reduce the contamination risk of this product.

10 This ingredient or processing aid is not certified organic. The operation supplying this input material may be exempt from certification under §205.101. Agricultural ingredients in this product shall not be labeled as organic when used in further processed products unless the ingredient or processing aid is certified by a USDA accredited certifier.

SabrEx Root Inoculant for Corn In-Furrow (afr-19823)

SabrEx Root Inoculant for Wheat And Cereals LQ (afr-19978)

SabrEx2 Root Inoculant for Soybeans and Legumes PB (afr-19827)

Crop Products: Microbial Products

SabrEx Root Inoculant for Cotton PB (afr-19809)

Processing Products: Chlorine Dioxide PureOxi (plg-19778) ◆

May be used in direct contact with post-harvest crop or food at levels approved by the FDA or the EPA for such a purpose. Such use must include a final rinse and residual chlorine levels in final rinse water shall not exceed the Maximum Residual Disinfectant Limit under the Safe Drinking Water Act, except that a final rinse is not required for use in FSIS inspected egg breaking facilities. When used as disinfectants and sanitizers for food contact surfaces, may be used up to maximum labeled rates and rinsing is not required unless mandated by the label use directions. May be used up to maximum labeled rates for disinfecting and sanitizing equipment or tools. No intervening event is necessary before equipment is used in organic production.
